SUBJECT: HAZARDOUS AND SOLID WASTE AMENDMENTS OF 1984, PERMIT MODIFICATION REQUEST, NO FURTHER ACTION PROPOSALS, JUNE 2000

Dear Mr. Kieling:

In accordance with 20 NMAC 4.1 Subparts IX and X, et. seq., the Department of Energy and the Los Alamos National Laboratory request a Class III permit modification to the Hazardous and Solid Waste Amendments Module VIII of the Resource Conservation and Recovery Act (RCRA) Hazardous Waste Facility Permit.

The Class III permit modification requests the removal of nine solid waste management units (SWMUs) from the permit. These units have been investigated and recommended for no further action in a RCRA facility investigation report, a voluntary corrective action completion report, or the implementation of a RCRA closure in accordance with an approved closure plan. Your Bureau has concurred with the determination that no further action is appropriate for eight of the nine SWMUs via approval of the aforementioned reports and closure certifications. The remaining SWMU has received an approved closure letter from the New Mexico Environment Department Underground Storage Tank Bureau. A Class III permit modification request is the appropriate vehicle to remove the nine units from the permit.

Enclosed please find three copies of the permit modification request to remove nine SWMUs from Module VIII of the Laboratory Hazardous Waste Facility Permit. Also enclosed is a certification statement signed by the designee owner and operator of the Laboratory.

The facility will publish in local newspapers a designated notice of the modification required and will send notices to all persons on the facility mailing list. The notice will contain, at a minimum, all information as prescribed in 20 NMAC 4.1 Subpart IX, Subsection 901B.
