**RE: APPROVAL WITH MODIFICATION
WORK PLAN TO PLUG AND ABANDON TEST WELL 3
LOS ALAMOS NATIONAL LABORATORY
EPA ID#NM0890010515
HWB-LANL-MISC-GW**

Dear Messrs. Rael and Graham:

The New Mexico Environment Department (NMED) is in receipt of the United States Department of Energy (DOE) and Los Alamos National Security, L.L.C.'s (collectively, the Permittees) document entitled *Work Plan to Plug and Abandon Test Well 3 (Plan)* dated January 14, 2011 and referenced by EP2011-0007.

NMED has reviewed the Plan and hereby issues this Approval with the following modification.

1. Before abandoning Test Well 3, the Permittees must measure the depth to water and obtain a video log inside the 10-inch casing. The condition of the casing, as exhibited by the video log, must be used to determine whether extraction and/or cutting and removal of the 10-inch casing is the best method of abandonment. For example, if the video log indicates that the screened interval is damaged or

corroded, then cutting the casing just above the screen followed by removal of the casing may be necessary. If such conditions occur or if any other circumstances warrant a significant change in the method and/or procedure for abandoning Test Well 3, the Permittees must contact NMED for its approval prior to proceeding.

As proposed in the Plan, the Permittees must complete the plugging and abandonment of Test Well 3 by **December 20, 2011** and submit the well abandonment summary report no later than **January 31, 2012**.

Should you have any questions, please contact Michael Dale of my staff at (505) 661-2673.

Sincerely,

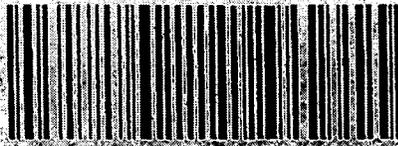

James P. Bearzi
