**Subject: NPDES Permit No. NM0030759—Certification of Analytical Results for One Site Monitoring Area**

Dear Ms. Johnsey:

These documents are being submitted in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) Permit No. NM0030759 for Los Alamos National Laboratory, issued to Los Alamos National Security, LLC, and the U.S. Department of Energy, effective November 1, 2010. As specified in Part I, Section E.I.(c),

Permittees shall certify completion of installation of control measures under this subsection to EPA within 30 days of completion of all such measures at the Site and, where applicable shall provide sampling results within 30 days of receipt of analytical results from the first measurable storm event after completion of such measures. Such certification shall be signed in accordance with 40 C.F.R. Section 122.22(b) and shall include a description and photographs of all completed measures.

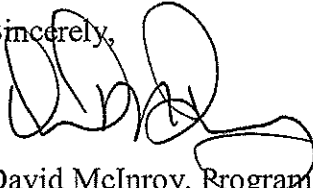

Accordingly, the analytical results from samples collected during the first measurable storm event received at one site monitoring area (SMA) in the last 30 days are enclosed. The documentation is presented in an SMA-specific report (Table 1). The report includes a signed certification statement and the analytical results.
