Dear Mr. Kieling:

SUBJECT: TRANSMITTAL OF THE GENERAL PART A PERMIT APPLICATION (REVISION 7.0) FOR THE LOS ALAMOS NATIONAL LABORATORY, EPA ID # NM0890010515

The purpose of this letter is to transmit the most recent revision of the General Part A Permit Application for the hazardous waste management units at the Los Alamos National Laboratory (LANL) from the owner and co-operators, the U.S. Department of Energy (DOE) and Los Alamos National Security LLC, (LANS), collectively the Permittees. This submittal satisfies the agreement with the New Mexico Environment Department's Hazardous Waste Bureau (NMED-HWB) as documented in correspondence between the Permittees and the NMED-HWB dated September 12, 2013 and September 16, 2013.

This document replaces RCRA Part A application revision 6.0, which was submitted to the NMED-HWB on June 30, 2009 (LA-UR-09-04027). Portions of that application were used in Attachment B of the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit (Permit) as renewed in December 2010.

The RCRA Part A application has been prepared in accordance with the Environmental Protection Agency's (EPA's) most recent Part A application guidance (EPA Form 8700-23, December 2011) and brings all the components comprising a revised Part A Application up to date. The submittal also fulfills the requirement for a revised Part A application in Title 40 of the Code of Federal Regulations (40 CFR) § 270.72(a)(4)). Note that the Part A Forms included in this application (the RCRA Subtitle C Site Identification Form, the Addendum to the Site Identification Form, and the Hazardous Waste Permit Identification Form) collectively constitute Amendment 16.0, as indicated in block 1 of the enclosed RCRA Subtitle C Site Identification Form. Amendment 16.0 reflects those permit modifications that have been approved by NMED-HWB since issuance of the renewed LANL Hazardous Waste Facility Permit in November 2010.

Please note that revision 7.0 of the Part A application is divided into two distinct sections. The first section (contained in the document binder) consists of the information to be released to the public. The second section (contained in the envelope marked "UCNI") contains Unclassified Controlled Nuclear Information (UCNI) as defined pursuant to federal law. The UCNI section, which is submitted as confidential information in compliance with 40 CFR § 270.12 requirements, is for the use of the NMED-HWB only and must be used and stored appropriately according to Atomic Energy Act Section 148 requirements. If there are any questions as to what type of arrangements are required for federally-compliant storage or management of UCNI information, please contact the Permittees.

In addition, the Part A Forms are included as Attachment B of the Permit. The Permittees request that this version (Amendment 16.0) of the Part A Forms replace the current Part A Forms comprising Attachment B of the Permit. Changes made to the forms in Amendment 16.0 include an update to the list of Other Environmental Permits in Item 5 of the Hazardous Waste Permit Identification Form to clarify a permit name. Also, changes reflecting the increase in operating capacities for the permitted units at TA-54-38 West are included. The process design capacity has been updated to 47,520 gallons, and a note was added stating that 13,410 gallons of the total capacity is excess storage only. The estimated annual quantities of waste for the EPA Hazardous Waste Numbers listed for TA-54 West (Item 9 of the form) were increased by a factor of four to account for the capacity increase.

Three hard copies and one electronic copy (which omits UCNI information) of the submittal are transmitted with this cover letter. If you have any questions concerning this matter please feel free to contact Gene Turner, DOE, at (505) 667-5794 or Mark P. Haagenstad, LANS, at (505) 665-2014.

9. Description of Hazardous Wastes – Enter information in the Sections on Form Page 5

A. EPA HAZARDOUS WASTE NUMBER – Enter the four-digit number from 40 CFR, Part 261 Subpart D of each listed hazardous waste you will handle. For hazardous wastes which are not listed in 40 CFR, Part 261 Subpart D, enter the four-digit number(s) from 40 CFR 261, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

B. ESTIMATED ANNUAL QUANTITY – For each listed waste entered in Item 9.A, estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in Item 9.A, estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

C. UNIT OF MEASURE – For each quantity entered in Item 9.B, enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure, taking into account the appropriate density or specific gravity of the waste.

D. PROCESSES

1. PROCESS CODES:

For listed hazardous waste: For each listed hazardous waste entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all the listed hazardous wastes.

For non-listed waste: For each characteristic or toxic contaminant entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

NOTE: THREE SPACES ARE PROVIDED FOR ENTERING PROCESS CODES. IF MORE ARE NEEDED:

1. Enter the first two as described above.

2. Enter "000" in the extreme right box of Item 9.D(1).

3. Use additional sheet, enter line number from previous sheet, and enter additional code(s) in Item 9.E.

2. PROCESS DESCRIPTION: If a code is not listed for a process that will be used, describe the process in Item 9.D(2) or in Item 9.E(2).

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER – Hazardous waste that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

1. Select one of the EPA Hazardous Waste Numbers and enter it in Item 9.A. On the same line complete Items 9.B, 9.C, and 9.D by estimating the total annual quantity of the waste and describing all the processes to be used to store, treat, and/or dispose of the waste.

2. In Item 9.A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In Item 9.D.2 on that line enter "included with above" and make no other entries on that line.

3. Repeat step 2 for each EPA Hazardous Waste Number that can be used to describe the hazardous waste.

EXAMPLE FOR COMPLETING Item 9 (shown in line numbers X-1, X-2, X-3, and X-4 below) – A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operations. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

10. Map

Attach to this application a topographical map, or other equivalent map, of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all springs, rivers, and other surface water bodies in this map area. See instructions for precise requirements.

11. Facility Drawing

All existing facilities must include a scale drawing of the facility (see instructions for more detail).

12. Photographs

All existing facilities must include photographs (aerial or ground-level) that clearly delineate all existing structures; existing storage, treatment and disposal areas; and sites of future storage, treatment or disposal areas (see instructions for more detail).
