RE: REVIEW
TECHNICAL AREA 63 TRANSURANIC WASTE FACILITY
SOIL VAPOR MONITORING SYSTEM REPORT, QUARTER 9,
LOS ALAMOS NATIONAL LABORATORY
EPA ID#NM0890010515
HWB-LANL-19-081

Dear Messrs. Weis and Torres:

The New Mexico Environment Department (NMED) has received the United States Department of Energy (DOE) National Nuclear Security Administration, Los Alamos Field Office (NA-LA) and the Triad National Security, LLC (Triad) (collectively, the Permittees) *Technical Area 63 Transuranic Waste Facility Soil Vapor Monitoring System Report, Quarter 9* (Report), dated and received January 10, 2020, and referenced by EPC-DO-19-467/LA-UR-20-20000.

Soil vapor monitoring was conducted at Technical Area 63 Transuranic Waste Facility on November 14, 2019, for the ninth quarter of monitoring. The Report indicates that vapor concentrations for volatile organic compounds (VOCs) from the five vapor monitoring wells (VMWs), 1 through 5, did not exceed soil-gas screening levels (SGSLs) for the identified constituents in Tables 3.14.3.1, 3.14.3.2, and 3.14.3.3 of Part 3 of the Los Alamos National Laboratory's RCRA Permit. NMED has completed review of the Report and has no comment.

U2000223

Messrs. Weis and Torres
