Dear Messrs. Gregory and McInroy:

The New Mexico Environment Department (NMED) has received the Department of Energy (DOE) and the Los Alamos National Security L.L.C.'s (LANS) (collectively, the Permittees) *Request for Certificates of Completion for One Solid Waste Management Unit and Eight Areas of Concern in the Pueblo Canyon Aggregate Area*, dated September 5, 2008. Results of the associated site investigation were presented in the *Investigation Report for Pueblo Canyon Aggregate Area, Revision 1*, dated July 2008, and referenced by LA-UR-08-4765 and EP2008-0391.

AOC 00-030(p) was a septic tank that was placed into service in 1946 and removed from service between 1947 and 1948 when the central wastewater treatment plant became operational. In 1996, it was determined that the tank had been excavated and removed during installation of an area gas main in 1950. A steel outlet drain line was subsequently located, excavated and removed in 1996. Based on review of soil sample analytical data collected during the drain line removal, the nature and extent of contamination at the site has been defined. The evaluation of

potential human health and ecological risks from the site indicates AOC 00-030(p) does not pose an unacceptable risk to human health or to ecological receptors.

NMED has determined that the requirements of the Consent Order have been satisfied and the site qualifies for "Corrective Action Complete Without Controls" status. NMED hereby issues this certificate of completion for AOC 00-030(p) pursuant to Section VII.E.6.b of the Consent Order.

If, in the future, any additional information becomes available that indicates the site may pose a risk to human health or the environment, NMED may require the Permittees to conduct additional corrective action at the site.

Please contact Daniel Comeau at (505) 476-6043, should you have any questions.

Sincerely,

James B. Bearzi  
Chief  
Hazardous Waste Bureau
