RE: REVIEW
TECHNICAL AREA 63 TRANSURANIC WASTE FACILITY SOIL VAPOR MONITORING SYSTEM REPORT, QUARTER 6,
LOS ALAMOS NATIONAL LABORATORY
EPA ID#NM0890010515
HWB-LANL-19-012

Dear Messrs. Goodrum and Torres:

The New Mexico Environment Department (NMED) has received the United States Department of Energy (DOE) National Nuclear Security Administration, Los Alamos Field Office (NA-LA) and the Triad National Security, LLC (Triad) *Technical Area 63 Transuranic Waste Facility Soil Vapor Monitoring System Report, Quarter 6* (Report) dated and received April 4, 2019, and referenced by EPC-DO-19-103/LA-UR-19-22871.

Soil vapor monitoring was conducted at Technical Area 63 Transuranic Waste Facility on February 5, 2019, for the second quarter of fiscal year 2019. The Report indicates that vapor concentrations for volatile organic compounds (VOCs) from the five vapor monitoring wells (VMWs), 1 through 5, did not exceed soil-gas screening levels (SGSLs) for the identified constituents in Tables 3.14.3.1, 3.14.3.2, and 3.14.3.3 of Part 3 of the Los Alamos National Laboratory's RCRA Permit. NMED has completed review of the Report and has no comments.

If you have any questions regarding this letter, please contact Mitchell Schatz (505) 476-6051.

Sincerely,

John E. Kieling
Chief
Hazardous Waste Bureau
