Subject: Submittal of Monthly Water Screening Action Level Exceedance Report at Los Alamos National Laboratory, Storm Water Permit Application No. NM0030759

This letter is being submitted in accordance with the requirements of the Federal Facility Compliance Agreement (FFCA) Docket No. CWA-06-2005-1701, dated February 3, 2005, and the Administrative Order (AO) Docket No. CWA-06-2007-1716, dated November 16, 2006. As specified in Section V, Reporting, 25, of the FFCA, "Exceedances of water screening action levels (wSALs) shall be reported in writing to the Environmental Protection Agency (EPA) and the New Mexico Environment Department (NMED) monthly by the 28th day of the following month for which analytical results are received."

The attached tables present analytical results greater than wSAL received during January 2008. Los Alamos National Laboratory also performs voluntary monitoring and reporting of radionuclide concentrations in storm water and snowmelt runoff. Analytical results greater than the DOE Derived Concentration Guide (DCG) values received during January 2008, are also reported in the attached tables.

If you have any questions, please contact Steve Veenis at (505) 667-0013 (veenis@lanl.gov) or Gene Turner at (505) 667-5794 (gturner@doeal.gov).

Sincerely,

Susan G. Stiger, Associate Director
Environmental Programs
Los Alamos National Laboratory

Sincerely,

Gene Turner
