Mr. John E. Kieling
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Drive East, Building 1
Santa Fe, NM 87505

Dear Mr. Kieling:

Subject: **Transmittal of Correspondence between Los Alamos National Laboratory and Receiving Facilities Concerning Nitrate Salt-Bearing Waste Containers**

The purpose of this submittal is to provide the New Mexico Environment Department-Hazardous Waste Bureau (NMED-HWB) with copies of correspondence with the facilities that received nitrate salt-bearing waste containers from Los Alamos. The enclosed correspondence was distributed via electronic mail from Los Alamos National Security, LLC (LANS) and the U.S. Department of Energy (DOE), collectively the Permittees, on October 5, 2015.

The letters and the subsequent enclosures concerning nitrate salt-bearing waste containers located at the Waste Isolation Pilot Plant (WIPP) and the Waste Control Specialists (WCS) facility were sent to the Carlsbad Field Office and WCS, LLC. The letters include an inventory of LANL nitrate salt-bearing waste containers as well as corrections to the manifest listings included with the original correspondence with the facilities in August 2014.

As required by Section II.11 of the LANL Nitrate Salt-Bearing Waste Container Isolation Plan, Revision 3, the correspondence must be provided to the NMED-HWB within 15 business days.

If you have comments or questions regarding this submittal, please contact Mark P. Haagenstad at (505) 665-2014 or David Nickless at (505) 665-6448

Sincerely,

Alison M. Dorries

Mr. Ryan Willams
Vice President of Integrated Services
Waste Control Specialists, LLC
Three Lincoln Centre
5430 LBJ Freeway, Ste. 1700
Dallas, Texas 75240

Dear Mr. Williams:

Subject: **Request for Correction of Waste Manifests at Waste Control Specialists, LLC for a Revised Los Alamos National Laboratory Nitrate Salt-Bearing Waste Inventory**

The purpose of this letter is to provide written notice of waste manifest discrepancies and request concurrence from Waste Control Specialists, LLC (WCS) to correct hazardous waste manifests associated with the application of the Environmental Protection Agency (EPA) Hazardous Waste Number (HWN) for ignitability (D001) to certain nitrate salt-bearing waste containers transported to WCS between April and early June 2014. This request is associated with the revised inventory of Los Alamos National Laboratory (LANL) nitrate salt-bearing waste containers and amends previous correspondence concerning these containers. The revised inventory included as Enclosure 1 updates the information provided to your office on August 14, 2014 (ADESH-14-042).

The U.S. Department of Energy (DOE) and Los Alamos National Security, LLC (LANS), the LANL Permittees, provided written concurrence with the amendment of manifests associated with 119 waste containers at WCS. However, reevaluation of the inventory of LANL nitrate salt-bearing waste containers has led to revisions of the inventory and requires correction to earlier correspondence. The original inventory that included 707 waste containers located at Waste Control Specialists, LLC (WCS), the Waste Isolation Pilot Plant (WIPP), and LANL, has been updated to 710 waste containers; 114 of those containers are currently stored at WCS.

Enclosure 1 includes a revised inventory of LANL nitrate salt-bearing waste containers that are located at WCS, WIPP and LANL. The list includes shipment numbers for each of the containers and reflects the

addition and removal of containers to and from the inventory. The containers located at WCS that remain on the inventory require the addition of the EPA HWN D001 to the associated manifests. Containers listed within Enclosure 2 are the containers that were included with the August 14, 2014 letter that the EPA HWN D001 does not apply to, therefore, this designation must be removed from any documentation associated with these containers.

The LANL Permittees request the following: (1) that WCS acknowledge its concurrence with these changes by notifying LANL in writing of the manifest discrepancies that are associated with adding D001 to the applicable containers and removing D001 from the containers listed in Enclosure 2; and (2) that WCS make the necessary corrections to LANL manifests and other documentation as soon as possible.

The LANL Permittees have completed an exhaustive review of historical generation records and do not anticipate the discovery of any additional containers should this situation change we will notify you immediately. If you have questions, please contact Mark Haagenstad (LANS) at (505) 665-2014, or David Nickless (DOE) at (505) 665-6448.

Sincerely,

Michael T. Brandt, DrPH, CIH
Associate Director
Environment, Safety & Health

Nitrate Salt-Bearing Waste Containers- Los Alamos National Laboratory- September 2015

Legend Date 9/17/2015

Parent ID	Original Parent container ID as recorded in the waste tracking database "Waste Compliance and Tracking System" (WCATS) and predecessor database systems to WCATS.
Original Waste Stream	Original Parent AK Waste Stream as recorded from generator information.
Parent EPA_CD	EPA Codes assigned to the Parent Containers prior to processing.
RemedDate	Date the container started remediation.
Rem Facility	Facility where the remediation was performed.
(Parent or Daughter) ID	Container ID as recorded in the waste tracking database "Waste Compliance and Tracking System" (WCATS). Can be a parent or daughter container.
Waste Stream	Current AK Waste Stream as recorded in CCP's AK Tracking Spreadsheet. (Parent of Daughter)
Location Category	Location of the Current Container (parent or daughter)
Current Location	Specific Location of the Current Container (Dome 231 = Parent Container in 85 gallon overpack; Dome 375 = SWBs containing a single Remediated Daughter Drum or SWB Overpack containing Nitrate and other Non Nitrate drums; RECV WCS = SWBs received at WCS containing Nitrate and other Non Nitrate Drums; RECV WIPP = received at WIPP (as either a single 55 gallon drum or in an SWB containing Nitrate and other Non Nitrate Drums)
Red and Green Highlighted	Green highlighted rows indicate containers that are removed from the nitrate salt-bearing waste container inventory. Red highlights indicate newly discovered (since May 2014) nitrate salt-bearing waste containers.

Mr. J. R. Stroble, Acting Assistant Manager
Office of Program Management
Carlsbad Field Office
U.S. Department of Energy
P.O. Box 3090
Carlsbad, New Mexico 88221-3090

Dear Mr. Stroble:

Subject: **Request for Correction of Waste Manifests at the Waste Isolation Pilot Plant for a Revised Los Alamos National Laboratory Nitrate Salt-Bearing Waste Inventory**

The purpose of this letter is to provide written notice of waste manifest discrepancies and request concurrence from the U.S. Department of Energy (DOE) Carlsbad Field Office (CBFO) to correct hazardous waste manifests associated with the application of the Environmental Protection Agency (EPA) Hazardous Waste Number (HWN) for ignitability (D001) to certain nitrate salt-bearing waste containers transported to the Waste Isolation Pilot Plant (WIPP) between May 2011 and January 2014. This request is associated with the revised inventory of Los Alamos National Laboratory (LANL) nitrate salt-bearing waste containers and amends previous correspondence concerning these containers. The revised inventory included as Enclosure 1 updates the information provided to your office on August 13, 2014 (ADESH-14-041).

The DOE and Los Alamos National Security, LLC (LANS), the LANL Permittees, provided written concurrence with the amendment of manifests associated with 368 waste containers at WIPP. However, reevaluation of the inventory of LANL nitrate salt-bearing waste containers has led to revisions of the inventory and requires correction to earlier correspondence. The original inventory that included 707 waste containers located at Waste Control Specialists, LLC (WCS), WIPP, and LANL, has been updated to 710 waste containers; 507 of those containers are located at WIPP.

Enclosure 1 includes a revised inventory of LANL nitrate salt-bearing waste containers that are located at WCS, WIPP and LANL. The list includes shipment numbers for each of the containers and reflects the

addition and removal of containers to and from the inventory. The containers located at WIPP that remain on the inventory require the addition of the EPA HWN D001 to the associated manifests. Containers listed within Enclosure 2 are the containers that were included with the August 13, 2014 letter that the EPA HWN D001 does not apply to, therefore, this designation must be removed from any documentation associated with these containers.

The LANL Permittees request the following: (1) that CBFO acknowledge its concurrence with these changes by notifying LANL in writing of the manifest discrepancies that are associated with adding D001 to the applicable containers and removing D001 from the containers listed in Enclosure 2; and (2) that CBFO ensure that the necessary corrections to LANL manifests and other documentation are made as soon as possible.

The LANL Permittees have completed an exhaustive review of historical generation records and do not anticipate the discovery of any additional containers should this situation change we will notify you immediately. If you have questions, please contact Mark Haagenstad (LANS) at (505) 665-2014, or David Nickless (DOE) at (505) 665-6448.

Sincerely,

Michael T. Brandt, DrPH, CIH
Associate Director
Environment, Safety & Health

Sincerely,

Kimberly Davis Lebak
Manager
Los Alamos Field Office
U.S. Department of Energy

Nitrate Salt-Bearing Waste Containers- Los Alamos National Laboratory- September 2015

Legend Date 9/17/2015

Parent ID	Original Parent container ID as recorded in the waste tracking database "Waste Compliance and Tracking System" (WCATS) and predecessor database systems to WCATS.
Original Waste Stream	Original Parent AK Waste Stream as recorded from generator information.
Parent EPA_CD	EPA Codes assigned to the Parent Containers prior to processing.
RemedDate	Date the container started remediation.
Rem Facility	Facility where the remediation was performed.
(Parent or Daughter) ID	Container ID as recorded in the waste tracking database "Waste Compliance and Tracking System" (WCATS). Can be a parent or daughter container.
Waste Stream	Current AK Waste Stream as recorded in CCP's AK Tracking Spreadsheet. (Parent of Daughter)
Location Category	Location of the Current Container (parent or daughter)
Current Location	Specific Location of the Current Container (Dome 231 = Parent Container in 85 gallon overpack; Dome 375 = SWBs containing a single Remediated Daughter Drum or SWB Overpack containing Nitrate and other Non Nitrate drums; RECV WCS = SWBs received at WCS containing Nitrate and other Non Nitrate Drums; RECV WIPP = received at WIPP (as either a single 55 gallon drum or in an SWB containing Nitrate and other Non Nitrate Drums)
Red and Green Highlighted	Green highlighted rows indicate containers that are removed from the nitrate salt-bearing waste container inventory. Red highlights indicate newly discovered (since May 2014) nitrate salt-bearing waste containers.
