Subject: Semi-Annual Monitoring Report for Los Alamos National Laboratory, AI No. 856, Title V Operating Permit P100-R2M4 for July 1 – December 31, 2020

Dear Mr. Feather:

Enclosed is Los Alamos National Laboratory's (LANL) Semi-Annual Monitoring Report for the second half of 2020 for Operating Permit P100-R2M4, effective July 18, 2019. This Semi-Annual Monitoring Report covers the July 1 – December 31, 2020 (2020H2) reporting period.

This submission is required by permit condition A109.A. of the Title V Operating Permit P100-R2M4, and is submitted within 45 days following December 31, 2020, the end of the six month reporting period. LANL's Air Quality Compliance team obtained approval from Ms. Carina Munoz-Dyer, Reports Group Staff Manager at the New Mexico Environment Department, Air Quality Bureau, to submit attachments to this report in E-files only without paper copies.

This Semi-Annual Monitoring Report includes:

1. Printed copies of:
    - Cover Letter (Signed original)
    - Reporting Submittal Form for P100-R2M4 (Signed original)
    - Title V Report Certification Form for P100-R2M4 (Signed original)
    - Title V Semi-Annual Monitoring Report for July 1– December 31, 2020 (2020H2)
        - Part 1 – Monitoring Activity Reporting Requirements
        - Part 2 – Deviation Summary Report

2. E-files of:
    - Cover Letter
    - Reporting Submittal Form for P100-R2M4
    - Title V Report Certification Form for P100-R2M4
    - Title V Semi-Annual Monitoring Report for July 1– December 31, 2020 (2020H2)
        - Part 1 – Monitoring Activity Reporting Requirements
        - Part 2 – Deviation Summary Report
    - Monitoring Report Attachments A.607.A through A.1507.B

There were two deviations from permit conditions during this reporting period:

1. Permit Condition A116, Asbestos NESHAP - On August 5, 2020, two loads of waste containing asbestos totaling about 11 tons of soil, concrete, and presumed transite piping (PACM) were taken to the Los Alamos Eco Station, which is an unauthorized landfill for waste containing asbestos. At the time it was unknown that the waste contained asbestos, as soon as it was discovered an emergency notification was submitted to NMED and the waste was cleaned up and taken to an approved waste site, removal was completed on November 19, 2020.
2. Permit Condition A607.A – Asphalt Plant Baghouse Differential Pressure - At the asphalt plant, after the annual calibration in September 2020 on the magnehelic gauge, pressure transmitter, and chart recorder, the equipment was re-installed improperly. The device to continually measure the pressure drop across the baghouse was inoperable during the period October 2 – November 20, 2020 because of equipment malfunction. This resulted in missing differential pressure data across the baghouse for brief periods of operation during this timeframe (intermittent operation for a total of 8.5 hours of operation during this period). Due to lack of available personnel during LANL's limited operational stance due to the COVID-19 pandemic, this issue was not fixed until November 20, 2020. The asphalt plant operator is now aware that the LANL Air Quality Team must be notified within 24 hours and the equipment must be shut down if the differential pressure readings are out of acceptable range to ensure this type of issue can be corrected more urgently moving forward.

If you have any questions or comments regarding this submittal or would like to discuss the submittal in greater detail, please contact Adrienne Nash at (505) 665-5026 or Marjorie Stockton at (505) 665-3289.

Hi Carina,

Good morning.

Thank you for the forms.

I do have one question. LANL's monitoring report attachments are 1500-1700 pages long. The previous compliance manager, Renae Held allowed us to submit electronic files only for the attachments. Is this acceptable to you? We will submit paper copies for the submittal form, certification form and the report. We would like to avoid printing so many pages.

Let me know.

Thank you again for your help with this.

Brinda

Importance: High

Brinda,

Here are the template for AI 856 – LANL Semi-Annual and ACC reports. The forms are a combined version that include TV Permit P100-R2 and R2M1. Please read the instructions on the first page of each form. Let me know if you have any questions.

Thanks
Carina

Subject: Template for Los Alamos National Laboratory's semi-annual monitoring report

Hi Carina,

We spoke a month ago about getting a new template for the semi-annual monitoring report for Title V permit P100-R2M1.
I was wondering if the template is available so that I can get started on the monitoring report.

The AI for LANL is AI856.

Until Feb 3, 2017 LANL operated under permit P100-R2.
On Feb 3, 2017, LANL was issued a permit modification P100-R2M1. The modification was for the addition of Evaporative Sprayers in Section A1500.

Would you kindly let me know if LANL has to submit two monitoring reports or one for the Jan 1–Jun 30, 2017 monitoring period?

I will follow up this e-mail with a phone call to you.

Thank you.

With best regards,

Brinda Ramanathan

LA-UR-21-20502

Date: FEB 0 3 2021

Title V Semi - Annual Monitoring Report for Permits P100-R2M4

Part 1 – Monitoring Activity Reporting Requirements

A Semi-Annual Report of monitoring activities is due within 45 days following the end of every 6-month reporting period. The six month reporting periods start on January 1st and July 1st of each year.

A responsible official (as defined in 20.2.70.7.AE NMAC) shall certify the accuracy, truth and completeness of every report and compliance certification submitted to the Department as required by this permit. These certifications shall be part of each document. (20.2.70.300.E NMAC)

Compliance Certification Reports, Semi-Annual monitoring reports, compliance schedule progress reports, and any other compliance status information required by this permit shall be certified by the responsible official and submitted to:

Manager, Compliance and Enforcement Section
New Mexico Environment Department
Air Quality Bureau
525 Camino De Los Marquez, Suite 1
Santa Fe, NM 87505-1816

B108 General Monitoring Requirements

(20.2.70. 302.A and C NMAC)

A. These requirements do not supersede or relax requirements of federal regulations.

B. The following monitoring and/or testing requirements shall be used to determine compliance with applicable requirements and emission limits. Any sampling, whether by portable analyzer or EPA reference method, that measures an emission rate over the applicable averaging period greater than an emission limit in this permit constitutes noncompliance with this permit. The Department may require, at its discretion, additional tests pursuant to EPA Reference Methods at any time, including when sampling by portable analyzer measures an emission rate greater than an emission limit in this permit; but such requirement shall not be construed as a determination that the sampling by portable analyzer does not establish noncompliance with this permit and shall not stay enforcement of such noncompliance based on the sampling by portable analyzer.

C. If the emission unit is shutdown at the time when periodic monitoring is due to be accomplished, the permittee is not required to restart the unit for the sole purpose of performing the monitoring. Using electronic or written mail, the permittee shall notify the Department's Enforcement Section of a delay in emission tests prior to the deadline for accomplishing the tests. Upon recommencing operation, the permittee shall submit any pertinent pre-test notification requirements set forth in the current version of the Department's Standard Operating Procedures For Use Of Portable Analyzers in Performance Test, and shall accomplish the monitoring.

D. The requirement for monitoring during any monitoring period is based on the percentage of time that the unit has operated. However, to invoke monitoring period exemptions at B108.D(2), hours of operation shall be monitored and recorded.

   (1) If the emission unit has operated for more than 25% of a monitoring period, then the permittee shall conduct monitoring during that period.

   (2) If the emission unit has operated for 25% or less of a monitoring period then the monitoring is not required. After two successive periods without monitoring, the permittee shall conduct monitoring during the next period regardless of the time operated during that period, except that for any monitoring period in which a unit has operated for less than 10% of the monitoring period, the period will not be considered as one of the two successive periods.

   (3) If invoking the monitoring period exemption in B108.D(2), the actual operating time of a unit shall not exceed the monitoring period required by this permit before the required monitoring is performed. For example, if the monitoring period is annual, the operating hours of the unit shall not exceed 8760 hours before monitoring is conducted. Regardless of the time that a unit actually operates, a minimum of one of each type of monitoring activity shall be conducted during the five year term of this permit.

E. The permittee is not required to report a deviation for any monitoring or testing in a Specific Condition if the deviation was authorized in this General Condition B108.

F. For all periodic monitoring events, except when a federal or state regulation is more stringent, three test runs shall be conducted at 90% or greater of the unit's capacity as stated in this permit, or in the permit application if not in the permit, and at additional loads when requested by the Department. If the 90% capacity cannot be achieved, the monitoring will be conducted at the maximum

achievable load under prevailing operating conditions except when a federal or state regulation requires more restrictive test conditions. The load and the parameters used to calculate it shall be recorded to document operating conditions and shall be included with the monitoring report.

G. When requested by the Department, the permittee shall provide schedules of testing and monitoring activities. Compliance tests from previous NSR and Title V permits may be re-imposed if it is deemed necessary by the Department to determine whether the source is in compliance with applicable regulations or permit conditions.

H. If monitoring is new or is in addition to monitoring imposed by an existing applicable requirement, it shall become effective 120 days after the date of permit issuance. For emission units that have not commenced operation, the associated new or additional monitoring shall not apply until 120 days after the units commence operation. All pre-existing monitoring requirements incorporated in this permit shall continue to apply from the date of permit issuance. All monitoring periods, unless stated otherwise in the specific permit condition or federal requirement, shall commence at the beginning of the 12 month reporting period as defined at condition A109.B.

B109 General Recordkeeping Requirements

(20.2.70.302.D NMAC)

A. The permittee shall maintain records to assure and verify compliance with the terms and conditions of this permit and any applicable requirements that become effective during the term of this permit. The minimum information to be included in these records is (20.2.70.302.D.1 NMAC):
   (1) equipment identification (include make, model and serial number for all tested equipment and emission controls);
   (2) date(s) and time(s) of sampling or measurements;
   (3) date(s) analyses were performed;
   (4) the company or entity that performed the analyses;
   (5) analytical or test methods used;
   (6) results of analyses or tests; and
   (7) operating conditions existing at the time of sampling or measurement.

B. The permittee shall keep records of all monitoring data, equipment calibration, maintenance, and inspections, Data Acquisition and Handling System (DAHS) if used, reports, and other supporting information required by this permit for at least five (5) years from the time the data was gathered or the reports written. Each record shall clearly identify the emissions unit and/or monitoring equipment, and the date the data was gathered. (20.2.70.302.D.2 NMAC)

C. If the permittee has applied and received approval for an alternative operating scenario, then the permittee shall maintain a log at the facility, which documents, contemporaneously with any change from one operating scenario to another, the scenario under which the facility is operating. (20.2.70.302.A.3 NMAC)

D. The permittee shall keep a record describing off permit changes made at this source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under this permit, and the emissions resulting from those changes. (20.2.70.302.I.2 NMAC)

E. Unless otherwise indicated by Specific Conditions, the permittee shall keep the following records for malfunction emissions and routine and predictable emissions during startup, shutdown, and scheduled maintenance (SSM):

(1) The owner or operator of a source subject to a permit, shall establish and implement a plan to minimize emissions during routine or predictable startup, shutdown, and scheduled maintenance through work practice standards and good air pollution control practices. This requirement shall not apply to any affected facility defined in and subject to an emissions standard and an equivalent plan under 40 CFR Part 60 (NSPS), 40 CFR Part 63 (MACT), or an equivalent plan under 20.2.72 NMAC - Construction Permits, 20.2.70 NMAC - Operating Permits, 20.2.74 NMAC - Permits - Prevention of Significant Deterioration (PSD), or 20.2.79 NMAC - Permits - Nonattainment Areas. (20.2.7.14.A NMAC) The permittee shall keep records of all sources subject to the plan to minimize emissions during routine or predictable SSM and shall record if the source is subject to an alternative plan and therefore, not subject to the plan requirements under 20.2.7.14.A NMAC.

(2) If the facility has allowable SSM emission limits in this permit, the permittee shall record all SSM events, including the date, the start time, the end time, a description of the event, and a description of the cause of the event. This record also shall include a copy of the manufacturer's, or equivalent, documentation showing that any maintenance qualified as scheduled. Scheduled maintenance is an activity that occurs at an established frequency pursuant to a written protocol published by the manufacturer or other reliable source. The authorization of allowable SSM emissions does not supersede any applicable federal or state standard. The most stringent requirement applies.

(3) If the facility has allowable malfunction emission limits in this permit, the permittee shall record all malfunction events to be applied against these limits. The permittee shall also include the date, the start time, the end time, and a description of the event. **Malfunction means** any sudden and unavoidable failure of air pollution control equipment or process equipment beyond the control of the owner or operator, including malfunction during startup or shutdown. A failure that is caused entirely or in part by poor maintenance, careless operation, or any other preventable equipment breakdown shall not be considered a malfunction. (20.2.7.7.E NMAC) The authorization of allowable malfunction emissions does not supersede any applicable federal or state standard. The most stringent requirement applies. This authorization only allows the permittee to avoid submitting reports under 20.2.7 NMAC for total annual emissions that are below the authorized malfunction emission limit.

(4) The owner or operator of a source shall meet the operational plan defining the measures to be taken to mitigate source emissions during malfunction, startup or shutdown. (20.2.72.203.A(5) NMAC)

B110 General Reporting Requirements

(20.2.70.302.E NMAC)

A. Reports of required monitoring activities for this facility shall be submitted to the Department on

the schedule in section A109. Monitoring and recordkeeping requirements that are not required by a NSPS or MACT shall be maintained on-site or (for unmanned sites) at the nearest company office, and summarized in the semi-annual reports, unless alternative reporting requirements are specified in the equipment specific requirements section of this permit.

B. Reports shall clearly identify the subject equipment showing the emission unit ID number according to this operating permit. In addition, all instances of deviations from permit requirements, including those that occur during emergencies, shall be clearly identified in the reports required by section A109. (20.2.70.302.E.1 NMAC)

C. The permittee shall submit reports of all deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken. These reports shall be submitted as follows:
   (1) Deviations resulting in excess emissions as defined in 20.2.7.7 NMAC (including those classified as emergencies as defined in section B114.A) shall be reported in accordance with the timelines specified by 20.2.7.110 NMAC and in the semi-annual reports required in section A109. (20.2.70.302.E.2 NMAC)
   (2) All other deviations shall be reported in the semi-annual reports required in section A109. (20.2.70.302.E.2 NMAC).

D. The permittee shall submit reports of excess emissions in accordance with 20.2.7.110.A NMAC.

E. Results of emission tests and monitoring for each pollutant (except opacity) shall be reported in pounds per hour (unless otherwise specified) and tons per year. Opacity shall be reported in percent. The number of significant figures corresponding to the full accuracy inherent in the testing instrument or Method test used to obtain the data shall be used to calculate and report test results in accordance with 20.2.1.116.B and C NMAC. Upon request by the Department, CEMS and other tabular data shall be submitted in editable, MS Excel format.

F. At such time as new units are installed as authorized by the applicable NSR Permit, the permittee shall fulfill the notification requirements in the NSR permit.

G. Periodic Emissions Test Reporting: The permittee shall report semi-annually a summary of the test results.

H. The permittee shall submit an emissions inventory for this facility annually. The emissions inventory shall be submitted by the later of April 1 or within 90 days after the Department makes such request. (20.2.73 NMAC and 20.2.70.302.A.1 NMAC)

I. Emissions trading within a facility (20.2.70.302.H.2 NMAC)
   (1) For each such change, the permittee shall provide written notification to the department and the administrator at least seven (7) days in advance of the proposed changes. Such notification shall state when the change will occur and shall describe the changes in emissions that will result and how these increases and decreases in emissions will comply with the terms and conditions of the permit.
   (2) The permittee and department shall attach each such notice to their copy of the relevant permit.

FACILITY SPECIFIC REQUIREMENTS:

A109 Facility: Reporting B. A Semi-Annual Report of actual emissions from all permitted sources unless otherwise specified in this permit is due within 90 days following the end of every 6-month reporting period as defined at Condition A109.A. Emission estimates of pollutants NOx, CO, SO2, VOC, TSP, PM10, and PM2.5 shall not include fugitive emissions. Emission estimates of HAPs shall include fugitive emissions. Emission estimates shall not include Insignificant or Trivial Activities, except that facility-wide emissions from all natural gas combustion sources shall be estimated. The reports shall include a comparison of actual emissions that occurred during the reporting period with the facility-wide allowable emission limits at Table 106.B.
Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.
☒ **Yes** **Date report submitted:** September 11, 2020 **Tracking Number:** SBR20200006
☐ **No** **Provide comments and identify any supporting documentation as an attachment.**
Comments: The Semi-Annual Emissions Report for January 1 - June 30, 2020, was submitted on September 11, 2020 within 90 days from the end of the reporting period as required by condition A109.A. The Semi-Annual Emissions Report for July 1 - December 31, 2020 is not due until 90 days following December 31, 2020, which is after the submission of this report.

EQUIPMENT SPECIFIC REQUIREMENTS:

A605 Fuel Requirements – Asphalt Production

A. Asphalt Plant Combustion Sources

Requirement: Combustion sources located at the asphalt plant shall combust only those fuels allowed under condition III.A.3 of the NSR Permit GCP-3-2195G.

Monitoring: N/A

Recordkeeping: The permittee shall meet the recordkeeping requirements of GCP-3 and maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Pipeline quality natural gas is used at the asphalt plant and is allowed under condition III.A.3 of the NSR permit GCP-3-2195G.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: A109.A: This Semi-Annual Monitoring Report is submitted within 45 days allowed after the reporting period.

A109.B: The January 1 - June 30, 2020 Semi-Annual Emissions Report was submitted on September 11, 2020 (SBR No. 20200006) within the 90 days allowed. The July 1 - December 31, 2020 Semi-Annual Emissions Report for Operating Permit P100-R2M4 is due 90 days following December 31, 2020, which is after the submission of this report.

A109.C: The 2020 Annual Compliance Certification Report for operating permit P100-R2M4 (January 1 –December 31, 2020) will be submitted to NMED AQB and the U.S. Environmental Protection Agency (EPA) by January 30, 2021, within 30 days of December 31, 2020, the end of the 12-month reporting period.

All reporting requirements are completed and submitted in accordance with Section B110.

A607 Asphalt Production – Other

A. Asphalt Plant Baghouse – Differential Pressure

Requirement: The baghouse shall be equipped with a device to continually measure the pressure drop across the baghouse.

Monitoring: The permittee shall monitor the differential pressure (inches of water) across the filters by the use of a differential pressure gauge. Pressure gauge readings and the time period the rotary dryer drum operates shall be recorded by a datalogger each time the rotary dryer drum is operating. The pressure data shall confirm whether the filter(s) are operating within the unit's specifications.

Recordkeeping: The permittee shall manually record the baghouse pressure drop readings at least once each day the rotary drum dryer operates and maintain records of all baghouse differential pressure readings in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: One permit deviation occurred during this reporting period. The device to continually measure the pressure drop across the baghouse was inoperable during the period October 2 – November 20, 2020 because of equipment malfunction. This resulted in missing differential pressure data across the baghouse for brief periods of operation during this timeframe. This deviation has not been previously reported to NMED. After the annual calibration in September 2020 on the magnehelic gauge, pressure transmitter, and chart recorder, the equipment was re-installed improperly. Once aware, the LANL Air Quality Team immediately contacted appropriate personnel to reconnect the equipment properly, but due to lack of available personnel during LANL's limited operational stance due to the COVID-19 pandemic, this issue was not fixed until November 20, 2020. Asphalt Plant operator is now aware that LANL Air Quality Team must be notified within 24 hours and the equipment must be shut down if the differential pressure readings are out of acceptable range so this type of issue can be corrected more urgently moving forward. This is noted as a deviation in Part 2 "Deviation Summary Report." There were no excess emissions during this period.

Requirement: The baghouse is equipped with a magnehelic gauge connected to a data-logger to continually monitor the differential pressure across the baghouse.

Monitoring: The differential pressure data is used to confirm proper operation of the baghouse. The differential pressure is measured during rotary dryer drum operation as described below:

1. A datalogger records differential pressure readings every two minutes and transmits the pressure drop data through a leased phoneline to a remote terminal unit.
2. A chart recorder records differential pressure readings and serves as a backup when there is a problem with the remote data-transmission phone communication.
3. The asphalt plant operator manually records the differential pressure readings at each start-up and shut-down daily.

Recordkeeping: Recordkeeping conditions are met using a datalogger, backup chart recorder, and operator's

differential pressure entries at the start and end of each operation daily. A backup chart recorder captured baghouse pressure drop data when the phone-line communciation did not work. The daily pressure drop data for days of plant operation and backup charts are located in ATTACHMENT A607.A. Please note, the Asphalt Plant did not operate in July, August, and September, so no pressure data/chart recorder is provided.
Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A607 Asphalt Production – Other

B. Asphalt Plant Baghouse - Stack Height (Unit TA-60-BDM)

Requirement: The rotary dryer/baghouse exhaust stack shall be no less than 10 meters in height.

Monitoring: N/A

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The height of the asphalt plant stack has been measured and is no less than 10 meters. The stack is a permanent structure attached to the baghouse fan outlet and its height does not change.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A607 Asphalt Production – Other

C. Asphalt Plant Baghouse – Opacity

Requirement: Visible emissions from the rotary dryer/baghouse exhaust stack shall not exhibit an opacity of 20% or greater averaged over a (6) minute period.

Monitoring: During periods of drum dryer operation, the permittee shall perform six (6) minute opacity readings on the rotary dryer/baghouse stack. Opacity readings shall be performed at least once per month during any month the drum dryer operates. The observations shall be conducted according to 40 CFR 60, Appendix A, Method 9.

Recordkeeping: The permittee shall maintain records of all opacity observations and in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement/Monitoring: LANL has certified visible emissions (opacity) readers on-site who perform monthly six (6) minute opacity readings using the procedures in 40 CFR Part 60, Appendix A, Reference Method 9 to determine compliance with the opacity limitation. No visible emissions exhibited an opacity of 20% or greater during this reporting period. Method 9 opacity reports for this reporting period are provided in ATTACHMENT A607.C. Please note, the Asphalt Plant did not operate in July, August, and September, so no opacity reading was taken.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A607 Asphalt Production – Other

D. Asphalt Plant Baghouse – Fines Cleanout

Requirement: The permittee shall sequester or remove particulates collected by the control equipment to prevent wind-blown particulate emissions. Recycled baghouse fines shall be recycled into the drum mixer via a closed-loop system.

Monitoring: N/A

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Baghouse fines (particulates) are removed from the baghouse and cyclone by a screw conveyor. The removed fines are recycled into the asphalt production process via a closed loop system. Visible emissions from this system were not observed during this reporting period.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A607 Asphalt Production – Other

E. Asphalt Plant Production Rate (Unit TA-60-BDM)

Requirement: To avoid Compliance Assurance Monitoring (CAM) requirements under 40 CFR 64, the asphalt plant shall limit uncontrolled potential PM emissions by limiting asphalt production to less than or equal to 6,000 tons per year.

Monitoring: The permittee shall monitor the total daily production rate.

Recordkeeping: The permittee shall calculate a weekly rolling, 12-month total production rate and maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The asphalt plant production rate did not exceed 6,000 tons per year.

Monitoring: Asphalt production is monitored and recorded on a daily basis. The weekly rolling 12-month total is calculated and compared to the production limit set in this permit condition. Asphalt production amount is recorded daily in an operation log. The asphalt production rate for this certification period did not exceed 6,000 tons per year. The daily operation logs and 12-month rolling totals are provided in ATTACHMENT A607.E. Please note, the Asphalt Plant did not operate in July, August, and September, so no operation log is provided.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A607 Asphalt Production – Other

F. Asphalt Plant Operations – General

Requirement: The permittee shall:

1) Install, operate, and maintain equipment in accordance with standard operating procedures, and

2) equip and operate the asphalt processing equipment such as screens, conveyor belts, and conveyor transfer points with dust control systems to control particulate matter emissions, and

3) operate the Plant in accordance with NSR Permit GCP-3-2195G, Section III, A, B, C, D, E, F, and H.

4) Ensure that no visible emissions from the facility are observed crossing the perimeter of the restricted area for no more than 5 minutes during any 2 consecutive hours during facility operations.

Monitoring: The permittee shall perform all monitoring required under NSR Permit GCP-3-2195G.

Recordkeeping: The permittee shall maintain records of all standard operating procedures, records of all maintenance and/or replacement of dust control systems, and all records required under NSR Permit GCP-3-2195G, Section IV.B, and including records of actual hours of operation, records of all required monitoring, daily and weekly total asphalt production and the weekly rolling 12 month total production, number of haul truck trips daily including materials delivery and product, frequency of haul road sweeping, and copies of the applicant's proposed maintenance requirements and records demonstrating conformance with said requirements. The permittee shall maintain records of all compliance test results for total suspended particulates (TSP), particulate matter (PM10), nitrogen oxides, carbon monoxide, and records of all opacity/visible emissions observations performed.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement:

1) No new equipment was installed during this monitoring period. Operational and maintenance requirements are contained in internal plant procedures that are followed by plant operation staff.

2) Dust collection and control systems are in place on screens, conveyor belts, and transfer points to control particulate matter emissions.

3) The asphalt plant is operated in accordance with NSR Permit GCP-3-2195G, Section III A,B,C,D,E,F, and H.

4) Both EPA Reference Methods 9 and 22 are used at the plant to determine the extent of visible emissions. Fugitive dust emissions from the plant did not cross the property boundary or exceed the five (5) minute visible emissions limit during any two consecutive hours of operation. EPA Method 9 reports are in ATTACHMENT A607.C and EPA Method 22 reports are in ATTACHMENT A607.G. Please note, the Asphalt Plant did not operate in July, August, and September, so no opacity reading was taken.

Monitoring: Preventive maintenance records are included in ATTACHMENT A607.F.

Recordkeeping: Recordkeeping conditions are met using the following methods: Standard operating procedures are in place and available on site; maintenance and calibrations are performed annually. The maintenance inspection was last completed on December 2, 2020, and calibration completed on July 1, 2020 and August 13, 2020. The plant's operations logs contain the start time, stop time, daily and monthly hours of operation; asphalt production amounts; day when paved road was swept; and the number of truck trips. The rolling 12-month totals for production are calculated on the emissions calculation spreadsheet. The operation logs and rolling 12-month totals are provided in ATTACHMENT A607.E. Please note, the Asphalt Plant did not operate in July, August, and September, so no operation log is provided. Records located at the facility include fuel delivery tickets for fuel oil and asphalt oil, frequency of road sweeping, calibration procedures, and a procedure that outlines required maintenance.

All compliance test results have been provided to NMED and are available on site.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A607 Asphalt Production – Other

G. Asphalt Plant Fugitive Dust

Requirement: Fugitive dust emissions from asphalt processing equipment, including the system used to recycle fabric filter fines, shall exhibit no more than five (5) minutes of visible emissions during any two consecutive hours. This condition does not apply to fugitive dust emissions from other support operations such as storage piles, front end loaders, or materials handling around the asphalt process equipment.

Monitoring: The permittee shall perform a Method 22 test at least once per month on all screens, conveyor drop points, and hoppers during the months the asphalt plant operates. The duration of the test shall be a minimum of ten (10) minutes. If visible emissions are observed for more than two (2) minutes, the Method 22 test shall continue for two (2) hours or until scheduled operation of the plant ends.

Recordkeeping: The permittee shall maintain records of all equipment standard operating procedures, records of all maintenance and/or replacement of dust control systems, results of all visible emissions observations, and all records required under NSR Permit GCP-3-2195G.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: The asphalt plant did not emit fugitive dust that exceeded five (5) minutes of visible emissions during any two (2) consecutive hours in this reporting period.

Monitoring: EPA Method 22 tests are performed once per month when the plant operates. The EPA Method 22 readings for this monitoring period are provided in ATTACHMENT A607.G. Please note, the Asphalt Plant did not operate in July, August, and September, so no opacity reading was taken. LANL has certified visible emission (opacity) readers on-site who perform monthly ten (10) minute readings using 40 CFR Part 60, Appendix A, Reference Method 22 to determine compliance with the opacity limitation. No visible emissions exhibited an opacity of 20% or greater during this reporting period.

Recordkeeping: The standard operating procedure, maintenance and repair records, and visible emissions observations are maintained at the plant site. All other records required under the NSR permit are also available on site.

Reporting: Emissions and monitoring reports are submitted on a six-month basis, and compliance certification on an annual basis, in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A707 Other – Beryllium Activities

A. Operational Requirements – Beryllium Activities

Source	Operating Requirements	Process Limits	Control Equipment Requirements
Sigma Facility TA-3-66	Beryllium operations will consist of registered metallographic operations, electroplating /chemical milling, and relocated machining, and arc melting/casting sources.	None	Metallographic operations and electroplating /chemical milling operations shall be conducted in aqueous solution or lubricant bath. Emissions from machining and arc melting/casting operations shall be exhausted through a HEPA filtration system prior to entering the atmosphere.
Beryllium Technology Facility TA-3-141	The continuous emission monitor will be maintained in accordance with the Laboratory's quality program.	Beryllium processed by the facility will not exceed 10,000 pounds per calendar year. Beryllium processed by the facility will not exceed 1000 pounds per day.	All processes shall be exhausted through a HEPA filtration system prior to entering the atmosphere. Powder operations, other than closed glovebox operations, and machining operations, other than the processes used in metallographic preparation shall be exhausted through a cartridge filtration system then through the HEPA filtration system. Metallographic preparation activities shall be conducted in lubricating baths or equivalent. (NSR permit 634-M2)
Target Fabrication Facility TA-35-213	Beryllium operations will consist of only beryllium machining and associated cleanup activities.	None	All processes shall be exhausted through a HEPA filtration system prior to entering the atmosphere.
Plutonium Facility TA-55-PF4	Regulated beryllium activities will be ducted through the pollution control equipment and out the north or south stack of PF-4. (NSR Permit 1081-M1-R3, Specific Condition 1.b., partial, revised) The electric furnace	44 pounds of beryllium (20 kg) in any 24 hour period; 1100 pounds/year (500 kg/year) using a rolling total. (NSR Permit 1081-M1-R3, Specific Condition 1.c.)	Weld cutting, weld dressing, metallography, and electric furnace operations shall be controlled with 4 HEPA filters with a control efficiency of 99.95% each. (NSR Permit 1081-M1-R1, Condition 3, partial, revised) The non-accessible filters shall be replaced when the pressure drop across the filter either falls to levels

	shall be enclosed in a glove box, have a maximum operating temperature of 1600 degrees centigrade, and an inside volume space less than 1.1 cubic feet. (NSR Permit 1081-M1-R6, Specific Condition 1.d., partial, revised)		indicating filter breakthrough or increases to levels indicative of excessive loading. (NSR Permit 1081-M1-R1, Condition 3, partial, revised)

B. Emissions Monitoring Requirements – Beryllium Activities

Source	Monitoring Requirements
Sigma Facility TA-3-66	A log shall be maintained during operations, which shows the number of metallographic specimens used in the metallographic operation and the weight or volume of Be samples processed in the electroplating/chemical milling, machining, and arc melting/casting operations.
Beryllium Technology Facility TA-3-141	Facility exhaust stack will be equipped with a continuous emission monitor used to measure beryllium emissions. Cartridge and HEPA filters shall be equipped with differential pressure gauges that measure the differential pressure across the cartridge and HEPA filters while the exhaust fans are in operation. (NSR permit 634-M2)
Target Fabrication Facility TA-35-213	Records of the stack emission test results (see Condition 2 of NSR Permit No. 632) and other data needed to determine total emissions shall be retained at the source and made available for inspection by the Department.
Plutonium Facility TA-55-PF4	The HEPA filtration systems shall be equipped with a differential pressure gauge that measures the differential pressure (inches of water) across the HEPA filters while the exhaust fans are in operation. (NSR Permit 1081-M1-R3, Condition 11) Control efficiency shall be verified by daily HEPA filter pressure drop tests and annual HEPA filter challenge tests of accessible filters. (NSR Permit 1081-M1-R1, Condition 3, partial, revised) The furnace temperature shall be continuously monitored and the flow rate from the glove box containing the furnace shall be measured once during each metal melt operation. (NSR Permit 1081-M1-R6, Condition 11, revised)

C. Recordkeeping Requirements – Beryllium Activities

Source	Recordkeeping Requirements
Sigma Facility TA-3-66	Recordkeeping for this source is specified in Condition A707.B.
Beryllium Technology Facility TA-3-141	Generate and maintain beryllium inventory records to demonstrate compliance with the 10,000 pounds of beryllium per calendar year and the 1000 pounds of beryllium per day processing limit. Record pressure drop across the cartridge and HEPA filters once per day that the exhaust fans are in operation and the facility is occupied. Record control equipment maintenance and repair activities. (NSR permit 634-M2)
Target Fabrication Facility TA-35-213	Recordkeeping for this source is specified in Condition A707.B.
Plutonium Facility TA-55-PF4	Stack emission test results and facility operating parameters including a daily record of the pressure drop measured across each appropriate HEPA plenum filtration stage, when the exhaust fans are operating. (NSR Permit 1081-M1-R3, Condition 9, partial, revised) A copy of the annual HEPA test, a log of the daily pressure drop readings and a control equipment maintenance log shall be kept. This documentation shall be provided upon request. (NSR Permit 1081-M1-R1, Condition 3, partial, revised) A log of the filter replacement shall be kept and shall be made available to the Department personnel upon request. (NSR Permit 1081-M1-R1, Condition 3, partial, revised) The permittee shall keep records of the number and weight of classified parts processed during a 24-hour period and year using a rolling total. Records shall be made available to properly cleared Department personnel upon request. (NSR Permit 1081-M1-R3, Condition 9, partial, revised) The permittee shall for each use of the furnace record the following operating parameters: metal type, theoretical melting point of the metal, metal melt duration once melting is commenced, maximum furnace temperature and glove box flow rate. (NSR Permit 1081-M1-R6, Condition 9, partial, revised) A record of the furnace's internal volume shall be maintained at the facility.

	(NSR Permit 1081-M1-R6, Condition 9, partial, revised)

D. Reporting Requirements – Beryllium Activities

Source	Reporting Requirements
Sigma Facility TA-3-66	The permittee shall submit reports described in Section A109 and in accordance with Section B110.
Beryllium Technology Facility TA-3-141	Anticipated date of initial startup of each new or modified source not less than thirty (30) days prior to the date. Actual date of initial startup of each new or modified source within fifteen (15) days after the startup date. Provide the date when each new or modified emission source reaches the maximum production rate at which it will operate within fifteen (15) days after that date. Notify the Department within 60 days after each calendar quarter of the facility's compliance status with the permitted emission rate from the continuous monitoring system. Provide any data generated by activities described in the Quality Assurance Project Plan (QAPP) that will assist the Air Quality Bureau's Enforcement Section in determining the reliability of the methodology used for demonstrating compliance with the permitted emission rate within 45 days of such a request. The permittee shall submit reports described in Section A109 and in accordance with Section B110.
Target Fabrication Facility TA-35-213	The permittee shall submit reports described in Section A109 and in accordance with Section B110.
Plutonium Facility TA-55-PF4	Stack emission test results and facility operating parameters will be made available to Department personnel upon request. Reports may be required to be submitted to the Department if inspections of the source indicate noncompliance with this permit or as a means of determining compliance. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☒ **Yes** **Date report submitted:** August 4, 2020; October 28, 2020 **Tracking Number:** Activity No.: 000856-08042020-01; Activity No.: 000856-10282020-01

☐ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: A707.A Operational Requirements - Beryllium Activities:

TA-3-66 Metallographic operations and electroplating/chemical milling operations are conducted in aqueous solution or lubricant bath. Emissions from machining and arc melt/casting operations are exhausted through a HEPA filtration system prior to entering the atmosphere.

TA-3-141 The continuous emission monitor is maintained in accordance with LANL's quality program. Beryllium

processing records are available on-site for inspection. No process limits were exceeded during this reporting period.

All processes are exhausted through a HEPA filtration system prior to entering the atmosphere. Powder operations, other than closed glovebox operations, and machining operations, other than the processes used in metallographic preparation, are exhausted through a cartridge filtration system and then through the HEPA filtration system. Metallographic preparations are conducted in lubricating baths or equivalent.

TA-35-213 All processes are exhausted through a HEPA filtration system prior to entering the atmosphere. Beryllium operations consist of only beryllium machining and associated cleanup activities.

TA-55-PF4 All beryllium activities are ducted through the facility's pollution control equipment and out the north or south stack of PF-4. Weld cutting, weld dressing, and metallography operations are controlled using four (4) HEPA filters with a control efficiency of 99.95% each. The non-accessible filter is replaced when the pressure differential across the filter indicates breakthrough or excessive loading.

No process limits were exceeded during this reporting period.

The electric furnace did not operate during this reporting period.

A707.B - Emissions Monitoring Requirements - Beryllium Activities:

TA-3-66 Log books are maintained for the number of metallographic specimens used in the metallographic operation and the weight or volume of samples processed in the electroplating/chemical milling, machining, and arc melting/casting operations. The log books are kept on-site and are available for inspection. Data from the log books are included in ATTACHMENT A707.B.a.

TA-3-141 The facility exhaust stack has a built-in sampling system used to continuously sample beryllium emissions. Cartridge and HEPA filters are equipped with differential pressure gauges that measure differential pressure when exhaust fans are operating.

TA-35-213 A copy of stack emission test results as well as other data needed to determine total emissions are retained at the source and are available for inspection. Log books documenting beryllium processing are on-site and are available for inspection. Data from the beryllium processing logs are included in ATTACHMENT A707.B.b.

TA-55-PF4 The HEPA filtration system contains a differential pressure gauge that measures differential pressure across the HEPA filters while the exhaust fans are in operation. The control efficiency is verified by daily HEPA filter pressure drop tests. Annual HEPA filter challenge tests are performed to verify filter control efficiency. The HEPA filter challenge tests are included in ATTACHMENT A707.C.b.

The electric furnace did not operate during this reporting period.

A707.C Recordkeeping Requirements - Beryllium Activities:

TA-3-66 Recordkeeping for this source is specified in Condition A707.B.

TA-3-141 Inventory records are maintained to demonstrate compliance with beryllium process limits. Records of pressure drop across the cartridge and HEPA filters are performed daily when the exhaust fans are in operation and the facility is occupied. Control equipment maintenance and repair activities are recorded. HEPA filter differential pressure readings are included in ATTACHMENT A707.C.a.

TA-35-213 Recordkeeping for this source is specified in Condition A707.B.

TA-55-PF4 A copy of the stack emission test results are retained at the source and available for inspection. HEPA filter challenge tests are performed annually. Daily differential pressure readings are provided in ATTACHMENT A707.C.c. Filter replacement and control equipment maintenance and repair records are kept and available on site for inspection. Process records are available that contain the number and weight of classified parts processed during a 24-hour period and annual rolling total.

The electric furnace did not operate during this reporting period.

A707.D Reporting Requirements - Beryllium Activities:

For all beryllium sources, reports are submitted in accordance with permit conditions A109 and in accordance B110. For more information, see Section A605 in this report.
There were no new or modified emission sources during the reporting period.
TA-3-141 Quarterly beryllium reports, containing continuous monitoring system data from the Beryllium Technology Facility, are also submitted to NMED. Reports during this reporting period were submitted within 60 days following each calendar quarter. The reports were submitted on August 4, 2020 for 2020Q2 (Activity No.: 000856-08042020-01) and October 28, 2020 for 2020Q3 (Activity No.: 000856-10282020-01).

A805 Fuel Sulfur Requirements – External Combustion

A. All Boilers and Heaters (except Units RLUOB-BHW-1 through -4)

Requirement: All boilers and heaters, except Units RLUOB-BHW-1 through -4 and the Power Plant addressed in Section A1300 shall combust only natural gas containing no more than 2 grains of total sulfur per 100 dry standard cubic feet.

Monitoring: None.

Recordkeeping: The permittee shall demonstrate compliance with the natural gas limit on total sulfur content by maintaining records of a current, valid purchase contract, tariff sheet or transportation contract for the gaseous fuel, or fuel gas analysis, specifying the allowable limit or less. If fuel gas analysis is used, the analysis shall not be older than one year.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: A natural gas transportation contract is in place, and states that gas provided to LANL

will be pipeline quality and contain no more than three quarters (3/4) grains of total sulfur per one hundred (100) dry standard cubic feet.

Recordkeeping: A copy of LANL's natural gas transportation contract is maintained on-site.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A805 Fuel Sulfur Requirements – External Combustion

B. Units RLUOB-BHW-1 through -4

Requirement: Units RLUOB-BHW-1 through -4 shall combust either natural gas containing no more than 2.0 grains of total sulfur per 100 dry standard cubic feet or No. 2 fuel oil containing no more than 0.5 wt% total sulfur. (NSR Permit 2195N-R2, Specific Condition 1.c.)

Monitoring: None.

Recordkeeping: The permittee shall demonstrate compliance with the natural gas limit and/or fuel oil limit on total sulfur content by maintaining records of a current, valid purchase contract, tariff sheet or transportation contract for the gaseous or liquid fuel, or fuel analysis, specifying the allowable limit or less. If a fuel analysis is used, the analysis shall not be older than one year. (NSR Permit 2195N-R2, Specific Condition 3.c., revised) Alternatively, compliance may be demonstrated by keeping a receipt or invoice from a commercial fuel supplier with each fuel delivery, which shall include the delivery date, the fuel type delivered, and amount of fuel delivered, and the maximum sulfur content of the fuel.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: A natural gas transportation contract is in place, and states that gas provided to LANL will be pipeline quality and contain no more than three quarters (3/4) grains of total sulfur per one hundred (100) dry standard cubic feet.

Fuel oil is under a purchase contract and only Ultra Low Sulfur Diesel (ULSD) is delivered to the facility.
ULSD contains less than 0.0015 wt% total sulfur.

Recordkeeping: A copy of the transportation contract and purchase contract are maintained on-site. No fuel oil was purchased for the RLUOB boilers during this reporting period.

Reporting: Emissions and monitoring reports are submitted on a six-month basis, and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A806 20.2.61 NMAC Opacity – External Combustion

A. All Boilers and Heaters (except Units RLUOB-BHW-1 through -4)

Requirement: Exhaust emissions from these external combustion sources shall not exceed 20% opacity averaged over a 10-minute period.

Monitoring: Use of natural gas fuel meeting the requirement at Condition A805.A constitutes compliance with 20.2.61 NMAC unless opacity exceeds 20% averaged over a 10-minute period. When any visible emissions are observed during steady state operation and are determined to be not due to condensed water vapor only, opacity shall be measured over a 10-minute period, in accordance with the procedures at 40 CFR 60, Appendix A, Method 9 as required by 20.2.61.114 NMAC.

Recordkeeping: The permittee shall record dates of any opacity measurements and the corresponding opacity readings.

Reporting: The permittee shall report dates of any opacity measurements and the corresponding opacity readings. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: LANL has certified visible emission readers on-site who perform observations using 40 CFR 60, Appendix A, Method 9 to determine compliance with the opacity limitation. No visible emissions were observed during steady state operations during this reporting period.

Monitoring: Use of natural gas for combustion meets the requirement of Condition A805.A.

Recordkeeping: A standard form is used for all opacity measurements. The form includes the date of measurement and opacity observed. Opacity readings were not required during this reporting period. See ATTACHMENT A806.A.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A806 20.2.61 NMAC Opacity – External Combustion

B. Units RLUOB-BHW-1 through -4: Natural Gas-Fired

Requirement: Exhaust emissions from these external combustion sources shall not exceed 20% opacity averaged over a 10-minute period.

Monitoring: Use of natural gas fuel meeting the requirement at Condition A805.A constitutes compliance with 20.2.61 NMAC unless opacity exceeds 20% averaged over a 10-minute period. When any visible emissions are observed during steady state operation and are determined to be not due to condensed water vapor only, opacity shall be measured over a 10-minute period, in accordance with the procedures at 40 CFR 60, Appendix A, Method 9 as required by 20.2.61.114 NMAC.

Recordkeeping: The permittee shall record dates of any opacity measurements and the corresponding opacity readings.

Reporting: The permittee shall report dates of any opacity measurements and the corresponding opacity readings. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: LANL has certified visible emission readers on-site who perform observations using 40 CFR 60, Appendix A, Method 9 to determine compliance with the opacity limitation. No visible emissions were observed during steady state operations during this reporting period.

Monitoring: The natural gas used by these units meets the requirement of Condition A805.A.

Recordkeeping: A standard form is used for all opacity measurements. The form includes the date of measurement and opacity observed. No opacity readings were required during this reporting period.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A806 20.2.61 NMAC Opacity – External Combustion

C. Units RLUOB-BHW-1 through -4: Fuel Oil-Fired

Requirement: Exhaust emissions from these external combustion sources shall not exceed 20% opacity averaged over a 10-minute period.

Monitoring: The permittee shall perform a least one (1) opacity observation each day that fuel oil is used to fire any of Units RLUOB-BHW-1 through -4. Opacity shall be measured over a 10-minute period, in accordance with the procedures at 40 CFR 60, Appendix A, Method 9 as required by 20.2.61.114 NMAC. (NSR Permit 2195N-R2, Specific Condition 3.d., revised)

Recordkeeping: The permittee shall record dates of any opacity measurements and the corresponding opacity readings. (NSR Permit 2195N-R2, Specific Condition 4.b., revised)

Reporting: The permittee shall report dates of any opacity measurements and the corresponding opacity readings. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: LANL has certified visible emission readers on-site who perform observations using 40 CFR 60, Appendix A, Method 9 to determine compliance with the opacity limits.

Monitoring: No fuel oil was used in these units during this reporting period. No opacity measurements were taken during this reporting period.

Recordkeeping: The opacity form includes the date of measurement and opacity observed. No fuel oil was burned during this reporting period, and therefore, no opacity readings were taken and no records were generated. See ATTACHMENT A806.C. for details.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A807 Other – External Combustion

A. Natural Gas Fuel Usage (Sources listed in Table 800.A except RLUOB-BHW-1 through -4)

Requirement: The combined natural gas fuel usage shall be limited to 870 MMscf/y. This limitation shall apply to all boilers and heaters listed in Table 800.A except Units RLUOB-BHW-1 through -4, but including all other boilers and heaters at the Facility that qualify as Title V Insignificant Activities.

Monitoring: The permittee shall monitor the monthly total volumetric flow of natural gas to Units TA-55-6-BHW-1 and TA-55-6-BHW-2 through use of a totalizing flow meter.

Recordkeeping: The permittee shall:

1) Calculate the monthly rolling 12-month total natural gas fuel usage for the emission units listed in Table 800.A except Units RLUOB-BHW-1 through -4.

2) Calculate the actual emissions rate for the emission units listed in Table 800.A except Units RLUOB-BHW-1 through -4. The calculation shall be based on the actual fuel usage of Units equipped with individual flow meters and the Facility-Wide metered or estimated natural gas usage.

3) Calculate the semiannual and annual total emissions rate (tons/year) for this source category and compare them to the emission limits in Table 802.A. The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: For units listed under this permit condition, a 12-month rolling total of natural gas used is calculated and recorded each month. The rolling total is compared to the fuel use limit each month. Natural gas usage limits were not exceeded during this reporting period. Natural gas usage and rolling totals are provided in ATTACHMENT A807.A.

Monitoring: Units TA-55-6-BHW-1 and TA-55-6-BHW-2 have volumetric flow meters in place to monitor monthly natural gas use. Fuel use information for the TA-55 units listed in this condition is included in ATTACHMENT A807.A.

Recordkeeping:

1) Monthly rolling 12-month total natural gas fuel use is calculated for the permitted units listed in Table 800.A.

2) The actual emission rate is calculated for the units listed in Table 800.A. This calculation uses actual fuel use data from individual unit flow meters and facility wide metered natural gas.

3) The emissions rate is calculated every six months and annually for this source category, and compared to the permit limits. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A807 Other – External Combustion

B. Natural Gas and Fuel Oil Usage (Units RLUOB-BHW-1 through -4)

Requirement: The permittee shall comply with the emission limits in Table 802.B for each fuel type.

Monitoring: The permittee shall:

1) Monitor the monthly total volumetric flow of natural gas to Units RLUOB-BHW-1 through -4 using a totalizing flow meter. (NSR Permit 2195N-R2, Specific Condition 3.a., partial, revised)

2) Monitor the daily fuel oil consumption during which any of the 4 RLUOB boilers are fired with this fuel type. (NSR Permit 2195N-R2, Specific Condition 3.a, partial, revised)

3) Monitor the hours of operation for each boiler when fired on fuel oil and during non-emergency maintenance and readiness testing.

Recordkeeping: The permittee shall:

1) Calculate and record the annual fuel oil usage for Units RLUOB-BHW-1 through -4 as a daily rolling 365-day total.

2) Calculate and record the semiannual and calendar year total emissions rate (tons/year) for each fuel type and for the combination of both fuels compare to the emission limits in Table 802.B.

3) Record the annual hours of operation of each boiler when fired on fuel oil during non-emergency maintenance and readiness testing and compare to the limitation at Condition A804.B.

4) The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The initial compliance test was used to demonstrate compliance with the emission limits for natural gas use. Vendor data are also used to determine compliance with emission limits for fuel oil and natural gas. All concentrations and emission rates were below permitted limits in Table 802.B.

Monitoring:

1) A totalizing flow meter is in place and measures natural gas used by the RLUOB boilers. The natural gas fuel use data is provided in ATTACHMENT A807.A.

2) Daily fuel oil consumption is monitored by facility personnel using meter readings from each boiler. No fuel oil was burned during this reporting period. See ATTACHMENT A807.B for details.

3) The hours of operation of each boiler are recorded by facility personnel each time a boiler is run on fuel oil. The purpose of running the boilers is also recorded.

Recordkeeping:

1) Annual fuel oil usage is calculated and recorded on a daily rolling 365-day total. No fuel oil was burned during this reporting period.

2) The emissions rate is calculated on a six-month and annual basis for each fuel type and for both fuels combined. Emissions are compared to permit limits and data are provided to NMED in accordance with permit condition A109.

3) Annual hours of operation for each boiler are recorded when fired on fuel oil during non-emergency use.
The total hours are compared to the hour limit in permit condition A804.B. No fuel oil was used during this certification period and no records were generated.
4) Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A807 Other – External Combustion

C. 40 CFR 60, Subpart Dc (Units TA-55-6-BHW-1, TA-55-6-BHW-2, RLUOB-BHW-1 through -3)

Requirement: The units are subject to 40 CFR 60, Subpart Dc and the permittee shall comply with the following applicable requirements:

1. When combusting oil in the affected boilers, meet the 0.5 weight percent fuel sulfur standard in 40 CFR 60.42c(d). This standard applies at all times per §60.42c(i). The permittee shall demonstrate compliance per the requirements of §60.42c(h).

Monitoring: The permittee shall comply with the fuel supplier certification requirements in 40 CFR 60.46c(e). The permittee shall monitor fuel usage to meet the recordkeeping requirements of 40 CFR 60.48c(g).

Recordkeeping: The permittee shall comply with the recordkeeping requirements of 40 CFR 60.48c(c), (f) and (g) 40 CFR 60.7(b) and (f) and maintain the records according to §60.48c(i) except when records are required to be maintained for a longer time period in accordance with Section B109.

Reporting: The permittee shall comply with the initial notification requirements of 40 CFR 60.48c(a) and 40 CFR 60.7(a)(1), (a)(4) and (g) and the periodic reporting requirements of 40 CFR 60.48c(b), (d), (e)(11) and (f). Reports shall be submitted according to §60.48c(j). The reporting period may be modified to coincide with the Semi-Annual reporting period in Section A109. The permittee shall report in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Units TA-55-6-BHW-1, TA-55-6-BHW-2, RLUOB-BHW-1, RLUOB-BHW-2, and RLUOB-BHW-3 meet the requirements of 40 CFR Part 60, Subparts A and Dc. Notification requirements were met through source startup notifications and initial permit applications.

Monitoring: The amount of fuel oil combusted is monitored and recorded on a monthly basis. Fuel sulfur requirements are tracked and addressed in a fuel oil purchase contract, delivery receipts, and the natural gas transportation contract. No fuel oil was purchased during this reporting period.

Recordkeeping: Fuel sulfur content information and fuel use records are maintained on site for at least five (5) years as required by the operating permit.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on

an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A807 Other – External Combustion

D. 40 CFR 60, Subpart Dc (New Unit RLUOB-BHW-4)

Requirement: This unit is subject to 40 CFR 60, Subpart Dc and the permittee shall comply with the following applicable requirements:

1. When combusting oil in the affected boilers, meet the 0.5 weight percent fuel sulfur standard in 40 CFR 60.42c(d), and (g). This standard applies at all times per §60.42c(i). The permittee shall demonstrate compliance per the requirements of §60.42c(h).
2. For new boiler RLUOB-BHW-4, the permittee shall demonstrate initial compliance with the SO2 standard through a certification from the fuel supplier per 40 CFR 60.44c(h).

Monitoring: The permittee shall comply with the fuel supplier certification requirements in 40 CFR 60.46c(e). The permittee shall monitor fuel usage to meet the recordkeeping requirements of 40 CFR 60.48c(g).

Recordkeeping: The permittee shall comply with the recordkeeping requirements of 40 CFR 60.48c(c), (f) and (g) and 40 CFR 60.7(b) and (f) and maintain the records according to §60.48c(i) except when records are required to be maintained for a longer time period in accordance with Section B109.

Reporting: The permittee shall comply with the initial notification requirements of 40 CFR 60.48c(a) and 40 CFR 60.7(a)(1), (a)(3) and (g) and the periodic reporting requirements of 40 CFR 60.48c(b), (d), (e)(11) and (f). Reports shall be submitted according to §60.48c(j). The reporting period may be modified to coincide with the Semi-Annual reporting period in Section A109.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: LANL purchases only fuel oil with ultra low sulfur content; fuel oil was not used during this reporting period. See ATTACHMENT 807.C.& D. for details.

RLUOB-BHW-4 has not been installed. When installed, the requirement, monitoring, recordkeeping, and reporting will be conducted in accordance with the requirements listed in the current permit.

A807 Other – External Combustion

E. Initial Compliance Testing (Units RLUOB-BHW-4)

Requirement: Initial compliance tests are required for boiler, Unit RLUOB-BHW-4. The tests shall be conducted for NOx and CO while burning natural gas fuel only. This condition applies only if boiler Unit RLUOB-BHW-4 is not an identical make and model to boiler units RLUOB-BHW-1 through -3. (NSR Permit 2195N-R2, Specific Condition 6.a., revised)

Monitoring: The permittee shall conduct EPA Method tests for CO and NOx within six (6) months of any new boiler start up. Method 19 may be used for determining stack flow rates. This requirement supersedes Condition B111.A(2). Initial compliance testing shall be conducted in accordance with Section B111.

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall report in accordance with Section B110 and Section B111.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Unit RLUOB-BHW-4 has not been installed. When installed, the requirement, monitoring, recordkeeping, and reporting will be conducted in accordance with the requirements listed in the current permit. See ATTACHMENT A807.E. for details.

A807 Other – External Combustion

F. Operational Inspection (Sources listed in Table 800.A)

Requirement: Compliance with the allowable emission limits in Table 802.A shall be demonstrated by performing periodic inspections to ensure proper operations.

Monitoring: The permittee shall conduct annual operational inspections to determine that the boilers are operating properly. The operational inspections shall include operational checks for indications of insufficient excess air, or too much excess combustion air. These operational checks shall include observation of common physical indications of improper combustion, including indications specified by the boiler manufacturer, and indications based on operational experience with these units.

Recordkeeping: The permittee shall maintain records of operational inspections, describing the results of all operational inspections noting chronologically any adjustments needed to bring the boilers into compliance. The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall report in accordance with Section B110.

Within ninety (90) days of permit issuance, the permittee shall submit for Department approval a procedure which the permittee will use to carry out the operational inspections. The permittee may at any time submit revisions for Department approval.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement/Monitoring: LANL conducts annual operational inspections and preventive maintenance on the permitted boilers listed in the current permit to ensure proper operations.

Recordkeeping: The records of operational inspections and preventive maintenance are maintained in the compliance folders and e-files stored on air quality servers. Copies of annual inspections for 2020 are included in ATTACHMENT A807.F.a.

Reporting: LANL submitted two procedures that are used to carry out the operational inspections: "Preventive Maintenance Instruction (PMI) 403-A.006: Hot Water Boiler Annual Fireside/Waterside Inspection and Maintenance" for boilers at TA-53 and TA-55 and "Maintenance Procedure UI-PROC-76-28-010: TA-09/16 Steam Plants – Annual Boiler Waterside/Fireside Checklist" for boilers located at TA-16. The procedures were submitted to NMED AQB on May 14, 2015 (SBR20150006) within 90 days after permit P100-R2 issuance. Revisions were last made to PMI 403-A.006 on October 24, 2018, and to Maintenance Procedure UI-PROC-76-28-010 on April 10, 2019. No revisions were made to these procedures during this reporting period. See ATTACHMENT A807.F.b.

A907 Other – Chemical Usage

A. Emission calculations (Unit LANL-FW-CHEM)

Requirement: The permittee shall comply with the facility-wide VOC and HAP emission limits at Table 106.B.

Monitoring: The permittee shall monitor facility-wide chemical purchasing and site location using an electronic chemical tracking system. The quantity of chemicals that are vented to the atmosphere shall be estimated on a semi-annual basis, and categorized as VOC, HAP, or a combination of these categories.

Recordkeeping: The permittee shall record the quantity of total VOC emitted and the quantity of each individual and total HAPs on a semi-annual basis. These records shall be maintained in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110. With respect to individual HAPs, reports shall include any HAP emitted in a quantity greater than 0.5 tons per year.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☒ **Yes** **Date report submitted:** September 11, 2020 **Tracking Number:** SBR20200006

☐ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Facility-wide emissions did not exceed the VOC or HAP emission limits in Table 106.B.

Monitoring/Recordkeeping: Facility-wide chemical purchases are monitored using ChemDB, an electronic chemical tracking system. The chemical purchase information is used to calculate emissions. Chemical emission information is submitted to NMED every six months in accordance with permit condition A109.B. The semi-annual emissions report for January 1 - June 30, 2020 was submitted to NMED on September 11, 2020 (SBR20200006), within 90 days of the end of the reporting period. Records of chemical purchases for this monitoring period are provided in ATTACHMENT A907.A.

Reporting: Facility-wide VOC and HAPs emissions are calculated, recorded, and reported on a six-month basis in accordance with permit conditions A109.B, B109, and B110. The semi-annual emissions report includes individual HAPs emitted in a quantity greater than 0.5 tons per year.

A907 Other – Chemical Usage

B. Emission calculations (Unit RLUOB-CHEM)

Requirement: The permittee shall comply with the source-specific VOC emission limit at Table 902.A and the facility-wide VOC and HAP emission limits at Table 106.B. (NSR Permit 2195N-R2, Specific Condition 2.a., revised)

Monitoring: The permittee shall monitor chemical purchasing for the RLUOB-CHEM facility using an electronic chemical tracking system. The quantity of chemicals that are vented to the atmosphere shall be estimated on a monthly basis, and categorized as VOC, HAP, TAP, or a combination of these categories. (NSR Permit 2195N-R2, Specific Condition 4.c., revised)

Recordkeeping: The permittee shall record the quantity of total VOC and TAP, each individual HAP,and the total HAPs emitted on a monthly rolling, 12-month total basis. These records shall be maintained in accordance with Section B109. (NSR Permit 2195N-R2, Specific Condition 4.c., revised)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110. With respect to individual HAPs, reports shall include any HAP emitted in a quantity greater than 0.5 tons per year.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Source specific VOC and facility-wide VOC and HAP emissions are in compliance with emission limits set in Tables 902.A and 106.B in NSR Permit 2195N-R2.

Monitoring: Chemical purchasing for the RLUOB-CHEM facility are monitored using ChemDB, an electronic chemical tracking system. Records of chemical purchases for the reporting period are provided in ATTACHMENT A907.B.a. The quantities of chemicals that are vented to the atmosphere are estimated on a monthly basis and are categorized as VOC, HAP, TAP, or a combination of these categories. The quantities of chemicals for this reporting period are provided in ATTACHMENT A907.B.b.

Recordkeeping: The quantity of total VOC and TAP, individual HAP, and the total HAPs emitted are recorded on a monthly rolling, 12–month total basis. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. The semi-annual emission report includes individual HAPs emitted in a quantity greater than 0.5 tons per year. For more information, see comments in Section A605 of this report.

A1007 Other – Degreasers

A. Operational Requirements (Degreasers)

Requirement: The permittee shall comply with the applicable requirements according to 40 CFR 63, Subpart T, including, but not limited to:

1) Ensure the degreaser is closed with a tight fitting cover whenever not in use, and
2) Maintain a freeboard ratio of 0.75 or greater, and
3) Collect and store all waste solvent and wipe rags in closed containers, and
4) Perform flushing within the freeboard area only, and
5) Allow cleaned parts to drip for 15 seconds or until dripping stops, and
6) Do not exceed the fill line on the solvent level, and
7) Wipe up spills immediately, and
8) Do not create observable splashing with agitation device, and
9) Ensure that the degreaser is not exposed to drafts greater than 40 meters/min, and
10) Do not clean sponges, fabric, wood, or paper.

Monitoring: The permittee shall monitor and record the amount of solvent added to the degreaser.

Recordkeeping: The permittee shall:

1) Calculate the actual emissions rate (pounds/month) of VOC and HAPs based on the quantity of solvent lost to evaporation on a monthly basis.
2) Calculate the semi-annual emissions rate (tons/year) for this source category and add to the facility-wide emission rates in Table 106.B.
3) Maintain records of the degreaser solvent content and quantity added and work practice checklists.
4) The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: An exemption notice was submitted on April 9, 2018 and was approved by NMED on May 8, 2018 for a non-halogenated solvent to be used in the degreaser. LANL intends to keep the flexibility to use the halogenated solvent in the future and therefore is continuing to comply with all permit requirements, regardless of which solvent is being used.

Requirement:

1) The degreaser is kept closed with a tight fitting cover when it is not being used.

2) A freeboard ratio of 0.75 or greater is maintained.

3) All waste solvent and solvent contaminated wipe rags are collected and stored in closed containers.

4) Flushing operations are performed only within the freeboard area.

5) Cleaned parts are allowed to drip for 15 seconds or until dripping stops.

6) The fill line has not been exceeded.

7) Spills are wiped up immediately.

8) Administrative controls are in place to prevent observable splashing with an agitation device.

9) The degreaser is located in a glove box with a set ventilation flow rate. Exhaust flows do not exceed 40 meters/min.

10) Sponges, fabric, wood, or paper are not cleaned in the degreaser.

Monitoring and Recordkeeping: A Degreaser Recordkeeping database is used to track the amount of degreaser solvent added, removed, and lost. This system is used to calculate emissions. The "Degreaser Solvent Usage" report for this period is provided in ATTACHMENT A1007.A.a.

1) The actual emission rate (pounds/month) of VOC and HAPs is automatically calculated by the database when data is entered on a monthly basis.

2) The semi-annual emissions (tons/year) are also calculated by the database. These emissions are included in the facility-wide totals.

3) Checklists for work practice standards have been completed for this reporting period. Records of solvent content and quantity added are maintained on site. A copy of the work practice checklists are provided in ATTACHMENT A1007.A.b.

4) Records for this source category are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1104 Operational Limitations – Internal Combustion

A. Hours of Operation and Emission Limits for Unit TA-33-G-1P

Requirements:

1) Unit TA-33-G-1P is limited to eight (8) hours of daily operation at full capacity. Operation shall occur between the hours of 7:00 AM and 5:00 PM. (NSR Permit 2195F-R4, Condition A1104.A)

2) Unit TA-33-G-1P is limited to the emissions limits stated in Table 1102.A. (NSR Permit 2195F-R4, Condition A1104.A)

Monitoring: The permittee shall monitor the time(s) of operation each day, and the daily and monthly rolling 12-month total hours of operation for Unit TA-33-G-1P using a non-resettable hour meter. Hours that do not represent hours the unit is operated at the TA-33 site may be monitored separately for subsequent subtraction from the daily and monthly rolling 12-month totals

Recordkeeping: The permittee shall maintain the following records and in accordance with Section B109:

1) The permittee shall keep records of the time(s) of operation each day, and the daily, monthly, and the monthly rolling 12-month total hours of operation of the genset listed above, as indicated on the non-resettable hour meter. The permittee may record and subtract hours of operation that do not represent operating hours at the TA-33 site.

2) The permittee shall calculate the annual emissions of all criteria and hazardous air pollutants from Unit TA-33-G-1P. The permittee may subtract emissions that are not the result of operations at TA-33.

Reporting: The permittee shall submit reports in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Unit TA-33-G-1P operated for 301.7 hours of emergency use and 1.6 hours of maintenance and readiness testing, for a total of 303.3 hours during this reporting period. Emissions are lower than the limits stated in Table 1102.A. in NSR permit 2195F-R4.

Monitoring: The times of operations are monitored and the generator is equipped with a non-resettable hour meter. The purpose of equipment use at TA-33 and elsewhere are identified in the log sheet provided in ATTACHMENT A1104.A.

Recordkeeping: A log book is located in the trailer that contains the unit. The log book includes hours of operation recorded daily when the equipment operates. The monthly rolling 12-month total hours of operation are calculated in a spreadsheet. Operations at areas outside TA-33 are recorded.
The annual emissions of criteria and HAPs are calculated based on the hours of operation.

Reporting: Reports are submitted as required by permit conditions in accordance with Section B110.

A1104 Operational Limitations – Internal Combustion

B. Hours of Operation and Emission Limits for Units TA-33-G-2 through -4

Requirements:

1) Units TA-33-G-2 through -4 are authorized to operate 500 hours per generator per calendar year. (NSR Permit 2195P, Specific Condition 1.b.)

2) Units TA-33-G-2 through -4 shall each be certified to be in compliance with applicable non-road emission standards in 40 CFR 89. (NSR Permit 2195P, Specific Condition 1.c.)

Monitoring: The permittee shall monitor the total hours of operation for each genset, Units TA-33-G-2 through -4, using a non-resettable hour meter.

Recordkeeping: The permittee shall:

1) Record the total hours operation of the gensets listed above, as indicated on the non-resettable hour meter. (NSR Permit 2195P, Specific Condition 4.a., revised)

2) Calculate and record the semi-annual emissions of criteria and hazardous air pollutants from each genset, Units TA-33-G-2 through -4.

3) Maintain a copy of the engine certification to the applicable non road emission standards in 40 CFR 89. (NSR Permit 2195P, Specific Condition 4.c.)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement/Monitoring: The operating hour readings are collected twice a year to verify the hour limit is not approached. The hour limits for these units were not exceeded during this reporting period. Hours of generator operation are provided in ATTACHMENT A1104.B.
The hour meters on these units are non-resettable.

Recordkeeping:

1) Equipment operating hours are recorded.

2) The emissions of regulated pollutants from Units TA-33-G-2, TA-33-G-3 and TA-33-G-4 are calculated and recorded on a six-month basis.

3) Certificates of compliance with applicable non-road emission standards are maintained on-site.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1105 Fuel Sulfur Requirements – Internal Combustion

A. Fuel Sulfur Requirement for Unit TA-33-G-1P

Requirement: Unit TA-33-G-1P while in use at TA-33 shall combust only diesel fuel containing no more than 500 ppmw total sulfur.

Monitoring: None.

Recordkeeping: The permittee shall demonstrate compliance with the limit on total fuel sulfur content by maintaining records of a current, valid purchase contract, tariff sheet or transportation contract for the fuel, or fuel analysis, specifying the fuel grade and certification or allowable sulfur limit. If fuel analysis is used, the analysis shall not be older than one year. Alternatively, compliance may be demonstrated by keeping a receipt or invoice from a commercial fuel supplier with each fuel delivery, which shall include the delivery date, the fuel type delivered, and amount of fuel delivered, and the maximum sulfur content of the fuel.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Only Ultra Low Sulfur Diesel (ULSD) is used at the facility. A purchase contract is in place to only purchase ULSD, which is less than 15 ppm sulfur.

Recordkeeping: A copy of the purchase contract is available on-site.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification is submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1106 20.2.61 NMAC Opacity – Internal Combustion

A. CI-RICE - TA-33-G-1P, TA-33-G-2, TA-33-G-3, TA-33-G-4, RLUOB-GEN-1, RLUOB-GEN-2, RLUOB-GEN-3, TA-48-GEN-1, TA-55-GEN-1 TA-55-GEN-2 and TA-55-GEN-3

Requirement: Visible emissions from the stacks of the above listed sources shall not equal or exceed an opacity of 20 percent.

Monitoring: During steady state operation, opacity shall be measured over a 10-minute period in accordance with the procedures at 40 CFR 60, Appendix A, Method 9 as required by 20.2.61.114 NMAC. Opacity measurements shall be conducted on a quarterly basis per calendar year as qualified by the Section B108.D monitoring provisions. This requirement excludes Insignificant and Trivial Activities.

Recordkeeping: The permittee shall maintain records of all Method 9 observations, and in accordance with Section B109.

Reporting: The permittee shall report date, time, and results of all Method 9 observations. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: No visible emissions were observed to exceed 20% opacity during this reporting period.

Monitoring: Opacity measurements were not required for generators in this reporting period. Section B108.D(2) of the permit allows for reduced frequency of opacity monitoring if the unit operates 25% (547.5 hours in a quarter) or less of a monitoring period (calendar quarter). After two successive periods without monitoring, monitoring is required during the next period, unless the unit has operated less than 10% (219 hours in a quarter) of the monitoring period. If the unit runs less than 10%, that period is not considered as one of the two successive periods. No applicable CI-RICE units operated more than 25% for two successive monitoring periods during this reporting period, therefore no monitoring was required. See ATTACHMENT A1106.A.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1107 Other – Internal Combustion

A. 40 CFR 60, Subpart IIII (Emergency Generators Units RLUOB-GEN-1 through -3)

Requirement: The units are subject to 40 CFR 60, Subpart IIII and the permittee shall comply with the applicable emissions standards and fuel requirements in §60.4205(a), §60.4206 and §60.4207(b) and Table 1102.B. In addition the permittee shall follow the compliance requirements stated in §60.4211(a, b, and f) and the general provisions of 40 CFR 60 Subpart A as required in §60.4218.

Monitoring: None

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall comply with all applicable reporting requirements of 40 CFR 60, Subpart A as required in §60.4218 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The manufacturer's emissions certifications as required by §60.4205(a) are available on site.
Diesel sulfur requirements of 15 ppm are met by the LANL fuel oil contract specifying purchasing ULSD.
§60.4211 (a) (b) and (f) - Manufacturer's certifications for nonroad engines are on-site; non-emergency maintenance checks and readiness testing of such units is limited to 100 hours per year per §60.4211(f)(3).

Recordkeeping: Hours of non-emergency and emergency operation are recorded at the facility during generator operation. The units subject to this condition operated less than 100 hours to date on non-emergency maintenance and readiness checks in accordance with condition §60.4211(f)(3).

Reporting: Hours of operations are reported in accordance with Section B110. See ATTACHMENT A1107.A. for operating records.

A1107 Other – Internal Combustion

B. 40 CFR 60, Subpart IIII (Emergency Generators Unit TA-48-GEN-1, TA-55-GEN-1 TA-55-GEN-2 and TA-55-GEN-3)

Requirement: The units are subject to 40 CFR 60, Subpart IIII and the permittee shall comply with the applicable emissions standards and fuel requirements in §60.4205(b), §60.4202(a)(2), §60.4206 and §60.4207(b) and Table 1102.B. In addition, the permittee shall follow the compliance requirements stated in §60.4211(a, c and f) and the general provisions of 40 CFR 60 Subpart A as required in §60.4218.

Monitoring: None

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall comply with all applicable reporting requirements of 40 CFR 60, Subpart A as required in §60.4218 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The manufacturer's emissions certifications as required by §60.4205(b) are available on site.

Diesel sulfur requirements of 15 ppm are met by the LANL fuel oil contract specifying purchasing ULSD.

§60.4211 (a) (c) and (f) - Manufacturer's certifications for non-road engine are on-site to demonstrate compliance with standards; non-emergency maintenance checks and readiness testing of such units are limited to 100 hours per year per §60.4211(f)(3).

Recordkeeping: Hours of non-emergency and emergency operation are recorded at the facility during generator operation. The units subject to this condition operated less than 100 hours to date on non-emergency maintenance and readiness checks.

Reporting: Hours of operations are reported in accordance with Section B110. See ATTACHMENT A1107.B.

A1204 Operational Limitations – Data Disintegrator

A. Operational Throughput Limitation (Unit Data Disintegrator)

Requirement: The Unit Data Disintegrator is limited processing no more than 25,000 boxes or 565 tons per year media. To avoid Compliance Assurance Monitoring (CAM) requirements under 40 CFR 64, the Data Disintegrator shall limit uncontrolled potential PM emissions by limiting media processing no more than 25,000 boxes or 565 tons per year.

Monitoring: The permittee shall perform the monitoring required in Condition A1207.A.

Recordkeeping: The permittee shall perform the recordkeeping required in Condition A1207.A.

Reporting: The permittee shall perform the reporting required in Condition A1207.A.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: A log is kept to ensure that no more than 25,000 boxes or 565 tons per year of media are processed.

Monitoring, recordkeeping and reporting are discussed in Condition A1207.A.

A1207 Other – Data Disintegrator

A. Emission calculations (Data Disintegrator)

Requirement: The permittee shall calculate Data Disintegrator emissions based on the records of the number of boxes of media that are destroyed.

Monitoring: The permittee shall monitor the quantity of media destroyed on a monthly basis. The total weight shall be based on a previously determined average box weight. This average weight determination shall be maintained as part of the records for this facility.

Recordkeeping: The permittee shall calculate the actual emissions rate (tons per reporting period) for the emission units listed in Table 1200.A on a semi-annual basis. The emission rate in tons per year shall be calculated by summing the emissions from the previous reporting period with the current period. Records shall be maintained in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: A log is kept to record the number of boxes of media destroyed monthly and is used to calculate emissions on a six-month basis.

Monitoring: The number of boxes destroyed is provided in ATTACHMENT A1207.A. The average box weight has been determined and is maintained as part of the facility records.

Recordkeeping: The actual emissions rate is calculated for the emission unit on a six-month basis and is included in the semi-annual emissions report. These records are maintained on-site. The emission rate in tons per year is calculated by summing the emissions from the previous reporting period with the current period. The emissions are compared to the allowable emissions for the unit. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1207 Other – Data Disintegrator

B. Cyclone/Cloth Tube Filters (Data Disintegrator)

Requirement: The permittee shall perform regular maintenance and repair on the cyclone and cloth tube filter(s) per manufacturer's recommendations. (NSR Permit 2195H, Specific Condition 1.d.)

Monitoring: N/A

Recordkeeping: The permittee shall maintain adequate records on site to demonstrate compliance with manufacturer's recommended repair and maintenance schedules for the cyclone and the cloth tube filter(s). (NSR Permit 2195H, Specific Condition 4.a.) Records shall be maintained in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: Preventive maintenance and repair are performed on the data disintegrator cyclone and cloth tube filter(s) following manufacturer's recommendations. Preventative maintenance was performed in September of 2020.

Recordkeeping: Records of maintenance performed on the cyclone and cloth tube filter(s) are provided in ATTACHMENT A1207.B. Manufacturer recommended repair and maintenance information are available on site. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1207 Other – Data Disintegrator

C. Compliance Testing (Data Disintegrator)

Requirement: If upon notification by the Department, compliance testing is required, it shall be conducted in accordance with EPA Reference Methods 1 through 4, Method 5 for TSP, and conducted in accordance with 450 CFR 60, Appendix A. For combined TSP and PM10, testing shall be in accordance with 40 CFR 51, Appendix M, Method 201. Alternative test method(s) may be used if the Department approves the change. (NSR Permit 2195H, Specific Condition 6.b., revised)

Monitoring: N/A

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: No compliance test was required or performed during this reporting period.

Recordkeeping: Records are maintained in accordance with Section B110. No tests were conducted and no records were generated during this reporting period.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification submitted on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1305 Fuel Sulfur Requirements – TA-3 Power Plant

A. Boilers (Units TA-3-22-1 through -3)

Requirement: External combustion sources at the TA-3 Power Plant shall combust only natural gas containing no more than 2 gr/100 scf total sulfur or No. 2 fuel oil containing no more than 0.05 wt% total sulfur. (NSR Permit 2195B-M2, Specific Condition A110.A)

Monitoring: N/A

Recordkeeping: The permittee shall demonstrate compliance with the limit on total fuel sulfur content by maintaining records of a current, valid purchase contract, tariff sheet or transportation contract for the gaseous or liquid fuel, or fuel analysis, specifying the fuel grade and certification or allowable sulfur limit. If fuel analysis is used, the analysis shall not be older than one year. Alternatively, compliance may be demonstrated by keeping a receipt or invoice from a commercial fuel supplier with each fuel delivery, which shall include the delivery date, the fuel type delivered, and amount of fuel delivered, and the maximum sulfur content of the fuel.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The natural gas transportation contract states that gas provided to LANL will be pipeline quality with total sulfur content of no more than three quarters (3/4) grains of total sulfur/100 dscf.

Recordkeeping: Fuel oil is under a purchase contract and only Ultra Low Sulfur Diesel (ULSD) is delivered to the facility. ULSD contains less than 0.0015 wt% total sulfur. A copy of the transportation contract and purchase contract are kept on site. No fuel oil was purchased for the TA-3 power plant during this reporting period.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1305 Fuel Sulfur Requirements – TA-3 Power Plant

B. Combustion Turbine (Unit TA-3-22-CT-1)

Requirement: The combustion turbine at the TA-3 Power Plant shall combust only natural gas containing no greater than 2 gr/100 scf total sulfur. (NSR Permit 2195B-M2, Specific Condition A110.B)

Monitoring: N/A

Recordkeeping: The permittee shall demonstrate compliance with the limit on total fuel sulfur content by maintaining records of a current, valid purchase contract, tariff sheet or transportation contract for the gaseous fuel, or fuel analysis, specifying the fuel grade and certification or allowable sulfur limit. If fuel analysis is used, the analysis shall not be older than one year. (NSR Permit 2195B-M2, Specific Condition A110.B and 40 CFR 60.334(h))

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The natural gas transportation contract states that gas provided to LANL will be pipeline quality with total sulfur content of no more than three quarters (3/4) grains of total sulfur/100 dscf.

Recordkeeping: LANL's natural gas transportation contract is kept on-site.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1306 20.2.61 NMAC Opacity – TA-3 Power Plant

A. Sources Combusting Natural Gas

Requirement: All combustion units shall not exceed 20% opacity. (NSR Permit 2195B-M2, Specific Condition A111.A)

Monitoring: Use of natural gas fuel meeting the requirement at Condition A1305.A or B constitutes compliance with 20.2.61 NMAC unless opacity exceeds 20% averaged over a 10-minute period. When any visible emissions are observed during steady state operation and are determined to be not due to condensed water vapor only, opacity shall be measured over a 10-minute period, in accordance with the procedures at 40 CFR 60, Appendix A, Method 9 as required by 20.2.61.114 NMAC.

Recordkeeping: The permittee shall record dates of any opacity measures and the corresponding opacity readings.

Reporting: The permittee shall report dates of any opacity measures and the corresponding opacity readings. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: LANL has certified opacity readers on-site who perform opacity readings using 40 CFR 60, Appendix A, Method 9 to determine compliance with the opacity limitation.

Monitoring: Natural gas fuel meets the requirement specified in Condition A1305.A and B. Use of natural gas fuel constitutes compliance with the 20% opacity limit. No visible emissions were observed during steady state operation during this reporting period. See ATTACHMENT A1306.A. for details.

Recordkeeping: A standard form is used for all opacity measurements. The form includes the date of measurement and opacity observed. No opacity readings were required during this reporting period.

Reporting: A standard form is used for all opacity measurements. The form includes the date and time of the Method 9 observation and opacity observed. Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1306 20.2.61 NMAC Opacity – TA-3 Power Plant

B. Boilers Combusting No. 2 Fuel Oil

Requirement: All combustion units shall not exceed 20% opacity. (NSR Permit 2195B-M2, Specific Condition A111.B)

Monitoring: During steady state operation, opacity shall be measured over a 10-minute period in accordance with the procedures at 40 CFR 60, Appendix A, Method 9 as required by 20.2.61.114 NMAC. Opacity measurements shall be conducted on a quarterly basis per calendar year whenever the boiler(s) are operational during the monitoring period. This requirement is subject to the monitoring provisions of Condition B108.D.

Recordkeeping: The permittee shall maintain records of all Method 9 observations, and in accordance with Section B109.

Reporting: The permittee shall report date, time, and results of all Method 9 observations. The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Certified opacity readers are located on-site who perform opacity readings using 40 CFR 60, Appendix A, Method 9 to determine compliance with the opacity limitation. Fuel oil was not used during this reporting period.

Monitoring: Opacity is read at least once per quarter when boilers are combusting fuel oil and when required by monitoring provisions in condition B108.D. Opacity readings are measured over a 10-minute period and in accordance with 40 CFR 60, Appendix A, Method 9. A standard form is used for all opacity measurements. The form includes the date of measurement and opacity observed. Fuel oil was not used during this reporting period and therefore no Method 9 opacity measurements were conducted. See ATTACHMENT A1306.B.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: A standard form is used for all opacity measurements. The form includes the date and time of the Method 9 observation and opacity observed. Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1307 Other – TA-3 Power Plant

A. Emission calculations (TA-3 Power Plant)

Requirement: The permittee shall comply with the hourly and annual emission limits at Table1302.A. and Conditions A1302.B, C, and D for the combustion turbine and boilers. The boiler annual emission limit shall be expressed as the combined emissions from all 3 boilers. (NSR Permit 2195B-M2, Specific Condition A801.A)

Monitoring: The permittee shall perform the following calculations on a monthly basis:

1) Calculate the average hourly emissions rates (pph) for each emissions unit based on the monthly total fuel consumption and monthly actual hours of operation.

2) Calculate the actual annual emissions rates (tpy) for all emissions units based on the monthly rolling 12-month total fuel consumption and the monthly rolling 12-month total hours of operation.

3) All NOx emission rates for the boilers shall also be calculated in terms of lb/MMBtu heat input.

(NSR Permit 2195B-M2, Specific Condition A801.A)

Recordkeeping: The permittee shall maintain records in accordance with Section B109.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: All emissions calculations required by this section are performed for the emission units listed. The emission units did not exceed the hourly or annual emission limits.

Monitoring: Emissions spreadsheets are in place that calculate all required emissions and are used for monitoring and reporting purposes. See ATTACHMENT A1307.A for details.

1) The average hourly emission rates are included in the spreadsheet.

2) The actual annual emission rates are included in the spreadsheet.

3) The emission rates are based on the emission factor for NOx (lbs/MMscf), which is 58 lbs/MMscf, this factor is converted to lbs/MMBtu by dividing by the high heat value of natural gas (the number of Btu in a scf). As the HHV of natural gas ranges in value, the emission range was calculated using the low and high values at LANL between 2011 and 2020, the lowest was 1006.6 Btu/scf and the highest was 1079.3 Btu/scf, therefore the NOx emission rate will range from 0.0537 to 0.0576 lbs/MMBtu.

Recordkeeping: Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a semi-annual basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1307 Other – TA-3 Power Plant

B. Fuel Usage (Boilers, Units TA-3-22-1 through -3)

Requirement: Combined boiler operation shall not consume more than 1000 MMscf of natural gas and no more than 500,000 gallons of No. 2 fuel oil in any 12-month period. Volumetric natural gas fuel flow shall be measured using gas flowmeters installed on the natural gas fuel inlet to each respective unit (3 separate gas flowmeters). Fuel oil usage shall be measured using a single inventory meter located at a storage tank that is dedicated for use by the TA-3 power plant boilers. (NSR Permit 2195B-M2, Specific Condition A803.A, revised)

Monitoring: The liquid fuel flow rate shall be continuously monitored whenever liquid fuel is combusted. The natural gas fuel flow rate for each boiler shall be continuously monitored whenever natural gas is combusted. The hours of operation of each boiler shall be continuously monitored. (NSR Permit 2195B-M2, Specific Condition A803.A, revised)

Recordkeeping: The permittee shall record the monthly total of liquid fuel (gallons) for all boilers combined and gaseous fuel (scf) for each boiler on a monthly basis, to include a monthly total. Annual fuel usage shall be calculated and recorded on a monthly rolling 12-month total basis. The permittee shall record the hours of operation of each boiler on a monthly basis, to include a monthly total. The record shall include the monthly rolling 12-month total hours of operation for all 3 boilers combined. The permittee shall maintain records in accordance with Section B109. (NSR Permit 2195B-M2, Specific Conditon A803.A, revised)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The combined boiler natural gas use did not exceed 1,000 MMscf or 500,000 gallons of No. 2 fuel oil in any 12-month period. Volumetric flow is measured using the liquid or gas fuel flowmeters installed on the natural gas fuel inlet to each respective unit and on the combined fuel oil inlet to the boilers. All fuel use data are tracked monthly in a spreadsheet used for emission calculations.

Monitoring: Natural gas fuel meters are in place on each boiler. Fuel oil is measured using an inventory meter on the storage tank. Both natural gas and fuel oil are continuously monitored when being combusted. A monthly and 12-month rolling total of natural gas and fuel oil use are recorded and reviewed monthly to verify usage does not exceed allowable limits. See ATTACHMENT 1307.B for monthly and 12-month rolling totals for each fuel.

Recordkeeping: Total monthly liquid fuel for all boilers and gaseous fuel for each boiler were recorded on a monthly basis. The annual fuel usage was calculated and recorded on a monthly rolling 12-month total basis. Total hours of operation of each boiler are recorded monthly and included in a monthly rolling 12-month total hours for all boilers combined. Hours of operation of each boiler are continuously monitored. This data is collected monthly from the power plant operations staff. Monthly and 12 month rolling hours are provided in ATTACHMENT A.1307.B. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in

Section A605 of this report.

A1307 Other – TA-3 Power Plant

C. Fuel Usage (Combustion Turbine, Unit TA-2-22-CT-1)

Requirement: The combustion turbine shall not consume more than 1400 MMscf of natural gas in any 12-month period. Volumetric flow shall be measured using a gas fuel flowmeter installed on the fuel inlet of the combustion turbine. (NSR Permit 2195B-M2, Specific Condition A802.A)

Monitoring: The natural gas fuel flow rate for the combustion turbine shall be continuously monitored whenever natural gas is combusted. (NSR Permit 2195B-M2, Specific Condition A802.A)

Recordkeeping: The permittee shall record the daily total of gaseous fuel (scf) for the turbine on a monthly basis, to include a monthly total. Annual fuel usage shall be calculated and recorded on a monthly rolling 12-month total basis. The permittee shall record the daily hours of operation of the combustion turbine on a monthly basis, to include a monthly total. The record shall include the monthly total hours and monthly rolling 12-month total hours of operation. The permittee shall maintain records in accordance with Section B109. (NSR Permit 2195B-M2, Specific Condition A802.A)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: A 12-month rolling total for natural gas use is maintained to verify usage does not exceed 1400 MMscf. The daily and monthly total fuel use is collected and recorded in a spreadsheet used for calculating emissions. See ATTACHMENT A1307.C.

Monitoring: The natural gas flowmeter is installed on the turbine inlet. The fuel flowmeter continuously measures natural gas being delivered to the combustion turbine.

Recordkeeping: Daily hours of operation are collected monthly and entered into the spreadsheet. A 12-month rolling total hours of operation is calculated using this information. Rolling total hours are provided in ATTACHMENT A1307.C. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1307 Other – TA-3 Power Plant

D. Load Requirement (Combustion Turbine, Unit TA-3-22-CT-1)

Requirement: The combustion turbine shall be operated at no less than 80% and no greater than 100% load as determined by the manufacturer's supplied algorithm, except for minimal periods during startup and shutdown conditions. The permittee shall follow the manufacturer's recommended startup/shutdown procedures in order to minimize the duration of these events. (NSR Permit 2195B-M2, Specific Condition A802.B)

Monitoring: The operating load of the combustion turbine shall be monitored once daily during normal operations of that unit. (NSR Permit 2195B-M2, Specific Condition A802.B)

Recordkeeping: The permittee shall record the daily monitored operating load for the combustion turbine. The permittee shall maintain a record of the manufacturer's recommended startup/shutdown procedure and the manufacturer's criteria for the determination of turbine load. The permittee shall maintain a record for each startup/shutdown or malfunction event for the combustion turbine. The record shall include the date, the start/end time and duration for each event, which is defined as the length of time the combustion turbine is operating at less than 80% or greater than 100% load. For any malfunction event, the record shall also include the nature of the malfunction and any corrective action taken. The permittee shall maintain records in accordance with Section B109. (NSR Permit 2195B-M2, Specific Condition A802.B)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: The combustion turbine load was maintained between 80% and 100% during this reporting period, except for brief periods during a performance test that was required due to a combustion turbine controls upgrade. NMED-AQB was notified on September 17, 2020 that this test was to be completed. Performance testing is required to ensure the unit is operating safely and these tests are crucial to the safe operation of the equipment.
Load range is calculated by the turbine operating system and is manually recorded during each operation.
Startup/shutdown procedures are in place and are followed by the unit operators.

Monitoring: Load range is calculated by the turbine operating system and is manually recorded each hour during normal operation. The operating load is recorded at least once daily during normal operations. This data is collected in the daily operating log. Startup/shutdown procedures are in place and are followed by the unit operators. Each time the unit is started or shut down, the data is entered into a daily operating log, which is maintained on-site. The record includes the date, start/end times, and duration. See ATTACHMENT A.1307.D.

Recordkeeping: The operating load is recorded at least once daily during normal operations. This data is collected in the daily operating log. Startup/shutdown procedures are in place and are followed by the unit operators. Each time the unit is started or shut down, the data is entered into a daily operating log, which is maintained on-site. The record includes the date, start/end times, and duration. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1307 Other – TA-3 Power Plant

E. Control Device Operation (Boilers, Units TA-3-22-1 through -3)

Requirement: Each boiler (Units TA-3-22-1 through -3) shall only be operated with a properly operating flue gas recirculation fan (Units F-1 through -3, respectively). Any malfunction of the flue gas recirculation system during boiler operation may be subject to the excess emissions requirements of 20.2.7 NMAC. (NSR Permit 2195B-M2, Specific Condition A803.B)

Monitoring: The flue gas recirculating fans shall be inspected for proper operation and maintenance once during each calendar month that the unit was operating. (NSR Permit 2195B-M2, Specific Condition A803.B)

Recordkeeping: The permittee shall record all inspections of the flue gas recirculating fans and any event during which a fan malfunctions. The record shall include the date, time, name of operator conducting the inspection, and any discrepancies noted. For malfunction events, the record shall also include the nature and duration of the malfunction, and any corrective action taken. The permittee shall maintain records in accordance with Section B109. (NSR Permit 2195B-M2, Specific Condition A803.B)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: When a boiler is operating, the associated Flue Gas Recirculation (FGR) fan is on. A fan speed indicator is located on the control panel in the operator control room. This fan speed is monitored and recorded during boiler operation. No malfunctions of the FGR systems have occurred during this reporting period.

Monitoring: The FGR fans are inspected for proper operation and maintenance each month the unit is operating. Preventive maintenance forms are provided in ATTACHMENT A1307.E.

Recordkeeping: Records of inspection and maintenance of the FGR fans are completed monthly. No malfunctions occurred during this reporting period. All inspection records contain the required data found in this section. Records are maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1307 Other – TA-3 Power Plant

F. Control Device Operation (Combustion Turbine, Unit TA-3-22-CT-1)

Requirement: The combustion turbine shall be equipped with Rolls-Royce Dry Low Emissions (DLE) control technology (pre-mix, lean-burn series staged combustion system) to control NOx emissions. (NSR Permit 2195B-M2, Specific Condition A802.C)

Monitoring: N/A

Recordkeeping: The permittee shall maintain a record of the DLE system associated with the combustion turbine. The permittee shall maintain records in accordance with Section B109. (NSR Permit 2195B-M2, Specific Condition A802.C)

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The combustion turbine is equipped with the Dry Low Emissions (DLE) control technology. The DLE control was evaluated during unit start-up and determined to be working as designed. Manufacturer data are available on the DLE system.

Recordkeeping: Records of the DLE system associated with the combustion turbine were all maintained in accordance with Section B109.

Reporting: Emissions and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109 and B110. For more information, see comments in Section A605 of this report.

A1307 Other – TA-3 Power Plant

G. 40 CFR 60, Subparts A and GG (Combustion Turbine, Unit TA-3-22-CT-1)

Requirement: The combustion turbine is subject to 40 CFR 60, Subpart GG and the permittee shall comply with the applicable requirements of 40 CFR 60, Subpart A and Subpart GG. (NSR Permit 2195B-M2, Specific Condition A802.D)

Monitoring: The permittee shall comply with the monitoring and testing requirements of 40 CFR 60.334 and 60.335. (NSR Permit 2195B-M2, Specific Condition A802.D)

Recordkeeping: The permittee shall comply with the recordkeeping requirements of 40 CFR 60.334 and 40 CFR 60.7. (NSR Permit 2195B-M1-R2, Specific Condition A802.D)

Reporting: The permittee shall comply with the reporting requirements of 40 CFR 60.7. (NSR Permit 2195B-M1-R2, Specific Condition A802.D)

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The combustion turbine is in compliance with 40 CFR Part 60 Subpart A and 40 CFR Part 60 Subpart GG.

Monitoring: The combustion turbine is in compliance with the monitoring and test requirements of 40 CFR 60.334 and 60.335.

Recordkeeping: The combustion turbine is in compliance with the monitoring, notification, and record keeping requirements of 40 CFR 60.334 and 40 CFR 60.7.

Reporting: The combustion turbine is in compliance with the reporting requirements of 40 CFR 60.7.

A1307 Other – TA-3 Power Plant

H. Periodic Emissions Tests (Combustion Turbine, Unit TA-3-22-CT-1)

Requirement: The permittee shall comply with the allowable emission limits at Table A1302.A, including the NOx ppmv limitation. (NSR Permit 2195B-M2, Specific Condition A802.E)

Monitoring: The permittee shall test using a portable analyzer or EPA Reference Methods subject to the requirements and limitations of Section B108, General Monitoring Requirements. For periodic testing of NOx and CO emissions tests shall be carried out as described below.

Test results that demonstrate compliance with the NOx and CO emission limits shall also be considered to demonstrate compliance with the VOC emission limits.

(1) The test period shall be annually, based on a calendar year.
(2) The tests shall continue based on the existing testing schedule.
(3) All subsequent monitoring shall occur in each succeeding monitoring period. No two monitoring events shall occur closer together in time than 25% of a monitoring period.
(4) The permittee shall follow the General Testing Procedures of Section B111.
(5) Performance testing required by 40 CFR 60, Subpart GG or 40 CFR 60, Subpart KKKK may be used to satisfy these periodic testing requirements if they meet the requirements of this condition and are completed during the specified monitoring period.

Recordkeeping: The permittee shall maintain records in accordance with Section B109. The permittee shall also record the results of the periodic emissions tests, including the turbine's fuel flow rate and horsepower at the time of the test, and the type of fuel fired (natural gas, field gas, etc.).

If a combustion analyzer is used to measure excess air in the exhaust gas, records shall be kept of the make and model of the instrument and instrument calibration data. If an ORSAT apparatus or other gas absorption analyzer is used, the permittee shall record all calibration results.

The permittee shall also keep records of all raw data used to determine exhaust gas flow and of all calculations used to determine flow rates and mass emissions rates.

Reporting: The permittee shall report in accordance with Section B109, B110, and B111.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: Requirement: The facility is in compliance with the allowable emission limits in Table A1302.A, including the NOx ppmv limitation, as demonstrated in the monitoring and reporting sections below.

Monitoring: An emission stack test was conducted on January 10, 2019; the test results demonstrated that the actual emissions were less than the allowable emissions. No additional stack testing is required this reporting period.Requirement: The facility is in compliance with the allowable emission limits in Table A1302.A, including the NOx ppmv limitation, as demonstrated in the monitoring and reporting sections below.

Monitoring: The test followed the requirements and limitations required in Section B108. A combustion analyzer is used for this periodic emissions test. Instrument and calibration data are included in the final test report. An ORSAT or other similar gas absorption analyzer is not used. Results from the test demonstrate compliance with NOx and CO emission limits and thus the VOC emission limits. No limits were exceeded. See ATTACHMENT A1307.H. for details.

1) An emission stack test was conducted on January 10, 2019; the test results demonstrated that the actual emissions were less than the allowable emissions.

2) No additional stack testing was required during this certification period.

3) The tests are performed annually if required, or at a frequency as specified in General Condition B108.D based on the percentage of time the unit has operated.

4) The stack test was performed following the monitoring requirements required in Section B108 and general testing procedures found in Section B111. Records of periodic emissions test include all data required by this section.

5) Performance testing met the requirements of this condition and were completed during the specified monitoring period.

Recordkeeping: The test followed the requirements and limitations required in Section B109. Records are kept of the periodic emissions test results, including the turbine's fuel flow rate and horsepower, and the type of fuel fired. A combustion analyzer is used for this periodic emissions test. Instrument and calibration data are included in the final test report. An ORSAT or other similar gas absorption analyzer is not used. Raw data and calculations are included in the test report.

Reporting: Emission and monitoring reports are submitted on a six-month basis and compliance certification on an annual basis in accordance with permit conditions A109, B110, and B111. For more information, see comments in Section A605 of this report.

A1407 Other – Open Burning

A. Operational

Requirement: The permittee shall comply with the applicable requirements of 20.2.60 NMAC and 20.2.65 NMAC, including, but not limited to:

1) Prior to initiating a burn consisting of vegetative material, the permittee shall submit to the Department a sampling and analysis plan and upon approval conduct representative sampling of the intended burn material and analyze samples for radionuclides, target analyte list (TAL) inorganic elements, polychlorinated biphenyls (PCBs), and high explosives (HE); and

2) The permittee shall submit to the Department a background concentration report for the contaminants listed in Condition A1407.A, Requirement (1). The report shall indicate locations where background concentrations were taken and compare sample results with background concentrations of the constituents; and

3) The permittee shall not burn vegetative material which includes any contaminant above the relevant background concentration; and

4) Upon receiving Department approval, the permittee shall conduct public notification in a display ad in at least four newspapers: Los Alamos Monitor, Rio Grande Sun, Santa Fe New Mexican, and the Albuquerque Journal, no less than 21 days in advance of a planned burn.

Monitoring: The permittee shall monitor all open burning as required by Department regulation or burn approval.

Recordkeeping: The permittee shall maintain records of all sampling and analysis plans and any representative sampling conducted. Records shall be kept in accordance with Section B109.

Reporting: The permittee shall submit reports as outlined in the Condition 1407.A Requirements, as described in Section A109, and in accordance with Section B110.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes**	**Date report submitted:**	**Tracking Number:**
☒ **No**	**Provide comments and identify any supporting documentation as an attachment.**	

Comments: No open burning occurred during this reporting period. See ATTACHMENT A1407.A. for details.

P100-R2M1 - A1507 Evaporative Sprayers–Work Practice Standards

A. Operational Requirements (Evaporative Sprayers)

Requirement: Compliance with the allowable emission limits in Table 106.B shall be demonstrated by calculating the annual total HAPs emissions in tons per year. The emissions shall be calculated based on the most recent water analysis and hours of operation for the evaporative sprayers.

Monitoring: The permittee shall conduct an analysis of the basin water, including analytical results (water concentrations) for all HAPs and TAPs, at the Sanitary Effluent Reclamation Facility (SERF) every two years beginning no later than calendar year 2018. The permittee shall monitor the hours of operation for each sprayer.

Recordkeeping: The permittee shall record a monthly rolling, 12-month total of HAPs emissions based on the sum of emissions from all the evaporative sprayers. The emission factors for the HAPs shall be based on the values from the most recent water analysis.

Reporting: The permittee shall submit reports described in Section A109 and in accordance with Section B111. An electronic copy of the required water analysis including analytical results (water concentrations) for all HAPs, TAPs, and the total dissolved solids (TDS) shall be sent to AQB with the Semi-annual Monitoring Report specified in A109.A for any year in which the water sampling is conducted.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The facility is in compliance with the allowable emissions limits in Table 106.B by calculating the annual total HAP emissions in tons per year. The most recent water analysis results and hours of operation are used to calculate the emissions.

Monitoring: The facility conducts analysis of the basin water for HAPs and TAPs every two years effective 2018. Basin water sampling was conducted in November and December of 2020. The hours of operation are monitored and tabulated. See ATTACHMENT A1507.A.b. for details.

Recordkeeping: Records are kept on-site and include the monthly rolling and 12-month total of HAPs emissions based on the sum of emissions from all the evaporative sprayers. The emission factors are based on the values from the most recent water analysis.

Reporting: Reporting is done in accordance with the Title V requirements specified in Section A109.A and Section B111. Water analysis results will be included in the Semi-Annual Monitoring Report for any year in which the water sampling is conducted. Basin water sampling was in November and December of 2020. See ATTACHMENT A1507.A.a. for details.

P100-R2M1 - A1507 Evaporative Sprayers–Work Practice Standards

B. Maintenance and Repair Requirements

Requirement: Compliance with the allowable emission limits in Table 106.A shall be demonstrated by properly maintaining and repairing the units.

Monitoring: Maintenance and repair shall meet the minimum manufacturer's or permittee's recommended maintenance schedule. Activities that involve maintenance, adjustment, replacement, or repair of functional components with the potential to affect the operation of an emission unit shall be documented as they occur.

Recordkeeping: The permittee shall maintain records in accordance with Section B109, including records of maintenance and repairs activities and a copy of the manufacturer's or permittee's recommended maintenance schedule.

Reporting: The permittee shall maintain records in accordance with Section B109, including records of maintenance and repairs activities and a copy of the manufacturer's or permittee's recommended maintenance schedule.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: Compliance with the allowable emissions limits is demonstrated by properly maintaining and repairing the units.

Monitoring: Equipment maintenance and repair are conducted in accordance with the manufacturer's recommended schedule and LANL procedures, and documented in Table 106.A. See ATTACHMENT A1507.B. for work practice standards and maintenance and repair records.

Recordkeeping: Records are maintained in accordance with Section B109. Maintenance and repair records are kept on-site, and include maintenance and repairs activities, and the maintenance schedule.

Reporting: Records are maintained in accordance with Section B109. Maintenance and repair records are kept on-site, and include maintenance and repairs activities, and the maintenance schedule.

P100-R2M4 - A1507 Evaporative Sprayers–HAPs Calculations, Maintenance, and Repair

A. HAPs Calculations (Evaporative Sprayers)

Requirement: Compliance with the facility-wide allowable emission limits in Table 106.B (P100-R2M1) shall be demonstrated by calculating the annual total HAPs emissions in tons per year. The emissions shall be calculated based on the most recent water analysis and hours of operation for the evaporative sprayers.

Monitoring: The permittee shall conduct an analysis of the basin water, including analytical results (water concentrations) for all HAPs and New Mexico TAPs, at the Sanitary Effluent Reclamation Facility (SERF) every two years beginning no later than calendar year 2018. The permittee shall monitor the

hours of operation for each sprayer.

Recordkeeping: The permittee shall record a monthly rolling, 12-month total of HAPs emissions based on the sum of calculated actual emissions from all the evaporative sprayers. The emission factors for the HAPs shall be based on the values from the most recent water analysis.

Reporting: The permittee shall submit reports according to Section A109 and in accordance with Section B111 (P100-R2M1). An electronic copy of the required water analysis including analytical results (water concentrations) for all HAPs, TAPs, and the total dissolved solids (TDS) shall be sent to AQB with the Semi-annual Monitoring Report specified in Condition A109.A (P100-R2M1) for any year in which the water sampling is conducted.

Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.

☐ **Yes** **Date report submitted:** **Tracking Number:**

☒ **No** **Provide comments and identify any supporting documentation as an attachment.**

Comments: Requirement: The facility demonstrates compliance with the allowable emissions limits in Table 106.B by calculating the annual total HAP emissions in tons per year. The most recent water analysis results and hours of operation are used to calculate the emissions.

Monitoring: The facility conducts analysis of the basin water for HAPs and TAPs every two years effective 2018. Basin water sampling was conducted in November and December of 2020. The hours of operation are monitored and tabulated.

Recordkeeping: Records are kept on-site and include the monthly rolling and 12-month total of HAPs emissions based on the sum of emissions from all the evaporative sprayers. The emission factors are based on the values from the most recent water analysis.

Reporting: Reporting is done in accordance with the Title V requirements specified in Section A109.A and Section B111. Water analysis results will be included in the Semi-Annual Monitoring Report for any year in which the water sampling is conducted. Basin water sampling was in November and December of 2020.

P100-R2M4 - A1507 Evaporative Sprayers–HAPs Calculations, Maintenance, and Repair

B. Maintenance and Repair Requirements

Requirement: Compliance with the facility-wide allowable emission limits in Table 106.B (P100-R2M1) shall be demonstrated by properly maintaining and repairing the units.

Monitoring: Maintenance and repair shall meet the minimum manufacturer's or permittee's recommended maintenance schedule. Activities that involve maintenance, adjustment, replacement, or repair of functional components with the potential to affect the operation of an emission unit shall be documented as they occur.

Recordkeeping: The permittee shall maintain records in accordance with Section B109 (P100-R2M1), including records of maintenance and repairs activities and a copy of the manufacturer’s or permittee’s recommended maintenance schedule.

Reporting: The permittee shall maintain records in accordance with Section B109 (P100-R2M1), including records of maintenance and repairs activities and a copy of the manufacturer’s or permittee’s

recommended maintenance schedule.
Has this reporting requirement been met during this reporting period with a separate report submittal? Answer Yes or No below.
☐ **Yes** **Date report submitted:** **Tracking Number:**
☒ **No** **Provide comments and identify any supporting documentation as an attachment.**
Comments: Requirement: Compliance with the allowable emissions limits is demonstrated by properly maintaining and repairing the units. Monitoring: Equipment maintenance and repair are conducted in accordance with the manufacturer's recommended schedule and LANL procedures, and documented in Table 106.A. Recordkeeping: Records are maintained in accordance with Section B109. Maintenance and repair records are kept on-site, and include maintenance and repairs activities, and the maintenance schedule. Reporting: Records are maintained in accordance with Section B109. Maintenance and repair records are kept onsite, and include maintenance and repairs activities, and the maintenance schedule.

Part 2

Deviation Summary Report

1. Were any deviations reported to the Air Quality Bureau during this reporting period? If NO, answer question 2 below. If YES, complete the "Summary of Deviations Previously Reported" table below, then answer question	☒ Yes	☐ No

SUMMARY OF DEVIATIONS PREVIOUSLY REPORTED

Unit # and description	Date deviation reported	Tracking Number
Asbestos NESHAP	August 5, 2020	Not received

2. Are there any deviations not yet reported? If No, no further information is required on the Deviation Summary Report. If Yes, answer question 3 below and enter the required information in the Deviation Summary Table.	☒ Yes ☐ No
3. Did any of the deviations result in excess emissions? For deviations resulting in excess emissions a completed Excess Emission Form for each deviation must be attached to this report.	☐ Yes ☒ No

Deviation Summary Table for deviations not yet reported.

No.	Applicable Requirement (Include Rule Citation)	Emission Unit ID(s)	Cause of Deviation	Corrective Action Taken
1	A607.A	TA-60-BDM	After the annual calibration in September 2020 on the magnehelic gauge, pressure transmitter, and chart recorder, the equipment was re-installed improperly. The device to continually measure the pressure drop across the baghouse was inoperable during the period October 2 – November 20, 2020 (intermittent operation for a total of 8.5 hours of operation during this period) because of equipment malfunction. This resulted in missing differential pressure data across the baghouse for brief periods of operation during this timeframe. There were no excess emissions due to this deviation.	Once aware, the LANL Air Quality Team immediately contacted appropriate personnel to reconnect the equipment properly, but due to lack of available personnel during LANL's limited operational stance due to the COVID-19 pandemic, this issue was not fixed until November 20, 2020. Asphalt Plant operator is now aware that LANL Air Quality Team must be notified within 24 hours and the equipment must be shut down if the differential pressure readings are out of acceptable range so this type of issue can be corrected more urgently moving forward.

Asphalt Plant

EPA Method 9 Opacity Reports

Los Alamos
NATIONAL LABORATORY
est. 1943
The World's Greatest Science Protecting America

LOS ALAMOS NATIONAL LABORATORY (LANL)
VISIBLE EMISSION OBSERVATION FORM (6 MINUTE)

Source Name: TA-60 Asphalt Batch Plant

Source Location: TA-60-233

Type of Source: Asphalt Plant

Type of Control Equipment: Bag House

Describe Emission Point (Top of stack, etc.): Top of Stack

Height Above Ground Level: 33 Feet

Height Relative to Observer: 26 Feet

Distance From Observer: 65 Feet

Direction of Source From Observer: NNW

Description of Plume (stack exit only)
☐Lofting ☐Trapping ☐Looping ☐Fanning ☐Coning
☑No Plume Present

Emission Color: NA

Plume Type ☑No Plume Present
☐Continuous ☐Fugitive ☐Intermittent

Water Droplets Present?
☑NO ☐YES If YES, droplet plume is ☐Attached ☐Detached

At what point in the plume was opacity determined?
6" above Stack height

Describe Background (i.e. blue sky, trees, etc.): Blue Sky

Background Color: Blue

Sky Conditions: Clear Blue Sky

Wind Speed: 4 mph

Wind Direction (provide from/to, i.e. from North to South): E to W

Ambient Temperature: 60 °F

Relative Humidity: 14 %

Additional Comments/Information:
NA

Observation Date: 10/21/2020

Start Time: 10:58 a.m.

End Time: 11:04 a.m.

Hourly Forecast for Today, Monday 11/23

Today 11/23 — 50% / 0.04 in

Cloudy with occasional showers this afternoon. High 49F. Winds SSW at 10 to 20 mph. Chance of rain 50%.

Tonight 11/23 — 60% / 0.08 in

Mostly cloudy with showers and a few thunderstorms. Low 36F. Winds SW at 5 to 10 mph. Chance of rain 60%.

Asphalt Plant

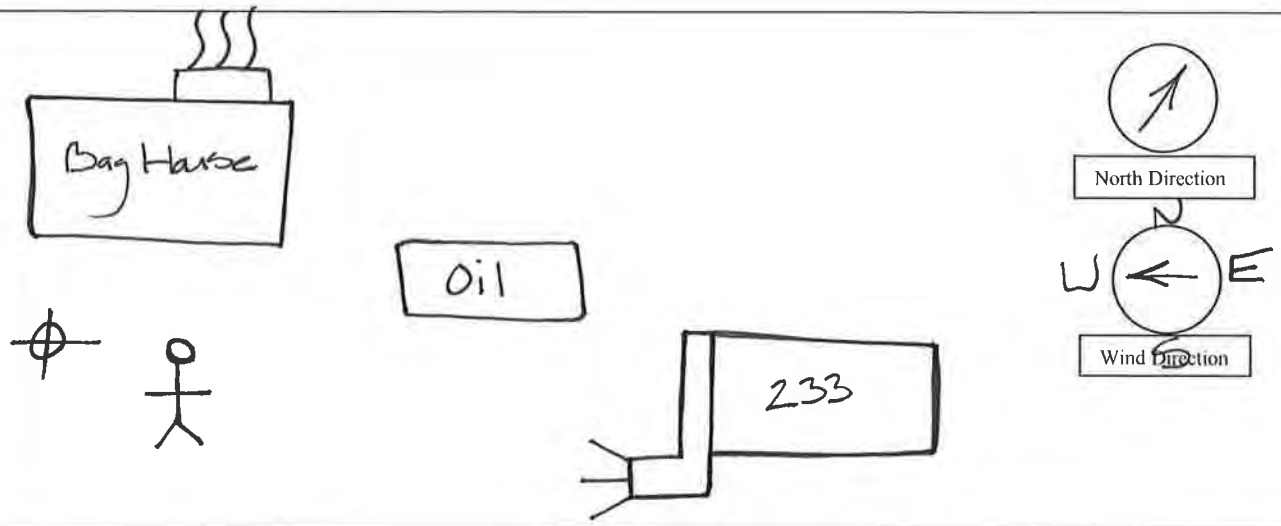
EPA Method 22 Opacity Reports



Los Alamos National Laboratory
METHOD 22 Visual Determination of Fugitive Emissions Form

Location: TA-60 Asphalt Batch Plant	**Observer Affiliation:** EPC-CP
Representative: Leonard F. Sandoval	**Date of Inspection:** 10/21/2020
Sky Conditions: Clear Blue Sky	**Wind Direction:** West
Precipitation: ∅	**Wind Speed:** 4 mph
Industry: DOE National Lab	**Process Unit:** F.E.

Sketch of Process Unit:

Indicate:

* observer position relative to source
* potential emission and/or actual emission points
* sun location
* wind direction
* North direction

Observations:	Clock Time	Observation period duration (min:sec)	Accumulated Emission Time(min:sec)
Begin	10:58 a.m.		
		10 min.	1.5 = 1.5'.
End Observation	11:08 a.m.		

Notes:

This form is used to document fugitive visible emissions from outside air emission sources. If an emission is observed during the Method 22 inspection/observation period (which must be at least 6 minutes for the Asphalt Plant and 10 minutes for all other LANL sources), a Method 9 visible emission test may need to be performed.

TA-55-PF4 Annual HEPA Filter Challenge Test Reports

Attachment B, Surveillance Training Checklist

(Page 1 of 2)

Procedure title:	100 Area Glovebox Exhaust In-Place HEPA Filter Testing
Procedure no.:	TA55-STP-104A, R4
Date of issue:	8-10-20
Working copy issued to:	R. Martinez
Working copy issued by:	T. Stiker
	Certified Operations Center Operator (OCO)

Procedure is the current revision listed in Documentum: ☑ Yes ☐ Documentum Unavailable

Performance Type: ☑ Scheduled ☐ Partial ☐ Other *If partial or other list reason in Comments below*

Comments: *(Document TSR Status Board tracking date here if different from completion date.)*

Training Checklist:

Workers Performing Surveillance	Applicable Surveillance Training Current

$ PLENUM EFFICIENCY TEST [SR #4.1.3.1.A, #4.1.3.1.B]

Follow the HEPA test procedure

Cu = 37 ug/l(%) Final Stable Upstream Meter reading

Acceptance: ≥30 meter reading

Stable Downstream (Cd%) Meter reading = 0.002 (%)

Removal Efficiency (%) =.100% - Cd% = 100% - 0.002 Cd% = 99.998 %

Acceptance: ≥ 99.95% **Acceptable? (circle one)** **YES** **NO**

FIRST STAGE TEST [defense-in-depth]

Follow the HEPA test procedure

Cu = 38 ug/l(%) Final Stable Upstream Meter reading

Acceptance: ≥30 meter reading

Stable Downstream (Cd%) Meter reading = 0.003 (%)

Removal Efficiency (%) =.100% - Cd% = 100% - 0.003 Cd% = 99.997 %

Acceptance: ≥ 99.95% **Acceptable? (circle one)** **YES** **NO**

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement
[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.
Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed t[illegible]rough [illegible]he window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry [illegible]ecording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

FOR INFORMATION ONLY

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

FOR INFORMATION ONLY

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

TYPE INFORMATION ONLY

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

[1] Non TSR requirement

[2] SR 4.1.1.7 applies during Mode 1 as stated in LCO 3.1.1. SR's 4.1.3.4 and 4.3.2.2 apply during both Mode 1 and Mode 2.

Note: Rooms 201, 206 & 207 **must be** entered for surveillance even if they are red lit, room 204 can be viewed through the window. Notify the Operations Center of any rooms that are unable to be entered for the performance of rounds, Operations Center will make a logbook entry recording the room(s) and reason(s) for non-entry. Document in the comments section any room(s) and reason(s) they were unable to be entered for rounds.

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

Attachment B-1, Daily Surveillance Rounds (PF-4 South Side) [UET]

(Page 1 of 4)

NOTE This entire Attachment is to be treated as Surveillance Requirement implementing actions.

SR 4.4.1.1, The OPERABILITY acceptance criterion for this surveillance is:
The FLAMMABLE GAS detector in the FSTF FLAMMABLE GAS SOURCE storage cabinet is exposed to the ambient atmosphere in the storage cabinet. The gas concentration readout directly on the detector in the storage cabinet is compared with the gas concentration readout on the system control and alarm panel. The difference between the two readings is checked to VERIFY it is in the range of (≥-0.1; ≤0.1).

AP-WORK-004: Attachment 1
Maintenance & Site Services
Worker Engagement Questions

672872-01

Worker engagement questions are intended to focus attention on the task and ensure uncertainties are addressed. Examples of worker engagement questions are provided below. Worker engagement questions should be tailored to the situation.

Each of the questions listed below will be discussed at each Pre-Job Brief with all affected personnel.

Topic	Completed (X)
What permits, permissions, or support are required to safely start this work?	X
What is the most likely thing that could go wrong (not the worst thing) and what, specifically, will prevent it?	X
What can cause us to go beyond the scope of the work?	X
What hazards in the work area may not have been considered during planning of this job	X

Los Alamos NATIONAL LABORATORY EST. 1943

Integrated Work Document (IWD) Part 3, Validation and Work Release

IWD #_____ Revision #:_____ **Work Release**

By signing below, I verify this activity is compatible with current facility configuration and operating conditions.

FOD designated Ops Mgr or other facility point-of-contact for work area

Signature/Z#/Date **(If required by FOD)**: 205531 09/14/2020

Note: For Standing IWD, release may be given concurrently with signatures on Part 2.

By signing below, I have verified the following:

- I have verified authorization by ensuring approval signatures of the RLM and FOD.
- I have jointly conducted a validation walkdown with workers to confirm the IWD can be performed as written, required initial conditions and other prerequisites are in-place.
- The assigned workers are authorized and are qualified to perform the work in a safe, secure, and environmentally responsible manner.
- I have conducted the pre-job briefing, and all workers (including support workers) have been briefed.
- I have ensured coordination with any required FOD work area representatives (*e.g., area work coordinators*).

Primary PIC (Signature/Z#/Date) **Required**: 185092 9/14/2020

Alternate PIC Signatures **acknowledges** PIC authority is assumed for the first time *(Note: Alternate PICs are required to sign only once, but formal handoff includes conferring with previous PIC to obtain all required information associated with the handoff).*

Alternate PIC (Signature/Z#/Date) **Required**: _____

Alternate PIC (Signature/Z#/Date) **Required**: _____

Pre-Job Brief Content

- What are the critical steps or phases of this activity?
- How can we make a mistake at that point?
- What is the worst thing that can go wrong?
- What controls, preventive measures, and bounding conditions are needed?
- What work permits are required and how will we meet their requirements?
- What are the handoffs and coordination requirements among workers and multiple PICs?
- Are there hold-points including those that require sign-offs?
- What are the pause/stop work responsibilities and expectations (e.g. for unanticipated conditions or hazards)?
- How would we respond to alarms and emergencies?
- Are there lessons learned from previous similar work?
- Is other information needed to perform this activity in a safe, secure, and environmentally responsible manner?
- Does everyone agree to the work tasks/steps, hazards, and controls and commit to follow them?

Pre-Job Brief Attendance Roster

By signing below **as required**, I agree to the following:

- I agree to follow the work steps and implement the controls as written as applicable to my work assignments.
- I agree to pause/stop work when conditions or hazards change or when I encounter unexpected conditions during the execution of work, or when work cannot be performed as written, or instructions become unclear during execution.
- I confirm that I am authorized, qualified, and fit to perform the work.

1.0 PRE-MAINTENANCE ACTIVITIES

NOTE Preoperational and pre-maintenance activities shall be conducted per the work order package, e.g., lockout/tagout, permits, special instructions, etc.

! WARNING If purging of gas lines will be required during this maintenance, ensure that the purging activity is addressed in the Integrated Work Document (IWD). The following must be addressed (see Master Specification 23 1123):

1. Purged fuel gases shall be directly vented to a safe location outdoors, away from personnel and ignition sources. This may be accomplished through permanent piping or temporary piping or hosing.
2. If it is not possible to vent purged gases outdoors, the following conditions must be met:
   a. Purging activity must be approved by the LANL Fire Marshal based on a documented justification detailing why outdoor venting is not possible and IWD.
   b. Gas concentration in the space to which the purge is vented shall be maintained at no more than 25% of the Lower Explosive Limit (LEL). For natural gas, the LEL is a concentration of 5% in air or 50,000 ppm. Therefore a maximum concentration of 12,500 ppm is allowed for natural gas. The concentration may be controlled by providing adequate ventilation or by limiting the amount of purge gas.
   c. Combustible gas detectors shall be used during the purging operation to monitor the gas concentration.
   d. Nonessential personnel shall be evacuated from the vicinity (including adjacent spaces) during the purging operation.
   e. Ignition sources in the purging space shall be controlled or eliminated.

NOTE All repair work, adjustments, or the replacement of parts shall be done in accordance with the manufacturer's procedures, specifications, recommendations, and instructions.

Remarks: NONE

Work Order No.: 672872-01 Equipment ID No.: BHW-01

1.1	Notify maintenance coordinator (MC) that work will be in progress on the boiler system.		Initials: mm

2.0 MAINTENANCE

NOTE These selected hot water boilers are mainly boilers with power burners that have refractory in front and rear flue doors or have heat extractors in the fire-tubes as are found in most one-pass boilers (Sellers). Hot water heating boilers with atmospheric burners generally require minimal fireside preventative maintenance. Contact the MSS-MP Boiler subject matter expert (SME) at 7-8550 with questions or concerns.

2.1	Lock and tag out electrical and all associated valves on boiler and shut off gas supply.		Initials: mm
2.2	Cool boiler, open air cock, and drain the boiler.		Initials: mm
2.3	Perform an internal and external inspection after thorough cleaning.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.1	Check the fireside furnace and fire-tubes for any evidence of soot formation or corrosion.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.2	Brush and vacuum furnace and fire-tubes if such conditions exist.		Initials: mm
2.3.3	Perform hydrostatic test based on the boiler's Maximum Allowable Working Pressure and/or facility potable water pressure as long as the potable water pressure is at least 30 psi over boiler operating pressure.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.4	Note if any boiler tubes and/or fittings are leaking, and repair as required. For any major repairs (determined by the SME), request a work order for the repairs from the MC.		Initials: mm

Remarks: NONE

Work Order No.: 672872-01 Equipment ID No.: BHW-01

2.3.5 On one-pass boilers (Sellers), check condition of all heat extractors.	S ☐ U ☐ N/A ☒	Initials: MM
2.3.6 Check refractory materials.	S ☒ U ☐ N/A ☐	Initials: MM
2.3.7 Replace if needed.		Initials: MM
2.4 Perform maintenance on low-water cutoff float chamber and water feeder. Disassemble to ensure freedom from obstruction and proper functioning of the working parts.		Initials: MM
2.5 Perform routine burner maintenance.		Initials: MM
2.5.1 Observe temperature and operating pressure and general conditions.	S ☒ U ☐ N/A ☐	Initials: MM
2.5.2 Fire and cycle the burner.		Initials: MM
2.6 Perform routine maintenance of circulating pump and expansion pump equipment.		Initials: MM
2.6.1 Observe condition of expansion tank.	S ☒ U ☐ N/A ☐	Initials: MM
2.6.2 Drain expansion tank if it is of a non-bladder type and refill to reestablish an air cushion.	S ☒ U ☐ N/A ☐	Initials: MM
2.6.3 Check the air pressure on the bladder-type expansion tanks.	S ☒ U ☐ N/A ☐	Initials: MM

Remarks:
2.3.5 Boiler not a Sellees.

Work Order No.: 672872-01 Equipment ID No.: BHW-01

2.6.4 Observe operation of circulating pumps.	S ☒ U ☐ N/A ☐	Initials: mm
2.6.5 Lubricate pump motors.		Initials: mm
2.7 Perform routine maintenance of entire combustion control equipment.		Initials: mm
2.7.1 Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	S ☒ U ☐ N/A ☐	Initials: mm
2.7.2 Adjust air/fuel mixture as needed.		Initials: mm
2.7.3 Test flame detection devices on boilers with flame scanners.	S ☒ U ☐ N/A ☐	Initials: mm
2.7.4 Remove the flame scanner with the burner firing.		Initials: mm
NOTE The burner should shut off as a flame failure condition.		
2.7.5 Clean the flame scanner, reinstall and test programmer.		Initials: mm
2.7.6 Check for proper operation as boiler goes through a firing cycle and light-off.	S ☒ U ☐ N/A ☐	Initials: mm
2.7.7 Check all electrical control and circuitry.	S ☒ U ☐ N/A ☐	Initials: mm

Remarks: NONE

Work Order No.: 672872-01 Equipment ID No.: BHW-01

2.7.8 Inspect for cracked mercury tubes, separation of mercury, cracked insulators (probe type), jumper tube conditions, loose connections, poor or deteriorated wiring, improperly used bypass switches, cutoff switches wired in parallel, shut-offs installed at improper levels, wedges behind mercury tubes.	S ☒ U ☐ N/A ☐	Initials: mm
2.7.9 Observe operation of forced draft fan motors on boilers with power burners and induced draft fan motors on horizontal breeching where applicable.	S ☒ U ☐ N/A ☐	Initials: mm
2.7.10 Lubricate fan motors where necessary.		Initials: mm
2.8 Perform combustion and draft tests.		Initials: mm
2.8.1 Visually inspect combustion.	S ☒ U ☐ N/A ☐	Initials: mm
NOTE Changes in flame shape, color, and sound are among early indicators of potential combustion-related problems. Changes may be due to changes in fuel pressure or gas/air linkage movement.		
2.9 Perform safety relief valve(s) pop test.	S ☒ U ☐ N/A ☐	Initials: mm
2.9.1 Check pressure-reducing valve.	S ☒ U ☐ N/A ☐	Initials: mm
2.9.2 Replace the strainer in the valve if needed.		Initials: mm
2.10 Perform slow drain test of low-water cutoff.	S ☒ U ☐ N/A ☐	Initials: mm

Remarks: NONE

Work Order No.: 672872-01 Equipment ID No.: BHW-01

2.11 Inspect gas piping for proper support and tightness.	S ☒ U ☐ N/A ☐	Initials: mm
2.11.1 Inspect fuel supply system and gas controls.	S ☒ U ☐ N/A ☐	Initials: mm
2.11.2 Leak check gas controls and associated gas piping with a gas detector or soap suds.	S ☒ U ☐ N/A ☐	Initials: mm
2.12 Inspect boiler room ventilation louvers and intake.	S ☒ U ☐ N/A ☐	Initials: mm
2.12.1 Listen for any unusual noises or conditions and correct as necessary.	S ☒ U ☐ N/A ☐	Initials: mm
2.12.2 Report any needed corrections to the MC for corrective maintenance.		Initials: mm
2.12.3 Check combustion air supply openings to ensure that they are not closed or stopped up.	S ☒ U ☐ N/A ☐	Initials: mm
2.12.4 Inspect conditions of stacks and rain caps.	S ☒ U ☐ N/A ☐	Initials: mm
2.12.5 Inspect flue door gaskets to ensure they are in good condition, and properly secured.	S ☒ U ☐ N/A ☐	Initials: mm
2.12.6 Replace if necessary.		Initials: mm

Remarks: NONE

Work Order No.: 672872 Equipment ID No.: BHW-01

3.0 POST-MAINTENANCE ACTIVITIES

NOTE Post-maintenance activities shall be conducted in accordance with the work order package instructions (e.g., lockout/tagout, special instructions, etc.).

3.1	Close and secure front and rear flue doors.		Initials: mm
3.2	Hook up all associated piping.		Initials: mm
3.3	IF water makeup feeds boiler directly, THEN open by-pass valve to refill boiler, AND close by-pass valve when boiler reaches operating pressure. -or- IF water makeup does NOT feed boiler directly, THEN open supply and return valves to refill boiler.	By-pass ☐ -or- Supply/ Return ☒	Initials: mm
3.4	Fire up boiler and check for air, gas, and water leaks.	S ☒ U ☐ N/A ☐	Initials: mm
3.5	Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	S ☒ U ☐ N/A ☐	Initials: mm
3.6	Check pilot burners and ignition equipment for proper condition and adjustment.	S ☒ U ☐ N/A ☐	Initials: mm
3.7	Visually check burner for proper combustion.	S ☒ U ☐ N/A ☐	Initials: mm
3.8	Record all mechanical maintenance data, testing data, and other notable items.		Initials: mm

NOTE Combustion analysis is verifiable only with a flue gas analyzer and is performed mainly on boilers with power burners.

Remarks: NONE

Work Order No.: 672872-01 Equipment ID No.: BHW-01

3.9	Test water for proper chemical levels. Test and treat water as defined on Datasheet 403-A.002.	S ☒ U ☐ N/A ☐	Initials: MM
3.10	Record all mechanical maintenance data, testing data, and other notable items.		Initials: MM
3.11	Notify MC that work on the boiler system is complete.		Initials: MM

Work Order No.: 672872-01 Equipment ID No.: BHW-03

Instructions: Enter the requested information. All items marked **S** or **Y** are satisfactory. Document all items marked **U**, **N**, or **N/A** in the Remarks section below, noting the step number and reason. Notify the foreman or supervisor of problems involving imminent danger.

TA: 55 Building: 440 Room: U209

Date Inspected: 9/14/2020 Inspectors: Mark Millwood / Randy Wendt

1.0 PRE-MAINTENANCE ACTIVITIES

NOTE Preoperational and pre-maintenance activities shall be conducted per the work order package, e.g., lockout/tagout, permits, special instructions, etc.

! WARNING If purging of gas lines will be required during this maintenance, ensure that the purging activity is addressed in the Integrated Work Document (IWD). The following must be addressed (see Master Specification 23 1123):

1. Purged fuel gases shall be directly vented to a safe location outdoors, away from personnel and ignition sources. This may be accomplished through permanent piping or temporary piping or hosing.
2. If it is not possible to vent purged gases outdoors, the following conditions must be met:
   a. Purging activity must be approved by the LANL Fire Marshal based on a documented justification detailing why outdoor venting is not possible and IWD.
   b. Gas concentration in the space to which the purge is vented shall be maintained at no more than 25% of the Lower Explosive Limit (LEL). For natural gas, the LEL is a concentration of 5% in air or 50,000 ppm. Therefore a maximum concentration of 12,500 ppm is allowed for natural gas. The concentration may be controlled by providing adequate ventilation or by limiting the amount of purge gas.
   c. Combustible gas detectors shall be used during the purging operation to monitor the gas concentration.
   d. Nonessential personnel shall be evacuated from the vicinity (including adjacent spaces) during the purging operation.
   e. Ignition sources in the purging space shall be controlled or eliminated.

NOTE All repair work, adjustments, or the replacement of parts shall be done in accordance with the manufacturer's procedures, specifications, recommendations, and instructions.

Remarks: NONE

Work Order No.: 672872-01 Equipment ID No.: BHW-03

1.1	Notify maintenance coordinator (MC) that work will be in progress on the boiler system.	Initials: mm

2.0 MAINTENANCE

NOTE These selected hot water boilers are mainly boilers with power burners that have refractory in front and rear flue doors or have heat extractors in the fire-tubes as are found in most one-pass boilers (Sellers). Hot water heating boilers with atmospheric burners generally require minimal fireside preventative maintenance. Contact the MSS-MP Boiler subject matter expert (SME) at 7-8550 with questions or concerns.

2.1	Lock and tag out electrical and all associated valves on boiler and shut off gas supply.		Initials: mm
2.2	Cool boiler, open air cock, and drain the boiler.		Initials: mm
2.3	Perform an internal and external inspection after thorough cleaning.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.1	Check the fireside furnace and fire-tubes for any evidence of soot formation or corrosion.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.2	Brush and vacuum furnace and fire-tubes if such conditions exist.		Initials: mm
2.3.3	Perform hydrostatic test based on the boiler's Maximum Allowable Working Pressure and/or facility potable water pressure as long as the potable water pressure is at least 30 psi over boiler operating pressure.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.4	Note if any boiler tubes and/or fittings are leaking, and repair as required. For any major repairs (determined by the SME), request a work order for the repairs from the MC.		Initials: mm

Remarks: NONE

2.3.5	On one-pass boilers (Sellers), check condition of all heat extractors.	S ☐ U ☐ N/A ☒	Initials: mm
2.3.6	Check refractory materials.	S ☒ U ☐ N/A ☐	Initials: mm
2.3.7	Replace if needed.		Initials: mm
2.4	Perform maintenance on low-water cutoff float chamber and water feeder. Disassemble to ensure freedom from obstruction and proper functioning of the working parts.		Initials: mm
2.5	Perform routine burner maintenance.		Initials: mm

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)		
Revision #:			**Activity/Task Title:** 550440 Annual Hot Water Boiler FS/WS PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Wanda J. Madrid 116672 08/21/2020
TA: 55	**Building:** 0440	**Room:**	**Additional Location Description:**

1. Scope of Work

1.1 **PERFORM** – Annual HW Boiler FS/WS Inspection Testing and Maintenance PM in accordance with MSS PMI Procedure 403-A.002 and 403-A.006.

Hazard Analysis (HA) Team: Date

2. Precautions and Limitations

2.1 **IF** steps cannot be completed as described, or **IF** unforeseen situations occur, Then **PAUSE WORK** and **STABILIZE** the situation, **CONTACT** your supervisor, and **AWAIT** further instructions before proceeding.

2.2 Follow all postings when moving throughout the facility, wear appropriate PPE as listed. If postings are not understood, then **PAUSE WORK** and verify with RLUOB Operations before proceeding.

2.3 Signatures, Initials, and Place-Keeping blocks at the end of each step signifies the completion of the specific step or series of steps as an error prevention tool. Steps SHALL be signed and/or marked as required upon completion

2.4 Verify the activity is on the Plan of the Day or has received same day approval.

2.5 Perform Non-hazardous voltage checks in the vicinity where electrical work is to be performed and anytime the electrical configuration of a system is changed, including changes to LOTO configuration. Re-emphasize the need for daily Non-hazardous voltage checks.

2.6 **ENTRY CONDITIONS:**

- Ensure Facility status is compatible with work activity.
- When required, place barricades or other access control measures to exclude non-qualified workers and by standers from entering work area.
- Check in with Operations Center prior to starting any work.

3. Prerequisites/Initial Conditions

3.1 **CHECK-IN REQUIREMENTS:**

- All personnel must check in at the RLUOB Operations Center to release work and ensure work is on Plan-of-Day or receive late addition approval.

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)		
Revision #:			**Activity/Task Title:** 550440 Annual Hot Water Boiler FS/WS PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Wanda J. Madrid 116672 08/21/2020
TA: 55	**Building:** 0440	**Room:**	**Additional Location Description:**

3.2 **WORK AREA TRAINING REQUIREMENTS:**

- Residents must complete RLUOB Site Specific Training (TP #161) and read the Building Emergency Plan or be escorted.

3.3 **OTHER BOUNDING CONDITIONS**

- Look for postings when moving through the facility such as PPE requirements. If you have any questions, ask.
- Follow announcements, alarms, alerts, and all directions from Facility Ops due to changing conditions, outages, testing activities, evacuation orders, etc.
- Conduct a Pre-job Briefing and include the following discussion:
- Determine the appropriate level of personal protective equipment (PPE) during maintenance and LOTO activities.

3.4 **REFERENCED DOCUMENTS**

- LOTO Form 2244
- SDS – Gas
- SDS – Garrett-Callahan Formula 1015L

4. SPECIAL TRAINING/MEDICAL REQUIREMENTS

4.1 The following training is required for the General Hazards Section:

- LANL Maintenance Craft Worker **Curriculum ID # 10968**

4.2 The following training is required for performing work at RLUOB:

- RLUOB Site Specific **Curriculum ID # 161**
- RLUOB 1st Floor Access Unescorted **Curriculum ID # 1768**

4.3 The following training is required for working on Boilers –Pipefitters performing work:

- General Pipefitter Requirements **Curriculum ID # 647**
- Water Treatment **Curriculum ID # 2296**
- Chemical Hazards Communication **Curriculum ID # 25418**

4.4 The following training is required for Electricians performing work:

- General Electrician Requirements **Curriculum ID # 642**
- Electrician and Facility Engineers **Curriculum ID # 2559**
  or Non-Electrician Craft **Curriculum ID # 2908**

Revision #:			**Activity/Task Title:** 550440 Annual Hot Water Boiler FS/WS PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Wanda J. Madrid 116672 08/21/2020
TA: 55	**Building:** 0440	**Room:**	**Additional Location Description:**

BHW-01 fed from: MCC-B Ckt # 3B, Rm U209 (480V/3Ø) Class 1.3b)	
Incident Energy (cal/cm²)	0.17
Arc Flash Boundary (in)	5
Working Distance (in)	18
Limited Approach Boundary (in)	42

HW-P-01 fed from: MCC-B Ckt # 2B, Rm U209 (480V/3Ø) Class 1.3b)	
Incident Energy (cal/cm²)	0.14
Arc Flash Boundary (in)	5
Working Distance (in)	18
Limited Approach Boundary (in)	42

6.2.2 **Perform** LOTO of **Boiler BHW-01** at MCC-B Ckt 3B and LOTO **HW Pump HW-P-01** at MCC-B Ckt # 2B located in Rm U209. ☒

- LOTO Form 2244

Breaker Manipulation PPE:

- Electrical Worker Standard Required Daily Wear Work Clothing

6.2.3 **Place** switch inside UPS in the OPEN(OFF) position. UPS is located beneath BHW-01 control Panel and apply LOTO. ☒

6.2.4 **Place** Boiler 2 or 3 in Manual position and verify accompanying pump is also in Manual positon prior to start of work on Boiler 1. ☒

6.2.5 **Notify** Operations Center that Boiler 2 or 3 have been placed in Manual position. ☒

6.2.6 **Verify** Non-Hazardous Voltage at BHW-01 Controller and at Pump local disconnect switch using NRTL, Cat. III min volt meter. ☒

Non-Hazardous Voltage Verification PPE:

- Electrical Worker Standard Required Daily Wear Work Clothing
- Di-Electric Gloves with Leather Protectors

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)		
Revision #:			**Activity/Task Title:** 550440 Annual Hot Water Boiler FS/WS PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Wanda J. Madrid 116672 08/21/2020
TA: 55	**Building:** 0440	**Room:**	**Additional Location Description:**

- Safety Glasses
- Hearing Protection (Ear Canal Inserts)
- Two-Person Rule

HOLD POINT

Non-Hazardous Voltage Verified for **BHW-01 and HW-P-01**

Verifier _____ Z# 331693 Date 9-15-2020

6.3 **PERFORM Mechanical LOTO of Boiler # 1 Gas / Fuel Oil/ Water Valves**

⚠WARNING	**Hazard: Gas** **PPE Requirements:** Wear safety glasses with side shields, work gloves, long sleeves, long pants, use explosion proof equipment and non-sparking tools. Ensure work is occurring in well ventilated area.

6.3.1 **Close** and **Perform** LOTO to the following valves: ☒

- Natural Gas Valves **NG-V-6009D** and **NG-V-6004A**
- INLET Water Valve to **BHW-01** and **HW-V-101A**
- OUTLET Water Valve from **BHW-01** and **HW-V-101B**

NOTE:
If Required, Relieve Boiler Pressure by opening pressure relief valve and allow to drain.

- LOTO Form 2244

6.3.2 **Verify** Non-Hazardous Energy on BHW-01 Natural Gas Valves by firing boiler until boiler flame fails, this will suck out all gas within the gas line. Verify "0" psig on gas line gauge. ☒

HOLD POINT

Non-Hazardous Energy Verified for **BHW-01 Natural Gas Valves**

Verifier _____ Z# 331693 Date 9-15-2020

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)		
Revision #:			**Activity/Task Title:** 550440 Annual Hot Water Boiler FS/WS PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Wanda J. Madrid 116672 08/21/2020

HOLD POINT

Non-Hazardous Energy Verified for **BHW-01 Inlet/ Outlet Water Valves**

Verifier _____ Z# 331693 Date 9-15-2020

6.3.3 **Proceed** to perform **TASK 6.8** in accordance with IWD and as per PMI Checklists 403-A.002 and 403-A.006. ☒

6.4 **PERFORM Electrical LOTO of Boiler # 2 per Ops Sequence (AS/WHEN NEEDED)**

⚠WARNING

Hazardous Energy/Electrical Shock/Arc Flash Hazard – Potential contact with energized systems.

BHW-02 fed from: MCC-B Ckt # 3D, Rm U209 (480V/3Ø) Class 1.3b)	
Incident Energy (cal/cm²)	**0.17**
Arc Flash Boundary (in)	**5**
Working Distance (in)	**18**
Limited Approach Boundary (in)	**42**

HW-P-02 fed from: MCC-B Ckt # 2C, Rm U209 (480V/3Ø) Class 1.3b)	
Incident Energy (cal/cm²)	**0.14**
Arc Flash Boundary (in)	**5**
Working Distance (in)	**18**
Limited Approach Boundary (in)	**42**

6.4.1 **Perform** LOTO of **Boiler BHW-02** at MCC-B Ckt 3D and LOTO **HW Pump HW-P-02** at MCC-B Ckt # 2C located in Rm U209. ☒

- LOTO Form 2244

Breaker Manipulation PPE:

- Electrical Worker Standard Required Daily Wear Work Clothing

HOLD POINT

Non-Hazardous Voltage Verified for **BHW-02 and HW-P-02**

Verifier _____ Z# 331693 Date 9-15-2020

6.5 **PERFORM Mechanical LOTO of Boiler # 2 Gas / Fuel Oil/ Water Valves**

⚠WARNING

Hazard: Gas

PPE Requirements: Wear safety glasses with side shields, work gloves, long sleeves, long pants, use explosion proof equipment and non-sparking tools. Ensure work is occurring in well ventilated area.

6.5.1 **Close** and **Perform** LOTO to the following valves: X

- Natural Gas Valves **NG-V-6010D** and **NG-V-6014A**
- INLET Water Valve to **BHW-02** and **HW-V-201A**
- OUTLET Water Valve from **BHW-02** and **HW-V-201B**

NOTE:
If Required, Relieve Boiler Pressure by opening pressure relief valve and allow to drain.

- LOTO Form 2244

6.5.2 **Verify** Non-Hazardous Energy on BHW-02 Natural Gas Valves by firing boiler until boiler flame fails, this will suck out all gas within the gas line. Verify "0" psig on gas line gauge. X

TA: 55	**Building:** 0440	**Room:**	**Additional Location Description:**

6.9.3 **REMOVE** Electrical LOTO and Re-Energize Boilers on **BHW-03** as they are returned to service. (Refer to **Task 6.6** for applicable LOTO points) ☒

6.9.4 **REMOVE** Mechanical LOTO and Open Valves to Boiler **BHW-01** as it is returned to service. (Refer to **Task 6.3** for applicable LOTO points) **Proceed** to **Task 7.1** for PMT. ☒

6.9.5 **REMOVE** Mechanical LOTO and Open Valves to Boiler **BHW-02** as it is returned to service. (Refer to **Task 6.5** for applicable LOTO points) **Proceed** to **Task 7.1** for PMT. ☒

6.9.6 **REMOVE** Mechanical LOTO and Open Valves to Boiler **BHW-03** as it is returned to service. (Refer to **Task 6.7** for applicable LOTO points) **Proceed** to **Task 7.1** for PMT. ☒

6.10 **PERFORM Hot Water Boiler Water Treatment**

⚠ CAUTION

Water Pressure on System 45-50 PSI
Water Temperature 160° - 170° F
Do not leave area with system open

6.10.1 **Perform** Hot Water Boiler water treatment in accordance with PMI 403-A.002 and record results. ☒

6.10.2 **IF** required, add Garrett-Callahan Formula 1015L or equivalent to Pot Feeder located in Rm U200, and follow work steps listed below: ☒

(1) **Close** Valve HW-V-01C
(2) **Close** Valve HW-V-01D
(3) **Slowly** Open Pot Feeder Drain Valve HW-V01E and relieve pressure slowly
(4) **Slowly** remove lid to Pot Feeder
(5) **Close** Drain Valve HW-V01E prior to adding chemical

(6) **DON PPE** for adding Chemical:
- Use with good ventilation
- Face Shield and Chemical Goggles for splash hazard
- Chemical Resistant Apron
- Long sleeves and long pants

Form 2244

Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): 672872-01	LO/TO Remedy ID: 99607
Location of Equipment to be Isolated: TA: 55 Bldg: 0440 Rm/Other: U209	Description of Machinery, System & Equipment (MS&E) to be worked on: BHW-02 and HW-P-02
MS&E Owner/Operator: Alex Sauregumberry Z Number: 215253 Phone: 7-7333	
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☑ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☑ No
Reason for LO/TO: Perform 550440 Hot Water Boiler Fireside/ Waterside PM	
Group LO/TO (2 or more)? ☐ Yes ☑ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☐ Yes ☑ No
Shift or Personnel Changes? ☐ Yes ☑ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☑ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number:

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☑ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:

☐ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)
Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☐ 1		☐ 6	
☐ 2		☐ 7	
☐ 3		☐ 8	
☐ 4		☐ 9	
☐ 5		☐ 10	

Section 4: LO/TO Sequence

☑ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:
Describe how to effectively isolate & lockout the MS&E below, if not following other document referenced above.

Isolate & Lockout (Step No.)	Equipment Descriptor (What is being locked out? e.g., machine drive motor, input power to MCC)	Energy Source (e.g., electrical, mechanical, pneumatic, hydraulic, chemical, thermal)	Energy Isolation Device (e.g., specific ID, description, circuit #, lock box #)	Location of Energy Isolation Device (e.g., room number, north wall, south wall)	Required LO/TO Position or Alignment (e.g., off, open, closed, on)	Verification Method (e.g., live/dead/live, crack open, on-off-on-off, peer checking, independent verification)	Verifier's Initials (if req'd)	See Section 5: Release (Step No.)
☑ (1)	BHW-02	Electrical	MCC-B Ckt 3D	U209	OPEN / OFF	Peer	RPW	☑
☑ (2)	HW-P-02	Electrical	MCC-B Ckt 2C	U209	OPEN/OFF	Peer	RPW	☑
☑ (3)	BHW-02	Mechanical	NG-V-6010D	U209	CLOSED	Peer	RPW	☑
☑ (4)	BHW-02	Mechanical	NG-V-6014A	U209	CLOSED	Peer	RPW	☑
☑ (5)	HW-P-02	Mechanical	HW-V-201A	U209	CLOSED	Peer	RPW	☑
☑ (6)	HW-P-02	Mechanical	HW-V-201B	U209	CLOSED	Peer	RPW	☑
☑ (7)	Lock Box	Lock Box	Lockbox 9	U209	Locked	Peer	RPW	☑
☐ (8)								☐

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Energy Control Procedure prepared by:

Preparer (print name)	Z Number	Organization	Phone	Signature/Date
Wanda J Madrid	116672	MSS WC	606-0332	Wanda J Madrid

By signing below, you acknowledge that this energy control procedure and/or referenced documents identify the isolation devices, isolation points, and methods necessary to prevent any unexpected release of hazardous energy.

Energy Control Procedure approved by:

MS&E Owner/Operator (print name)	Z Number	Organization	Phone	Signature/Date
A. Jauregui Berry	215253	RLWDO OPS	7-7333	9/15/2020

Section 6: All Authorized Workers (anyone applying a lock for this activity)

Fill out the following information or print and attach Authorized Workers information from the Lockout/Tagout Remedy Application.

Authorized Workers Name(s)	Z Number	Date Lock Applied	Date Lock Removed
Lead: Mark Millwood	331693	9/15/2020	9-16-2020
Randy Wendt	350559	9/15/20	9-16-2020
HAROLD A DEAKIN	351234	9/15/20/20	9-16-2020
Roos_Richard A.	303563	9/16/20	9-16-2020

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Energy Control Procedure prepared by:

Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): 672872-01	LO/TO Remedy ID: 99755
Location of Equipment to be Isolated: TA: 55 Bldg: 0440 Rm/Other: U209	Description of Machinery, System & Equipment (MS&E) to be worked on: BHW-03 and HW-P-03
MS&E Owner/Operator: Eric Quintana Z Number: 120321 Phone: 77333	
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☑ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☑ No
Reason for LO/TO: Perform 550440 Hot Water Boiler Fireside/ Waterside PM	
Group LO/TO (2 or more)? ☑ Yes ☐ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☑ Yes ☐ No
Shift or Personnel Changes? ☐ Yes ☑ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☐ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number:

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☐ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:

☐ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)

Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☐ 1		☐ 6	
☐ 2		☐ 7	
☐ 3		☐ 8	
☐ 4		☐ 9	
☐ 5		☐ 10	

Section 4: LO/TO Sequence

☐ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).

Integrated Work Document (IWD) Part 3, Validation and Work Release

IWD # Revision #: **Work Release**

By signing below, I verify this activity is compatible with current facility configuration and operating conditions.

FOD designated Operations Manager or other facility point-of-contact for work area

Signature/Z#/Date **(If required by FOD)**: _____

Note: For Standing IWD, release may be given concurrently with signatures on Part 2.

By signing below, I have verified the following:

- I have verified authorization by ensuring approval signatures of the RLM and FOD.
- I have jointly conducted a validation walkdown with workers to confirm the IWD can be performed as written, and that required initial conditions and other prerequisites are in place.
- The assigned workers are authorized and are competent to perform the work in a safe, secure, and environmentally responsible manner.
- I have conducted the pre-job briefing, and all workers (including support workers) have been briefed.
- I have ensured coordination with any required FOD work-area representatives (e.g., area work coordinators).

PIC (Signature/Z#/Date) **Required**: _____ Jason Sparks 122088 5-5-20202 _____

Alternate PIC Signatures **acknowledges** PIC authority is assumed for the first time. *(Note: Alternate PICs are required to sign only once, but formal handoff includes conferring with previous PIC to obtain all required information associated with the handoff.)*

Alternate PIC (Signature/Z#/Date) **Required**: _____

Alternate PIC (Signature/Z#/Date) **Required**: _____

Pre-Job Brief Content

- What are the critical steps* or phases of this activity?
- How can we make a mistake at that point?
- What is the worst thing that can go wrong?
- What controls, preventive measures, and bounding conditions are needed?
- What work permits are required and how will we meet their requirements?
- What are the handoffs and coordination requirements among workers and multiple PICs?
- Are there hold-points including those that require sign-offs?
- What are the pause/stop work responsibilities and expectations (e.g., for unanticipated conditions or hazards)?
- How would we respond to alarms and emergencies?
- Are there lessons learned from previous similar work?
- Is other information needed to perform this activity in a safe, secure, and environmentally responsible manner?
- Does everyone agree to the work tasks/steps, hazards, and controls and commit to follow them?

* "Critical steps occur anytime human performance involves a substantial transfer of energy, or movement of solids, liquids, and gases, or the transmission of data and information that , if not performed under control, could cause serious harm to one or more important assets." (Performance Improvement, vol. 53, no. 9, October 2014)

Pre-Job Brief Attendance Roster

By signing below **as required**, I agree to the following:

- I agree to follow the work steps and implement the controls as written as applicable to my work assignments.
- I agree to pause/stop work when conditions or hazards change or when I encounter unexpected conditions during the execution of work, or when work cannot be performed as written, or instructions become unclear during execution.
- I confirm that I am authorized, qualified, and fit to perform the work.

Worker (Signature/Z#/Date) 324726 05-05-2020 07:08	**Worker** (Signature/Z#/Date)
Worker (Signature/Z#/Date) 347468 05-05-2020	**Worker** (Signature/Z#/Date)

Worker (Signature/Z#/Date)	**Worker** (Signature/Z#/Date)

AP-WORK-004: Attachment 1
Maintenance & Site Services
Worker Engagement Questions

Worker engagement questions are intended to focus attention on the task and ensure uncertainties are addressed. Examples of worker engagement questions are provided below. Worker engagement questions should be tailored to the situation.

Each of the questions listed below will be discussed at each Pre-Job Brief with all affected personnel.

Topic	Completed (X)
What permits, permissions, or support are required to safely start this work?	X
What is the most likely thing that could go wrong (not the worst thing) and what, specifically, will prevent it?	X
What can cause us to go beyond the scope of the work?	X
What hazards in the work area may not have been considered during planning of this job	X

ANNUAL WATERSIDE/FIRESIDE CHECKLIST for TA-09/16 STEAM PLANTS – Revision 2

Sellers Boilers Technical Description

The original manufacturer's manual for these boilers is Sellers Immersion Fired Steam Boiler Owner's Manual. A secondary reference for this Maintenance Procedure is the *Sellers Engineering Company Owners Manual for the Model 15 Commodore & 77 Commodore Steam Boilers and Model 15 Senior Model 105 E Steam Boilers.*

The boilers at TA-09 & TA -16 are located in eight (8) boiler plants: Plant 1 (TA-16-1480), Plant 4 (TA-16-1483), Plant 5 (TA-16-1484), Plant 8 (TA-16-1487), Plant 11 (TA-16-1490), Plant 12 (TA-16-1491), Plant 13 (TA-09-0282), and Plant 14(TA-16-1492). They are Sellers brand fire tube boilers manufactured in 1995. They all have a maximum allowable working pressure (MAWP) of 150 psig. The supply natural gas pressure is nominally 5 psig. Attachment 1 and Attachment 2 have technical information for each boiler.

The inspection and maintenance will consist of replacement, or testing, of all the pressure relief safety valves, a waterside and fireside boiler inspection, cleaning of any debris or scaling inside the boiler, inspection of various plant components, steam gauge calibration, and an internal and external inspection by a NBIC boiler inspector.

Complete the checklists in Attachment 3 before the boiler is released by UI Engineering to UI Operations. The U&I system engineer must be alerted for inspection of boiler components, specifically the hold points as seen in the text below.

A flue gas analyzer will be needed for two scenarios: light off and low-NOx boiler settings. Record the O2, CO, NOx, Temperature and Efficiency. The boilers are to be run in the low-NOx mode In order to be compliant with manufacturer's instructions.

The boiler output pressure will be 80 psig, with special exception to the two boilers at Plant 12 (TA-16-1491) which will operate at 40 psig.

There are three pressure switches on top of each boiler: the high pressure steam shutdown (High Limit) switch, the operating pressure control (OPC) switch, and the Low NOx Cold Start Limit Control (CSLC) switch. The final setting for all boilers, for all boilers except for Plant 12 (16-1491): set the high pressure steam shutdown (High Limit) switch to 90 psig; set the operating pressure control (OPC) switch to 80 psig; set the low NOx steam pressure (CSLC) switch to 40 psig. The final setting for the two boilers at Plant 12 (16-1491): set the high pressure steam shutdown (High Limit) switch

to 45 psig; set the operating pressure control (OPC) switch to 40 psig; set the low NOx steam pressure (CSLC) switch to 20 psig. All steam pressure switch set point verification must be performed with a calibrated boiler pressure gauge. All gauges used for pressure switch set points must have calibration dates and those are to be recorded on the checklist in Attachment 3. **All pressure switches shall be verified that they perform the intended function. If the pressure setting on the switch varies by more than 20% of the boiler pressure gauge then the switch must be replaced.**

There are four pressure switches at the steam header: the lead, lag, and two low pressure switches. For all boilers set the switches to control the lead/lag feature of the boiler. **All pressure switches shall be verified that they perform the intended function.**

After final tuning of the boiler parameters, adjust the air flow proving switch about 2 inches water column below the blower pressure setting.

Training requirements include all pertinent training for Los Alamos National Laboratory and the site specific training (TA-09 & TA-16). It is also required that the boiler maintenance crew performing Low NOx verification receives boiler training from either the manufacturer (Sellers) or the local manufacturer's representative.

A) Boiler Operator must have a New Mexico Construction Industries Journey Classification as a Journeyman Boiler Operator – High Pressure BO2 (NMAC 14.6.6).
B) Boiler Operator Trainee shall not operate any devices except under the direct observation of a Journeyman Boiler Operator (NMAC 14.9.4.29).
C) Pressure Safety Orientation – Course #769 (LANL P-101-34)
D) Pressure Safety Advanced – Course #11459 (LANL P-101-34

Inspection/Maintenance Procedures

1) Remove and replace the Kunkle pressure relief valves. New pressure relief valves can be purchased and Attachment 2 identifies the pressure relief valves to order. If new valves are not purchased, test and repair the pressure relief valves in accordance with the Engineering Standard Manual Chapter 17.

2) Lubricate motor bearings as follows:

a) Grundfos boiler feed pumps- lubricate the Baldor motor with Polyrex EM (Mobil) grease.
b) Baldor blower motor – lubricate with Polyrex EM (Mobil) grease.

3) Clean any debris accumulated on the Neptune/Leeson chemical feed pumps and the GE/Neptune chemical mixing motors.

4) Clean out each main burner with a bottle washer.

5) Check the Low-NOx solenoid for proper operation.

6) Drill the pilot manifolds with a #53 drill bit and adjust the pilot manifold position in accordance with the Seller's Owners' Manual.

Waterside Inspection

1) Open flue door and inspect tube sheets for water leakage. It tube leakage is suspected call the system engineer for further evaluation. The narrow ligaments between tube holes are subject to tremendous stresses and should be watched for any sign of cracking mainly due to overheating.

2) Drain boiler and remove all hand hole and manhole covers, where applicable, to allow a visual check of all internal accessible areas. Example: shell, tubes and tube sheets.

Hold Point: U&I system engineer and chemical treatment company representative are required for waterside inspection. Give at least 7 days advance notice and coordinate with U&I system engineer.

3) Carefully examine waterside surfaces using a strong light and mirror where required. Look for evidence of scale, corrosion, blisters, or pitting, indicating adequacy of water treatment.

4) Use a high pressure hose to wash sediment out of the bottom and other internals of the boiler.

Hold Point: U&I system engineer and NBIC boiler inspector needed for boiler internal inspection. Give at least 7 days advance notice and coordinate with U&I system engineer.

5) Remove both head covers from the bodies of the two float operated low water cut-offs (LWC). The float-assembly and mercury switches are located on these heads. Flush out both LWC bodies. Inspect floats and replace if necessary. Reinstall head covers. Remove caps from the inspection crosses associated with both LWCs and flush out piping connected to boiler. Reinstall caps.

Fireside Inspection

1) Check gas burners for presence of dirt, lint, or foreign matter. Be sure of ports, gas passages and air passages are free of obstructions.

2) Check the fireside of furnace and firetubes for any evidence of soot formation or corrosion. Evidence of soot formation is a sign of improperly adjusted combustion. Brush and vacuum the furnace and fire tubes, if such conditions exist.

3) Check condition of all heat extractors. These devices can be pulled out individually from each of the firetubes and cleaned if necessary. Repair or replace if necessary.

4) Check flue door gaskets and other gaskets to make sure that they are in good condition and that they are properly secured. Replace, if required, the flue door gaskets. An ineffective seal may allow flue gases to escape into the boiler room and result in burned gaskets and warped flue doors.

5) Verify the gas low and high limit switches. Record values in Attachment 3.

6) After the fireside and waterside surfaces have been inspected by the U&I system engineer and by the NBIC boiler inspector, and work is completed, close and secure front and rear flue doors. Reinstall hand hole and manifold covers if applicable; hook up all associated piping and refill boiler to proper level.

7) Clean out all Y-strainers and steam traps.

8) Open up condensate return tank. Inspect for deposits and clean, if necessary.

9) Grease plug valves on gas supply line. Use Slowserve for Nordstrom Valves Type 555 (-10 to 500 °F).

Post Maintenance

1) Complete checklist in Attachment 3.

2) Verify the settings for the following steam switches: lead, lag, low boiler pressure. There are three pressure switches on top of each boiler: the high pressure steam shutdown (High Limit) switch, the operating pressure control (OPC) switch, and Low NOx Cold Start Limit Control (CSLC) switch. Upon initial startup the CSLC switch is adjusted to a pressure above the OPC switch until the initial boiler parameters have been adjusted.

For all boilers except for Plant 12 (16-1491): the final set point configuration for the high pressure steam shutdown (High Limit) switch is 90 psig; the final set point configuration for the operating pressure control (OPC) switch is 80 psig; the final set point configuration for the Low NOx Cold Start Limit Control (CSLC) switch is 40 psig.

For the two boilers at Plant 12 (16-1491): the final set point configuration for the high pressure steam shutdown (High Limit) switch is 45 psig; the final set point configuration for the operating pressure control (OPC) switch is 40 psig; the final set point configuration for the Low NOx Cold Start Limit Control (CSLC) switch is 20 psig. All steam pressure switch set point verification must be performed with a calibrated boiler pressure gauge.

3) Verify the Low NOx Cold Start Limit Control switch. Set to the aforementioned values. Verification of this switch is performed after the initial settings. Verify that the low NOx damper control motor is operating, and that the auxiliary solenoid valve on the main gas valve line de-energizes (closes).

4) Check pilot burners and ignition equipment for proper condition and adjustment.

5) Visually check burner for proper combustion. Combustion analysis is verifiable only with a flue gas analyzer and is performed mainly on boilers with power burners. Adjust fuel/air mixture as needed. Refer to Attachment 1 for commissioning flue gas analysis results.

6) Complete the functional checklist on page 3 of Attachment 3.

Hold Point: U&I system engineer and NBIC boiler inspector needed for external boiler inspection. Give at least 7 days advance notice and coordinate with U&I system engineer.

7) Before the boiler is released to operations the U&I System engineer is to review and sign off on Attachment 3.

This procedure may only be worked in conjunction with a work control package that has been processed in accordance with the requirements contained in AP-WORK-002, Work Planning. The procedure may not be used as a stand-alone work control document.

The purpose of this procedure is to provide instructions for manual calibration of Differential Pressure (DP) Flow Transmitters. The procedure does not provide instructions for collecting calibration data automatically, as through the use of a Beamex Calibrator.

Personnel should be familiar with the following:

- *P330-2, Control and Calibration of Measuring and Test Equipment (M&TE)*
- *UI-PROC-71-10-255, Calibration of Pressure Indicators*

Work Steps

1 Applicability

The procedure applies to the following types of transmitters:

1. DP transmitters with voltage output devices and current output devices (4–20 mA)
2. DP flow transmitters used for water, air, and steam
   - It does not apply to transmitters for liquefied gasses or flammable liquids unless this use is reviewed and approved by the Instrumentation and Control (I&C) Superintendent.

2 Methodology

1. DP flow transmitters measure flow rate using differential pressure across a flow element (such as an orifice plate or annular element). The procedure is similar to UI-PROC-71-10-231, Calibration of Pressure Transmitters.
2. Calibration may be performed using air or water as the working fluid but is generally performed using air.
3. The air or water is applied at the same time to Pressure Standard and Test Article.
4. Data collected include the pressures applied to perform a 5-point calibration across the range of the pressure transmitter.
   a. Calibration points are selected at 0%, 25%, 50%, 75%, and 100% of scale.
   b. Data may be collected by increasing or decreasing pressure, at the discretion of the calibration technician or electrician.
5. Calibration sequence:
   a. "As-found" calibration data are collected to determine existing accuracy of the DP flow transmitter.
   b. Adjustments are made to the flow transmitter as necessary.
   c. "As-left" calibration data are collected.
6. If Test Article is inoperable or cannot be calibrated, place a REJECTED (black on red) or equivalent label on it.

   Note: The Beamex Calibrator System (not covered by this procedure) provides semi-automatic calibration of the transmitter and integrated measurement of the output signal. It can act as a level standard for the following level ranges:

   Port P1: 0 to 40 inches of water column (WC) (0 to 1.44 psig)

   Port P2: -160 to 160 inches of water column (WC) (0 to 5.7 psig)

   Port P3: -14.5 to 300 psig

   Additional ranges up to 900 psig are available using external modules that connect to the Beamex MC5 Calibrator, which may be used only when in current calibration, as verified by Calibration Coordinator.

3 Verify Instrument Calibrations

1. Verify that Pressure Standard is in current calibration and its calibration interval has not elapsed.
2. Verify that the multimeter is in current calibration and its calibration interval has not elapsed.

4 Calibration Steps

Record data on Form 60-10-110.2, UI Calibration Data Sheet (Attachment 1).

4.1 As-found Data

1. Inspect Test Article, and verify the following:

a. Good general condition

b. Good operating condition

c. Undamaged fitting threads, etc.

2. Record the following information on Form 60-10-110.2 :

a. Manufacturer

b. Model or style number

c. Identification number (e.g., serial number)

d. I&C file number if present

3. Record Pressure Standard information on Form 60-10-110.2 :

a. Manufacturer

b. Model or style number

c. Identification number (e.g., serial number)

d. Last calibration date

e. Calibration due date

f. Calibration organization

4. Open the vent valve on the test rig to ensure that all parts of the system are at atmospheric pressure.

5. Connect the “high side” of Test Article to the calibration rig in such a way that it is in parallel with Pressure Standard. Vent the “low side” of the flow transmitter to atmosphere.

6. Collect data:

a. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under “As-found,” 0% reading.

b. Apply 25% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust the pressure.

c. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under “As-found,” 25% reading.

d. Apply 50% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust the level

e. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under “As-found,” 50% reading.

f. Apply 75% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust the level.

g. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under “As-found,” 75% reading.

h. Apply 100% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.

k. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under "As-found," 100% reading.

7. Release pressure on Pressure Standard and Test Article.
8. Verify that Test Article reading returns to zero.

4.2 Adjust Zero and Span

This section applies to pressure (level) transmitters that have zero and span adjustments, as most do.

1. Adjust Test Article so that correct readings are obtained at 0 and 100% scale. Zero and span adjustments interact with each other, so multiple iterations may be required.

   Note: DP flow meters have non-linear scales on engineering units displays. Control Room indications will therefore match applied pressures only at the 0 and 100% data points. The current or voltage output at the transmitter, however, will follow applied pressure.

2. Before proceeding to next section, recheck Test Article scale readings at 0% and 100% to verify that they are correct.

4.3 As-left Data

1. Apply 0% scale to Test Article.
2. Collect data:
   a. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under "As-left Data," 0% reading.
   b. Apply 25% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust the pressure.
   c. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under "As-left Data," 25% reading.
   d. Apply 50% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust the pressure.
   e. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under "As-left Data," 50% reading.
   f. Apply 75% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust the pressure.
   g. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under "As-left Data," 75% reading.
   h. Apply 100% of scale level to Test Article and Pressure Standard. Read Pressure Standard to adjust the pressure.
   k. Record Test Article reading and Pressure Standard reading on Form 60-10-110.2 under "As-left Data," 100% reading.
3. Release pressure on Pressure Standard and Test Article.
4. Verify that Test Article reading returns to zero.

5 Acceptance Criteria

1. In general, the Test Article has passed calibration if the difference between the level Pressure Standard and Test Article is equal to or less than plus or minus one percent (+/- 1%) of Test Article full scale range at all calibration points.
2. Other accuracy requirements may be in effect for a particular instrument.
    a. For instance, an item may be considered calibrated if the difference between Pressure Standard and Test Article is equal to or less than specific acceptance criteria defined by engineering staff at all calibration points (using Form 60-10-110.1, Calibration Program Form).
3. Contact Calibration Coordinator if you are uncertain about applicable acceptance criteria.
4. If Test Article passes calibration, fill out a VERIFIED sticker, and affix the sticker to Test Article.
    a. The sticker may be applied to any location, but the front is preferred.
5. If Test Article fails calibration, affix a REJECTED sticker to Test Article.
    a. The sticker may be applied to any location, but the front is preferred.
    b. Do not return the instrument to the requestor. Deliver the instrument and calibration data to Calibration Coordinator for disposition.

This procedure may only be worked in conjunction with a work control package that has been processed in accordance with the requirements contained in AP-WORK-002, Work Planning. The procedure may not be used as a stand-alone work control document.

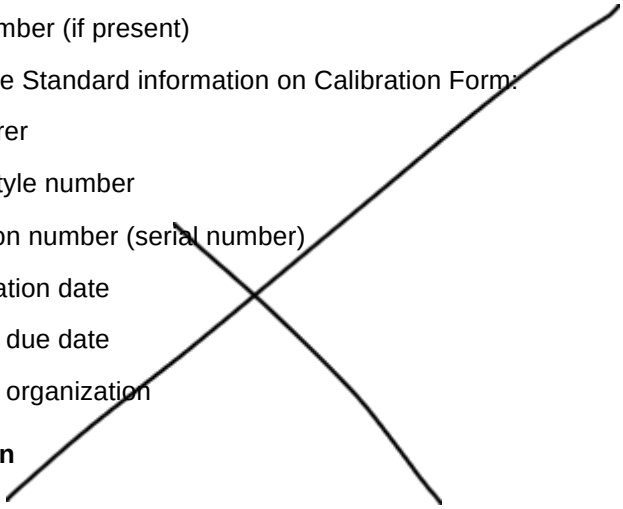
The purpose of this procedure is to provide instructions for calibration of Electronic Level Transmitters with voltage output, an output of 4–20 mA, and the ability to be used with water or other non-flammable liquids at or close to room temperature. The procedure may NOT be used for liquefied gasses or flammable liquids unless such use is reviewed and approved by I&C Superintendent. The procedure covers manual and semi-automatic calibration (using the optional Beamex MC5 Calibrator) but not automatic calibration (a capability the Beamex also possesses).

Work Steps

A. Equipment and Materials

1. Calibration Pressure Standard (Pressure Standard) with current NIST-traceable calibration appropriate to the range of Level Transmitter being calibrated (Test Article). (NIST stands for National Institute of Standards and Technology.)
   a. Calibration Pressure Standard must have an accuracy at least 4 times better than Test Article.
2. Multimeter or other device with current calibration status to accurately measure Pressure Standard transmitter output signal.

3. Optional: Beamex MC5 Calibrator with current calibration status. This instrument may be used in place of items 1 and 2.
    a. The Beamex system provides semi-automatic calibration of the Level Transmitter and integrated measurement of output signal.
    b. The Beamex system includes the capability to act as a Pressure Standard over certain level ranges, as follows:
        - Port P1: 0 to 40 inches of water column (0 to 1.44 psig)
        - Port P2: −160 to 160 inches of water column (0 to 5.7 psig)
        - Port P3: −14.5 to 300 psig
    c. Additional level ranges, up to 900 psig, are available using external modules that connect to the Beamex MC5 Calibrator.
4. Tubing, valves, and test rig to allow application of level to both Pressure Standard and Test Article.
5. Teflon tape or other pipe thread sealant aids.



B. General Items

1. The procedure must be performed in an atmosphere free of combustible gases.
2. Most Pressure Standards actually measure liquid level using the static head pressure of the liquid. This procedure is thus very similar to pressure sensor calibration.
3. Calibrations can be performed using air or water as the working fluid, but water is generally used.
4. To collect calibration data, pressures are applied at 5 selected points across the range of the Test Article. These points are 0%, 25%, 50%, 75%, and 100% of scale.
    a. Data may be collected on increasing or decreasing pressure, at the discretion of Calibration Technician or Electrician.
5. Working fluid is applied to Pressure Standard and Test Article at the same time.
6. Data are collected as follows:
    a. “As-Found” data are collected first to document existing accuracy.
    b. Adjustments are then made to Test Article if applicable (most Pressure Transmitters can be adjusted).
    c. Finally, after adjustment, “As-Left” calibration data are collected.
7. Use Level Pressure Transmitter Calibration Form 71-10-211.1 (Attachment 1).
8. If an instrument is found to be inoperable or cannot be calibrated, place a REJECTED (black on red) label or equivalent on instrument.

C. Preliminary Steps

1. Before you begin, either the Calibration Coordinator or the I&C Superintendent must review and verbally approve the applicability of this procedure to the Test Article.
2. Inspect Test Article—including fitting connections and general condition—and verify that it appears to be in good working condition.

3. Verify that Pressure Standard is in current calibration, as determined by the Calibration Coordinator.
4. Verify that the multimeter is in current calibration, as determined by the Calibration Coordinator.
5. If using Beamex Calibrator, verify that it is in current calibration, as determined by Calibration Coordinator.
6. Record Test Article information on Calibration Form:
    a. Manufacturer
    b. Model or style number
    c. Identification number (serial number)
    d. I&C file number (if present)
7. Record Pressure Standard information on Calibration Form:
    a. Manufacturer
    b. Model or style number
    c. Identification number (serial number)
    d. Last calibration date
    e. Calibration due date
    f. Calibration organization

D. Manual Calibration

D.1. As-Found Data

1. Open vent valve on test rig to ensure all parts of system are at atmospheric level.
2. Connect Test Article to test rig so that it is connected in parallel with Pressure Standard.
3. Record Test Article reading and Pressure Standard reading on Calibration Form under “As-Found,” 0% reading.
4. Apply 25% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
5. Record Test Article reading and Pressure Standard reading on Calibration Form under “As-Found,” 25% reading.
6. Apply 50% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
7. Record Test Article reading and Pressure Standard reading on Calibration Form under “As-Found,” 50% reading.
8. Apply 75% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
9. Record Test Article reading and Pressure Standard reading on Calibration Form under “As-Found,” 75% reading.
10. Apply 100% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.

11. Record Test Article reading and Pressure Standard reading on Calibration Form under “As-Found,” 100% reading.
12. Release pressure on Pressure Standard and Test Article.
13. Verify that Test Article reading returns to ZERO.

D.2. Adjust Zero and Span

1. Adjust Test Article so that proper readings are obtained at 0% and 100% scale.
    a. Most Pressure (Level) Transmitters have ZERO and SPAN adjustments, which are made at this time.
    b. ZERO and SPAN adjustments interact with each other, so multiple iterations may be required.
2. Verify proper reading at 0% and 100% of Test Article scale.

D.3. Calibration Data

1. Apply 0% scale to Test Article.
2. Record Test Article reading and Pressure Standard reading on Calibration Form under “Calibration Data,” 0% reading.
3. Apply 25% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
4. Record Test article reading and Pressure Standard reading on Calibration Form under “Calibration Data,” 25% reading.
5. Apply 50% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
6. Record Test article reading and Pressure Standard reading on Calibration Form under “Calibration Data,” 50% reading.
7. Apply 75% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
8. Record Test article reading and Pressure Standard reading on Calibration Form under “Calibration Data,” 75% reading.
9. Apply 100% of scale pressure to Test Article and Pressure Standard. Read Pressure Standard to adjust pressure.
10. Record Test Article reading and Pressure Standard reading on Calibration Form under “Calibration Data,” 100% reading.
11. Release pressure on Pressure Standard and Test Article.
12. Verify that Test Article reading returns to ZERO.

E. Acceptance Criteria

1. Test Article has passed calibration if the difference between Pressure Standard and Test Article readings is equal to or less than ± 1% of Test Article scale range at all calibration points.

    Note: Other accuracy requirements may be in effect for a particular instrument. An item is considered calibrated if the difference between Pressure Standard and Test Article is equal to or less than acceptance criteria defined by Engineering (using Calibration Form) at all calibration

points. Contact Calibration Coordinator if you are uncertain about the applicable acceptance criteria.

2. If Test Article passes calibration, fill out a VERIFIED sticker and affix it to Test Article. The sticker may be applied to any location, but the front is preferred.
3. If Test Article fails calibration, affix a REJECTED sticker to it. The sticker may be applied to any location, but the front is preferred.
   a. Do not return instrument to Requester.
   b. Deliver instrument and calibration data to Calibration Coordinator for disposition.

F. Follow-on

1. If problems are found, immediately notify appropriate personnel so corrective action can be taken.

   Will corrective action be required?

   ❑ Yes ❑ No

2. ❑ All tasks in this procedure have been completed.

This procedure may only be worked in conjunction with a work control package that has been processed in accordance with the requirements contained in AP-WORK-002, Work Planning. The procedure may not be used as a stand-alone work control document.

The purpose of this procedure is to provide instructions for calibration of Type J and Type K Thermocouple Temperature Transmitters with voltage output or with current output of 4–20 mA. The procedure covers manual calibration, when data collection and instrument adjustment are performed manually. It also covers semi-automatic calibration using a Beamex Calibrator. It does not cover Beamex automatic calibration.

Work Steps

1 General

1. To collect the calibration data, thermocouple signals are applied at 5 selected points across the range of the Thermocouple Temperature Transmitter (Test Article). These points are 0%, 25%, 50%, 75%, and 100% of scale.
   a. Data may be collected on increasing or decreasing signals of the Test Article, at the discretion of the Calibration Technician or Electrician.
2. Data are collected as follows:
   a. "As-Found" data are collected first to document existing accuracy.

b. Adjustments are then made to the Test Article.

c. Finally, after adjustment, “As-Left” calibration data are collected.

3. Enter data on Form 60-10-110.2, UI Calibration Data Sheet (Attachment 1).

2 Preliminary Steps

1. Inspect Thermocouple Temperature Transmitter—including fitting connections and general condition—and verify that it appears to be in good working condition.
2. Verify that the Thermocouple-Simulator Calibrator is in current calibration, as determined by Calibration Coordinator.
3. Verify that the Multimeter is in current calibration, as determined by Calibration Coordinator.
4. If using Beamex Calibrator, verify that the instrument is in current calibration, as determined by Calibration Coordinator.
5. Record the Thermocouple Temperature Transmitter (Test Article) information on Form 60-10-110.2:
   a. Manufacturer
   b. Model or style number
   c. Identification number (serial number)
   d. I&C file number (if present)
6. Record the Thermocouple-Simulator Calibrator (Calibration Standard) information on Form 60-10-110.2:
   a. Manufacturer
   b. Model or style number
   c. Identification number (serial number)
   d. Last calibration date
   e. Calibration due date
   f. Calibration organization

3 Manual Calibration

3.1 As-Found Data

1. Connect Test Article input to output of Calibration Standard. Note that the RED lead of thermocouples is NEGATIVE.
2. Turn on Calibration Standard and adjust output to 0% of transmitter range.
3. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under “As-Found,” 0% reading.
4. Adjust output of Calibration Standard to 25% of transmitter range.
5. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under “As-Found,” 25% reading.

6. Adjust output of Calibration Standard to 50% of transmitter range.
7. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "As-Found," 50% reading.
8. Adjust output of Calibration Standard to 75% of transmitter range.
9. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "As-Found," 75% reading.
10. Adjust output of Calibration Standard to 100% of transmitter range.
11. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "As-Found," 100% reading.
12. Adjust output of Calibration Standard to 0% of Test Article range.
13. Verify that Test Article reading returns to 0%.

3.2 Adjust Zero and Span

1. Adjust the Thermocouple Temperature Transmitter (Test Article) so that proper readings are obtained at 0% and 100% scale.
    a. Most Thermocouple Temperature Transmitters have ZERO and SPAN adjustments, which are made at this time.
    b. ZERO and SPAN adjustments interact with each other, so multiple iterations may be required.
2. Verify proper reading at 0% and 100% of Test Article scale.

3.3 Calibration Data

1. Adjust output of Calibration Standard to 0% of Test Article range.
2. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "Calibration data," 0% reading.
3. Adjust output of Calibration Standard to 25% of Test Article range.
4. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "Calibration data," 25% reading.
5. Adjust output of Calibration Standard to 50% of Test Article range.
6. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "Calibration data," 50% reading.
7. Adjust output of Calibration Standard to 75% of Test Article range.
8. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "Calibration data," 75% reading.
9. Adjust output of Calibration Standard to 100% of Test Article range.
10. Record Test Article reading and Calibration Standard reading on Form 60-10-110.2 under "Calibration data," 100% reading.
11. Adjust output of Calibration Standard to 0% of Test Article range.
12. Verify that Test Article reading returns to 0%.

4 Acceptance Criteria

1. The Thermocouple Temperature Transmitter (Test Article) has passed calibration if the difference between Thermocouple-Simulator Calibrator and Thermocouple Temperature Transmitter readings is equal to or less than +/- one (1) percent of the Thermocouple Temperature Transmitter scale range at all calibration points.

   Note: Other accuracy requirements may be in effect for a particular instrument. An item is considered calibrated if the difference between the Calibration Standard and the Test Article is equal to or less than acceptance criteria defined by Engineering (using Form 60-10-110.1, Utilities Calibration Program Form) at all calibration points. Contact Calibration Coordinator if you are uncertain about the applicable acceptance criteria.

2. If Test Article passes calibration, fill out a VERIFIED sticker and affix it to the Test Article. The sticker may be applied to any location, but the front is preferred.

3. If Test Article fails calibration, affix a REJECTED sticker to it. The sticker may be applied to any location, but the front is preferred.

   a. Do not return instrument to Requester.

   b. Deliver instrument and calibration data to Calibration Coordinator for disposition.

This procedure may only be worked in conjunction with a work control package that has been processed in accordance with the requirements contained in AP-WORK-002, Work Planning. The procedure may not be used as a stand-alone work control document.

The purpose of this procedure is to provide instructions for calibration of electronic pressure transmitters. This includes transmitters with current output (4 to 20 mA) and voltage output devices. The procedure applies only to pressure transmitters used for water, air, steam, or nitrogen service and is not to be used for combustible gas pressure transmitters or pressure transmitters used for oxygen service.

Work Steps

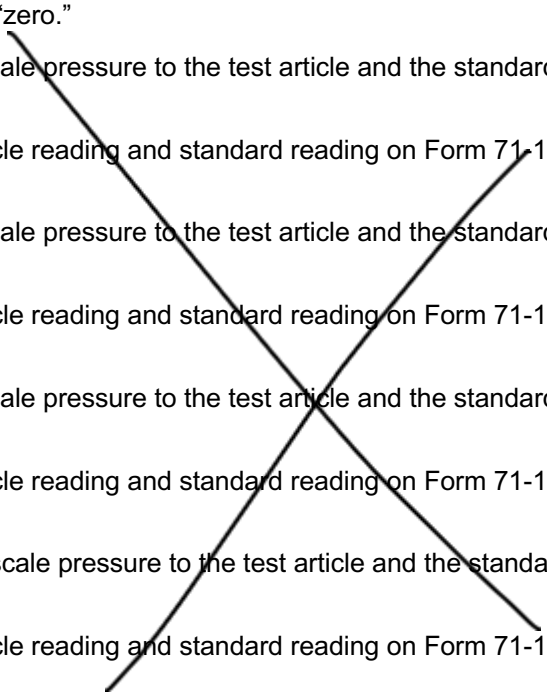
This section provides instructions for pressure transmitter calibration. "As-Found" data are first collected to document the existing accuracy. Then adjustments may be made to the pressure transmitter. Finally, "As-Left" calibration data are collected.

Data are the application of pressure to perform a 5-point calibration across the range of the transmitter. Calibration points are selected at 0%, 25%, 50%, 75%, and 100% of scale.

The working fluid is generally air for low pressures and water for higher pressures. The fluid is applied to the Pressure Standard and the test article at the same time and data are collected. The first set of data is collected before any adjustments and is referred to as the "As-Found" data. Adjustments are then made to the test article if applicable (most Pressure Transmitters can be adjusted). Final data after adjustment are referred to as "As-Left" calibration data.

Data may be collected on increasing or decreasing pressure at the discretion of the Calibration Technician or Electrician.

1 General Items



1. Use Appendix A, Form 71-10-231.1, Pressure Transmitter Calibration Form, to record data.
2. Verify the calibration interval of the Pressure Standard has not elapsed and the Pressure Standard is in current calibration.
3. Verify the calibration interval of the Multimeter has not elapsed and the Multimeter is in current calibration.
4. This procedure provides steps for “Manual” methods. In Manual methods, the adjustment of the standard, data collection, etc. is performed by the calibrating staff. The Beamex can be operated in “Automatic mode,” where the Beamex collects all calibration data. Operation in Automatic mode relieves the Operator from data collection duties. The Automatic process will be added to this instruction at a later date.

2 Manual Calibration

2.1 As-Found Data

1. Inspect the test article and verify that it appears to be in good working condition. Inspect fitting connections and general condition of the test article. If the test article was in water service, remove water using low pressure air (less than 50% of test article maximum pressure).
2. Record the test article information on Form 71-10-231.1:
    a. Manufacturer
    b. Model or style number
    c. Identification number (serial number)
    d. Instrumentation and Controls File number (if present)
3. Record the Pressure Standard information on Form 71-10-231.1:
    a. Manufacturer
    b. Model or style number
    c. Identification number (serial number)
    d. Last calibration date
    e. Calibration due date
    f. Calibration organization
4. Open the vent valve on the test rig to ensure all parts of the system are at atmospheric pressure.
5. Connect the test article to the calibration rig, such that it is in parallel connection with the Pressure standard.
6. Record test article reading and standard reading on Form 71-10-231.1 under “As-Found,” 0% reading.

Note: On some test articles, the “zero” marking is a marked width of acceptable “zero” reading, as shown below. In this case, if the pointer is within the limits of these markings, the data may be recorded as “zero.”

7. Apply 25% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
8. Record test article reading and standard reading on Form 71-10-231.1 under “As-Found,” 25% reading.
9. Apply 50% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
10. Record test article reading and standard reading on Form 71-10-231.1 under “As-Found,” 50% reading.
11. Apply 75% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
12. Record test article reading and standard reading on Form 71-10-231.1 under “As-Found,” 75% reading.
13. Apply 100% of scale pressure to the test article and the standard. Read the standard to adjust pressure.
14. Record test article reading and standard reading on Form 71-10-231.1 under “As-Found,” 100% reading.
15. Release the pressure on the standard and the test article.
16. Verify that the test article reading returns to “zero.”

2.2 Adjust Zero and Span

1. If applicable, adjust the test article so that proper readings are obtained at 0% and 100% scale. Most pressure transmitters have ZERO and SPAN adjustments, and these adjustments are made at this time. Note that ZERO and SPAN adjustments are interactive, multiple iterations may be required.
2. Verify proper reading at 0% and 100% of test article scale.

2.3 Calibration Data

1. Apply 0% scale to the test article.
2. Record test article reading and standard reading on Form 71-10-231.1 under “Calibration data,” 0% reading.
3. Apply 25% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
4. Record Test article reading and standard reading on Form 71-10-231.1 under “Calibration data,” 25% reading.
5. Apply 50% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
6. Record Test article reading and standard reading on Form 71-10-231.1 under “Calibration data,” 50% reading.

7. Apply 75% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
8. Record Test article reading and standard reading on Form 71-10-231.1 under "Calibration data," 75% reading.
9. Apply 100% of scale pressure to the test article and the standard. Read the standard to adjust the pressure.
10. Record test article reading and standard reading on Form 71-10-231.1 under "Calibration data," 100% reading.
11. Release the pressure on the standard and the test article.
12. Verify that the test article reading returns to "zero."

3 Acceptance Criteria

1. The test article has passed calibration if the difference between the Pressure Standard and the test article is equal to or less than ± 1% of the test article scale range at all calibration points.

   Note: Other accuracy requirements may be in effect for a particular instrument. An item is considered calibrated if the difference between the Pressure Standard and the test article is equal to or less than acceptance criteria defined by engineering staff (using Calibration Form 71-10-231.1) at all calibration points. Contact the Calibration Coordinator if you are uncertain regarding the applicable acceptance criteria.
2. If the test article passed calibration, fill out a "verified" sticker, and affix the sticker to the test article. The sticker may be applied to any location, although the front is preferred.
3. If the test article fails calibration, affix a "REJECTED" sticker to the test article. The sticker may be applied to any location, although the front is preferred. Do not return the instrument to the requestor. Deliver the instrument and calibration data to the Calibration Coordinator for disposition.

4 Follow-on

1. If problems are found, immediately notify appropriate personnel so corrective action can be taken.

This procedure may only be worked in conjunction with a work control package that has been processed in accordance with the requirements contained in AP-WORK-002, Work Planning. The procedure may not be used as a stand-alone work control document.

The purpose of this procedure is to provide general guidelines for performing routine calibration of pressure switches.

Before using this calibration procedure, its applicability to the pressure switch in question must be reviewed and verbally approved by I&C Calibration Coordinator or Superintendent.

There are many types of pressure switches in service at LANL, so it is essential to review all work-request documentation, in addition to this procedure, to ensure a firm understanding of the task at hand.

Work Steps

1 General

1. Calibration of a pressure switch is accomplished by applying a known pressure below the trip point of the switch and slowly changing the pressure until the switch trips. The pressure is then changed slowly in the opposite direction until the switch resets.
   - Switches can trip on increasing or decreasing pressure.
   - Trip and reset pressure are generally not the same, due to hysteresis in the switch.

2. Obtain the range, setpoint, direction, and tolerance for a given calibration from I&C Calibration Coordinator.
    - This information will have been previously defined by UI Engineering.
3. Lockout/tagout (LO/TO) and/or Confined Space Permit may be required for some equipment.
    - These operations are not covered in this procedure. Refer to P101-3, Lockout/Tagout for Hazardous Energy Control, and P101-27, Confined Spaces.
4. Contact with and notification of Operations personnel may be required.
    - Contact and notification requirements vary; follow the requirements specific to the equipment and the facility.
5. If the pressure switch is inoperable or cannot be calibrated, place a REJECTED (black on red) or equivalent label on instrument.
6. Use Attachment 1, Form 71-10-232.1, Switch Calibration Form, to record information and data during this procedure.

2 Initial Steps

1. Obtain proper switch calibration data specific to the switch to be calibrated from I&C Calibration Coordinator.
2. Obtain a calibrated DVM.
3. Obtain calibrated pressure standard. Record information onto Form 71-10-232.1.
4. Perform notification as required to remove switch from service.
5. Determine if hazardous voltage (greater than 50 volts) or pressure is present at the switch to be calibrated, and take appropriate measures to mitigate the hazard through LO/TO.
    - Optionally, the switch may be removed from the system and bench calibrated if desired.
6. Disconnect switch leads from process and connect the switch to DVM.
7. Set DVM to measure resistance or continuity.
8. Attach pressure source and calibration pressure standard to switch.
9. Determine if switch operates on increasing or decreasing pressure.

3 As-found Data Collection

1. Using DVM, determine whether switch is open or closed.
2. Note the result (whether switch is open or closed) and whether the DVM indication matches the switch condition.
3. Attach Calibrator to switch and adjust Calibrator to put switch in its normal operating position.
4. Note reading of the DVM, and make sure it shows proper indication.
5. Slowly adjust Calibrator to cause switch to trip.
6. Record actual trip pressure and direction on Form 71-10-232.1.
7. Slowly adjust Calibrator to cause switch to reset.
8. Record actual reset pressure and direction on Form 71-10-232.1.

4 Switch Adjustment

1. Using calibrated pressure standard, adjust switch point of the switch to required calibration parameters as provided by the I&C Calibration Coordinator.
2. Note that the trip point may be adjustable, but the reset point may not be, due to hysteresis.

5 As-left Data Collection

1. Using DVM, determine whether switch is open or closed.
2. Note the result (whether switch is open or closed) and whether the DVM indication matches the switch condition.
3. Attach Calibrator to switch and adjust Calibrator to put switch in its normal operating position.
4. Note reading of the DVM, and make sure it shows the proper indication.
5. Slowly adjust Calibrator to cause switch to trip.
6. Record actual trip pressure and direction on Form 71-10-232.1.
7. Slowly adjust Calibrator to cause switch to reset.
8. Record actual reset pressure and direction on Form 71-10-232.1.

6 Return Switch to Service

1. Disconnect calibration pressure source from switch and reconnect system piping.
2. Remove DVM from switch and reconnect switch leads back to the proper places on the terminal strip.
3. Return switch to normal service.
4. Notify facility that the switch is back in service.

7 Follow-on

1. Ensure proper operation of the pressure switch. If any problem is found, notify appropriate personnel so corrective action can be taken.

This procedure may only be worked in conjunction with a work control package that has been processed in accordance with the requirements contained in AP-WORK-002, Work Planning. The procedure may not be used as a stand-alone work control document.

The purpose of this procedure is to provide instructions for performance of the Annual Boiler Waterside/Fireside Checklist at the TA-09/16 Steam Plants.

Work Steps

A. Preliminary Items

1. Required boiler training and qualifications:
   a. Boiler Operator: New Mexico Construction Industries Journey Classification as a Journeyman Boiler Operator – High Pressure BO2 (NMAC 14.6.6)

      Note: Boiler Operator Trainee may not operate any boiler devices unless under the direct observation of a Journeyman Boiler Operator (NMAC 14.9.4.29).

   b. Pressure Safety Orientation – Course #769 (LANL P101-34)

c. Pressure Safety Advanced – Course #11459 (LANL P101-34)

d. Boiler maintenance crew performing low-NOx verification: boiler training from Sellers Engineering Company or local manufacturer's representative

2. Equipment, tools, instruments:

- Flue gas analyzer
- Calibrated boiler pressure gauge

Record calibration dates on Boiler Checklist (Attachment 1).

3. Supplies, materials:

- Mobil Polyrex EM grease
- Slowserve grease

B. Boiler Overview

1. TA-09/16 Steam Plant Boilers are located at the following eight boiler plants: Plant 1 (TA-16-1480), Plant 4 (TA-16-1483), Plant 5 (TA-16-1484), Plant 8 (TA-16-1487), Plant 11 (TA-16-1490), Plant 12 (TA-16-1491), Plant 13 (TA-09-0282), and Plant 14 (TA-16-1492).
2. Boilers are Sellers Engineering Company Fire Tube Boilers, manufactured in 1995. Each has a Maximum Allowable Working Pressure (MAWP) of 150 psig. Supply natural gas pressure is nominally 5 psig. Attachments 2 and 3 contain boiler technical information.
3. Inspection and maintenance consists of the following:
   a. Testing or replacing pressure relief safety valves
   b. Waterside and fireside boiler inspection
   c. Cleaning of debris or scaling found inside the boiler
   d. Inspection of various plant components
   e. Steam gauge calibration
   f. Internal and external inspection by a National Board Inspection Code (NBIC) Boiler Inspector
4. Boiler output pressure: 80 psig

   Exception: Boiler output pressure for two boilers at Plant 12 (TA-16-1491): 40 psig
5. There are three pressure switches on top of each boiler: high pressure steam shutdown (High Limit) switch; operating pressure control (OPC) switch; Low-NOx cold start limit control (CSLC) switch.
6. Final settings for all boilers except two at Plant 12 (TA-16-1491):
   a. High pressure steam shutdown (High Limit) switch: 90 psig

b. Operating pressure control (OPC) switch: 80 psig

c. Low-NOx steam pressure (CSLC) switch: 40 psig

Exception: Final settings for two boilers at Plant 12 (TA-16-1491):

a. High pressure steam shutdown (High Limit) switch: 45 psig

b. Operating pressure control (OPC) switch: 40 psig

c. Low-NOx steam pressure (CSLC) switch: 20 psig

7. All steam pressure switch setpoint verification must be performed with a calibrated boiler pressure gauge.
   - All gauges used for pressure switch setpoints must have calibration dates, which are to be recorded on Attachment 1 checklist.
8. There are four pressure switches at the steam header: the lead, the lag, and the two low-pressure switches.
9. For all boilers, set the switches to control the lead/lag feature of the boiler.
10. Verify that all pressure switches perform their intended function.
    - If the pressure setting on a switch varies by more than 20% of the boiler pressure gauge, the switch must be replaced.
11. After final tuning of the boiler parameters, adjust the air flow proving switch to about 2 inches water column below the blower pressure setting.
12. Flue gas analyzer will be needed for two scenarios: light off and Low-NOx boiler settings. Record the O2, CO, NOx, temperature, and efficiency. The boilers are to be run in the Low-NOx mode to be compliant with manufacturer's instructions.
13. Complete the checklists in Attachment 1 before the boiler is released by UI Engineering to UI Operations. The UI System Engineer must be alerted for inspection of boiler components—specifically the Hold Points below.

C. Inspection/Maintenance

1. Remove and replace the Kunkle pressure relief valves. New pressure relief valves can be purchased and Attachment 2 identifies the pressure relief valves to order. If new valves are not purchased, test and repair the pressure relief valves in accordance with the Engineering Standard Manual Chapter 17.
2. Lubricate motor bearings as follows:
   a. Grundfos boiler feed pumps: lubricate the Baldor motor with Polyrex EM (Mobil) grease.
   b. Baldor blower motor: lubricate with Polyrex EM (Mobil) grease.
3. Clean any debris accumulated on the Neptune/Leeson chemical feed pumps and the GE/Neptune chemical mixing motors.
4. Clean out each main burner with a bottle washer.

5. Check the Low-NO_X solenoid for proper operation.

6. Drill the pilot manifolds with a #53 drill bit and adjust the pilot manifold position in accordance with the Seller's Owners' Manual.

D. Waterside Inspection

1. Open flue door and inspect tube sheets for water leakage. It tube leakage is suspected call the system engineer for further evaluation. The narrow ligaments between tube holes are subject to tremendous stresses and should be watched for any sign of cracking mainly due to overheating.

2. Drain boiler and remove all hand hole and manhole covers, where applicable, to allow a visual check of all internal accessible areas. Example: shell, tubes and tube sheets.

   HOLD POINT:

   UI System Engineer and Chemical Treatment Company Representative are needed for external boiler inspection. Give at least 7 days advance notice and coordinate with UI System Engineer.

3. Carefully examine waterside surfaces using a strong light and mirror where required. Look for evidence of scale, corrosion, blisters, or pitting, indicating adequacy of water treatment.

4. Use a high pressure hose to wash sediment out of the bottom and other internals of the boiler.

   HOLD POINT:

   UI System Engineer and NBIC Boiler Inspector are needed for internal boiler inspection. Give at least 7 days advance notice and coordinate with UI System Engineer.

5. Remove both head covers from the bodies of the two float operated low water cut-offs (LWCs). The float-assembly and mercury switches are located on these heads. Flush out both LWC bodies. Inspect floats and replace if necessary. Reinstall head covers. Remove caps from the inspection crosses associated with both LWCs and flush out piping connected to boiler. Reinstall caps.

E. Fireside Inspection

1. Check gas burners for presence of dirt, lint, or foreign matter. Be sure of ports, gas passages and air passages are free of obstructions.

2. Check the fireside of furnace and fire tubes for any evidence of soot formation or corrosion. Evidence of soot formation is a sign of improperly adjusted combustion. Brush and vacuum the furnace and fire tubes, if such conditions exist.

3. Check condition of all heat extractors. These devices can be pulled out individually from each of the fire tubes and cleaned if necessary. Repair or replace if necessary.
4. Check flue door gaskets and other gaskets to make sure that they are in good condition and that they are properly secured. Replace, if required, the flue door gaskets. An ineffective seal may allow flue gases to escape into the boiler room and result in burned gaskets and warped flue doors.
5. Verify the gas low and high limit switches. Record values in Attachment 1.
6. After the fireside and waterside surfaces have been inspected by the UI system engineer and by the NBIC boiler inspector, and work is completed, close and secure front and rear flue doors. Reinstall hand hole and manifold covers if applicable; hook up all associated piping and refill boiler to proper level.
7. Clean out all Y-strainers and steam traps.
8. Open up condensate return tank. Inspect for deposits and clean, if necessary.
9. Grease plug valves on gas supply line. Use Slowserve for Nordstrom Valves Type 555 (-10°F to 500°F).

F. Post-Maintenance

1. Complete checklist in Attachment 1.
2. Verify the settings for the following steam switches: lead, lag, low boiler pressure.
3. There are three pressure switches on top of each boiler: the high pressure steam shutdown (High Limit) switch, the operating pressure control (OPC) switch, and Low-NO_X Cold Start Limit Control (CSLC) switch.
4. Upon initial startup the CSLC switch is adjusted to a pressure above the OPC switch until the initial boiler parameters have been adjusted.
5. Final setpoint configurations:

   a. For all boilers [except two boilers at Plant 12 (16-1491)]:

   - High pressure steam shutdown (High Limit) switch: 90 psig
   - Operating pressure control (OPC) switch: 80 psig
   - Low-NO_X Cold Start Limit Control (CSLC) switch: 40 psig

   b. For the two boilers at Plant 12 (16-1491):

   - High pressure steam shutdown (High Limit) switch: 45 psig
   - Operating pressure control (OPC) switch: 40 psig
   - Low-NO_X Cold Start Limit Control (CSLC) switch: 20 psig

   All steam pressure switch setpoint verification must be performed with a calibrated boiler pressure gauge.

6. Verify the Low-NO_X Cold Start Limit Control switch.
   a. Set to the values above.
   b. Verification of this switch is performed after the initial settings.
   c. Verify that the Low-NO_X damper control motor is operating, and that the auxiliary solenoid valve on the main gas valve line de-energizes (closes).
7. Check pilot burners and ignition equipment for proper condition and adjustment.
8. Visually check burner for proper combustion.
   a. Combustion analysis is verifiable only with a flue gas analyzer and is performed mainly on boilers with power burners.
   b. Adjust fuel/air mixture as needed.
   c. Refer to Attachment 2 for commissioning flue gas analysis results.
9. Complete the functional checklist on page 3 of Attachment 1.

HOLD POINT:

UI System Engineer and NBIC Boiler Inspector are needed for external boiler inspection. Give at least 7 days advance notice and coordinate with UI System Engineer.

10. Before the boiler is released to Operations, UI System Engineer must review and sign off on Attachment 1.
    - Ensure correct operation. If problems are found, immediately notify appropriate personnel so corrective action can be taken.

- ☒ Security Clearance Requirements
- ☒ Co-located Hazards/Concerns
- ☒ Check out at End of Work
- ☐ Escort Required
- ☐ Other Bounding Conditions: ____
- ☐ FOD-designated facility Point-of-Contact must sign IWD Part 3
- ☒ Check in at Start of Work
- ☒ Work must be Scheduled
- ☒ Other Security Requirements (ex.: Cellphone, No Foreign Nationals, etc.)
- ☐ Quality Issues
- ☐ Review under Authorization Basis (AB)/Safety Basis/Unreviewed Safety Question (USQ)
- ☒ Work-Area Training Required
- ☒ Check in Daily
- ☒ Check out Daily

Additional Comments

Potential Contact with HE Transport Vehicles. Be aware of Vehicle Placards.

ABNORMAL EVENTS: Any injury, accident, spill, off normal occurrence, etc. MUST be reported immediately to the WFO-FOD Duty Officer @ 664-2926 AND TA-16 Access Control Office 7-9192

Instructions: In the block below, identify work-area hazards that could potentially affect the worker(s) or others. Specify the facility controls and preventive measures that must be implemented by the worker(s) to protect against the site hazards as well as any special training required.

ESH/S&S WORK AREA HAZARDS & CONTROLS

Work Area Hazards/Concerns Identify site hazards and concerns that could potentially affect the worker(s) or others.	**Work Area Hazard Present**	**Facility Controls/ Preventive Measures/ Bounding Conditions** Specify preventive measures, controls and bounding conditions for each site hazard	**Reference Documents** List permits, operating manuals, and other reference procedures	**Training and Qualification** List training requirements (P300, Integretated Work Management, Section 6.1)
☐ **No Work Area Hazards**				
Ionizing Radiation Work in posted radiological areas, work with radioactive materials, or work on or near radiation producing devices. **Specify Hazard:**	☐ Yes ☒ No	• N/A	• N/A	• N/A
Worker Exposure Working near non-ionizing radiation, beryllium, noise, chemicals, hazardous biological materials, lead, asbestos, temperature/humidity extremes, or high explosives. **Specify Hazards:**	☐ Yes ☒ No	• N/A	• N/A	• N/A
Energized and Operative Systems Working near energized electrical parts, pressure systems, steam lines; near unprotected belts, pulleys, chains or rotating equipment; fuel fired equipment other than vehicles; or spark or flame producing operations. **Specify Hazards:**	☐ Yes ☒ No	• N/A	• N/A	• N/A
Confined Spaces Entry into tanks, manholes, cooling towers, sumps, or any other area with potentially low oxygen concentration or other hazards such as toxic vapors or engulfment. **Specify Hazards:**	☐ Yes ☒ No	• N/A	• N/A	• N/A
Elevated Work Surface Elevated work when fall protection is not provided by conventional handrail systems or required per P101-20, *Fall Protection Program*	☐ Yes ☒ No	• N/A	• N/A	• N/A
ESH/S&S WORK AREA HAZARDS & CONTROLS				
Environmental Impact Activities conducted in areas containing potential release site, contaminated soil, sensitive species, watercourse wetlands, floodplain, historical/archeological sites, or other work area condition that can be impacted by or can impact the environment. **Specify Hazards:** PRS, sensitive species – e.g. spotted owl, historical/archeological sites, and waste generation.	☒ Yes ☐ No	• PRS exists. Notify WFO Environmental Generalist, if required. • Archeological sites exist within open areas. Do not disturb any marked archeological sites. If entry into any area required contact	• Excavation Permit for soil disturbance activities	• Waste Generator Overview

		Environmental Stewardship Group. • Work during threatened and endangered species seasons will restricts outdoor activities.		
Security Requirements **Specify:** **Limited Security Area**	☒ Yes ☐ No	• Q or L clearance • Uncleared MUST be escorted	• P200-2, Physical Security • P200-1, Security Areas, Property Protection Areas, and General Access Areas	• Escort Training
Other Hazards **Specify:**	☐ Yes ☒ No	• N/A	• N/A	• N/A

I have verified that the hazards identified above adequately identify the area hazards and that the IWM process has been applied appropriately.

FOD or Representative (Signature/Z #/Date) **Approval Required** WFO OM/Designee Signature-on-File

Date Approval Expires: 9/30/2020

BOILER INSPECTION REPORT (BIR)

NBIC NB-23, Part 2 (This report to be completed by LANL Commissioned Inspector)

SECTION I – BOILER INFORMATION

Boiler ID#:	16-1484-BS-B	Insp Date: 10/14/2020	**Expiration Date:** 10/14/2021
Boiler Area:	TA16, Bldg 1484	Ext. Inspection: ☒	Int. Inspection: ☐
National Board No.:	8333	Serial No.:	10290
Boiler Mfg.:	Sellers Engineering	Year Built:	1995
Boiler Type:	Steam ☒ Hot Water ☐ Others ☐	Firetube ☒	Watertube ☐
Safety Relief Valve (s) ID#:		Safety Valve (s) Size:	2" , 1.5" , _____ ,
Set Press:	1. 100 2. 100 3. _____ (PSI)	Capacity:	1. 4593 2. 2948 3. _____ (lbs/hr)
Safety Valve (s):	Last Tested ☐ "VR" ☐ Replaced ☒	Date:	1. 6/24/20 2. _____ 3. _____ ,
Pressure Gauge Range:	0 to 160	Heating Surface Area (sqft):	636
Boiler MAWP:	150 (PSI)		
Pressure Allowed:	This Inspection: 100 (PSI)	Previous Inspection: 100 (PSI)	
Fuel:	NG	Method of Firing:	Auto
Inspection Finding:	Major ☐ Minor ☐	Permit Issued:	Yes ☐ No ☒

SECTION II – EXTERNAL/INSERVICE INSPECTION CONDITIONS

Planning, Coordination and Safety Requirements –

No Lockout/Tagout, this is an in-service inspection.

External Casing (cracks, leakage of fluids or combustion gases …) –

No adverse conditions

Safety Valve (s) Testing and Conditions –

Good-new SV, MSVRC 5,088 lbs/hr per ASME Code, Section I, PG-70. Two SV's installed capacity 7,541 Lbs/hr, therefor acceptable.

Hangers and boiler supports Conditions –

None-good

Piping External Surfaces Conditions –

Good

Controls (Firing, Flame Detector, valves, …) Functionality Test –

All boilers controls, pressure controls, fuel train, flame failure, SSOV test Good

Low Water Cutoff Alarm Test –

All boilers controls, pressure controls, fuel train, flame failure, SSOV test Good

Other Observations / Notes –

None

SECTION III – INTERNAL INSPECTION CONDITIONS

Is the boiler prepared, drained and cleaned for internal inspection?	N/A	Yes ☐	No ☒	
Is the fuel shutoff valve locked and tagged?	N/A	Yes ☐	No ☒	
Is the boiler isolated from other boilers?	N/A	Yes ☐	No ☐	N/A ☒
Is the boiler atmosphere being monitored for safe entry (Boilers w/manway)?		Yes ☐	No ☐	N/A ☒

Is the boiler hydro tested for leaks? Yes ☐ No ☒	Pressure Test: PSIG

SECTION IV – FIRESIDE

Fire Box, Refractory, Burners, Flame Detectors Conditions –

In-Service inspection, did not inspect fireside or waterside.

Tubes External Condition (Pitting, bulging, misalignment, soot built up …) Watertube Boilers Only –

In-Service inspection, did not inspect fireside or waterside.

Tubesheets Condition (Bulging, leaks around the tubes connections, Cracks in the ligaments and weld joints) –

In-Service inspection, did not inspect fireside or waterside.

Staybolts Testing – In-Service inspection, did not inspect fireside or waterside.
Other Observations / Notes – N/A
SECTION V – WATERSIDE
Tubes External Surfaces, if possible internal surfaces – In-Service inspection, did not inspect fireside or waterside.
Water Columns, Gage Glasses, Floats Chambers Internal Surfaces or Low Water Level Rods Condition – Good
Superheater Tubes External Surfaces (Power boilers Only) – N/A
Steam Drum/Vessel Internal Surfaces (If electric boilers the condition of the electric resistant coils) – In-Service inspection, did not inspect fireside or waterside.
Mud Drum Internal Surfaces (Power boilers) – N/A
Deaerator Tank Internals (Power boilers) – N/A

Deaerator Storage Tank (Power boilers) – None
Any Repairs or Alteration Since Last Inspection (All repairs and Alteration requires 'R' Stamp R-1 or R-2 Form) – None
water Chemistry Last Checked / Notes – Unknown
SECTION VI – DEFICIENCIES SUMMARY
None
SECTION VII – RECOMMENDATIONS
None

Person Conditions Reported To and/or FSR #, If Issued: Jason Sparks	Z# 122088	Phone No.: c 500 6436, p 664 6262

Additional Comments

ACCESS CONTROL: Work within the TA-16 HE Area requires check-in first with TA-16 ACO at TA-16 Building 969. The single most important requirement that all personnel must understand is that a closed gate or other barrier must never be crossed.

CAUTION: This area is a High Explosives Area. Work group shall adhere to all local ACO instructions as to where access is allowed and where it is restricted, e.g. areas around HE facilities and magazines.

CAUTION: Non-LANS workers (outside contractors) require a HE waiver (see P101-8) to work within intraline distance of High Explosive materials if work takes longer than 8 hours.

PIC Pre-Job Brief Instructions:

For all Low and Moderate Hazard work activities, the PIC shall perform a pre-job brief prior to work start and for any new member of the work group prior to that member beginning work. For all High Hazard activities, the PIC shall perform a pre-job brief prior to work start on EVERY Day/Shift of the activity and for any new member of the work group prior to that member beginning work.

ABNORMAL EVENTS: Any injury, accident, spill, off normal occurrence, etc. MUST be reported immediately to the WFO-FOD Duty Officer @ 664-2926 AND TA-16 Access Control Office 7-9192

Instructions: In the block below, identify work-area hazards that could potentially affect the worker(s) or others. Specify the facility controls and preventive measures that must be implemented by the worker(s) to protect against the site hazards as well as any special training required.

Form 2101

Integrated Work Document (IWD) Part 2, FOD Requirements and Approval for Entry and Area Hazards and Controls

Non-Tenant Activity Form

IWD No./Work Request No: _____ Revision #: _____

Facility Operation Director (FOD) must determine the facility entry and coordination requirements and identify the Environment, Safety, Health (ESH)/Security and Safeguards (S&S) hazards and controls associated with the activity location.

FOD 8	TA 9/16	Bldg. All Steam Boiler Plants (1480,1481,1483,1484,1486,1487,1488,1490, 1491 & 1492)	Room ALL	Other Location Inside Boiler Plants
FOD Designated Facility Point-of-Contact	Name Pablo C de Vaca	Phone 699-8226	Pager N/A	Email pfc@lanl.gov

Entry and Coordination Requirements (*Check one or more of the following*)

- ☐ No Entry/Coordination Requirements
- ☒ Plan of the Day/Plan of the Week (POTD/POTW)
- ☒ Security Clearance Requirements
- ☐ Co-located Hazards/Concerns
- ☒ Check out at End of Work
- ☐ Escort Required
- ☐ Other Bounding Conditions: _____
- ☐ FOD-designated facility Point-of-Contact must sign IWD Part 3
- ☒ Check in at Start of Work
- ☒ Work must be Scheduled
- ☐ Other Security Requirements (ex.: Cellphone, No Foreign Nationals, etc.)
- ☐ Quality Issues
- ☐ Review under Authorization Basis (AB)/Safety Basis/Unreviewed Safety Question (USQ)
- ☒ Work-Area Training Required
- ☒ Check in Daily
- ☒ Check out Daily

Additional Comments (refer to Job Hazard Analysis [JHA] Tool Facility Notes)

All work must be approved by the Utilities FOD or UI-OPS. POD/POTW-contact Facility POC. No Smoking around Natural Gas Systems. Evaluate inside floor and housekeeping conditions to safely proceed with activities. Observe safety signs and floor markings in all buildings and areas. If activities involve potential exposure to Water Treatment Chemicals consult with UI Safety/IH representatives to identify proper PPE. Be aware of pipe or any components on floors for tripping hazards, If insect or pests are excessive contact pest control to address.

Instructions: In the block below, identify work-area hazards that could potentially affect the worker(s) or others. Specify the facility controls and preventive measures that must be implemented by the worker(s) to protect against the site hazards as well as any special training required.

ESH/S&S WORK AREA HAZARDS & CONTROLS				
Work Area Hazards/Concerns Identify site hazards and concerns that could potentially affect the worker(s) or others.	**Work Area Hazard Present**	**Facility Controls/ Preventive Measures/ Bounding Conditions** Specify preventive measures, controls and bounding conditions for each site hazard	**Reference Documents** List permits, operating manuals, and other reference procedures	**Training and Qualification** List training requirements (P300, Integretated Work Management, Section 6.1)
☐ **No Work Area Hazards**				
Ionizing Radiation	☐ Yes ☒ No			

Work in posted radiological areas, work with radioactive materials, or work on or near radiation producing devices. **Specify Hazard:**				

IWD No./Work Request No: _____ Revision #: _____

ESH/S&S WORK AREA HAZARDS & CONTROLS				
Work Area Hazards/Concerns Identify site hazards and concerns that could potentially affect the worker(s) or others.	**Work Area Hazard Present**	**Facility Controls/ Preventive Measures/ Bounding Conditions** Specify preventive measures, controls and bounding conditions for each site hazard	**Reference Documents** List permits, operating manuals, and other reference procedures	**Training and Qualification** List training requirements (P300, Integretated Work Management, Section 6.1)
Worker Exposure Working near non-ionizing radiation, beryllium, noise, chemicals, hazardous biological materials, lead, asbestos, temperature/humidity extremes, or high explosives. **Specify Hazards:** Working near chemicals, temperature/humidity extremes: High temperature boiler equipment, High temperature Water/Steam, Boiler Water Treatment Chemicals	☒ Yes ☐ No	Required PPE: Hard hat, safety shoes, safety glasses. Hearing protection (noise > 85 dba). Avoid hot surfaces and piping. Long sleeve shirt,Ansell sleeves or coveralls when working on hot surfaces. Gloves when operating valves or contacting pipe/fitting openings where there is potential for hot water/ steam release.Be aware of chemical containers and check labeling. Be aware of piping, associated systems for any leaks. If chemical leak is noticed contact operations manager, IH&S Rep during regular working hrs. Over 5 gallon chemical spill leave area, call EM&R, and control access. Follow LANL Asbestos program/rqmts if PACM identified outside containment. For after-hours contact the UI Duty Officer, 699-7452 to re-assess any abnormal situation.	•P101-6 PPE •P101-31 Hearing Conservations/ Noise Program HAZCOM (Chemical Hazard Communication) Course # 25418 Chemical MSDS's	•LANL PPE or equivalent •Hearing protection •Site specific training •Hazcom •Read Chemical MSDSs

Energized and Operative Systems Working near energized electrical parts, pressure systems, steam lines; near unprotected belts, pulleys, chains or rotating equipment; fuel fired equipment other than vehicles; or spark or flame producing operations. **Specify Hazards:**	☒ Yes ☐ No	Stay within established walking areas. Observe safety signage alarm lights and floor markings Identify explosive hazards and follow task specific IWD if working on plant equipment or components. If questions consult with UI system engineer, Operation Mgr. Designee, or Safety rep.	P101-13 Electrical Safety P101-3 LO/TO P101-34 Pressure, Vacuum, and Cryogenic System.	Electrical Safety LOTO if applicable to task. •Pressure Safety Awareness Read P315 admin lock/tag.
Confined Spaces Entry into tanks, manholes, cooling towers, sumps, or any other area with potentially low oxygen concentration or other hazards such as toxic vapors or engulfment. **Specify Hazards:**	☐ Yes ☒ No			
Elevated Work Surface Elevated work when fall protection is not provided by conventional handrail systems or required per P101-20, *Fall Protection Program*	☒ Yes ☐ No	Stay within established walking areas, stairways and paths. Observe safety signage. Follow LANL Fall Protection Requirements if task on roofs or work above 4 feet.	P101-20.0	Fall Protection
Environmental Impact Activities conducted in areas containing potential release site, contaminated soil, sensitive species, watercourse wetlands, floodplain, historical/archeological sites, or other work area condition that can be impacted by or can impact the environment. **Specify Hazards:**	☐ Yes ☒ No			
Security Requirements **Specify:**	☒ Yes ☐ No	Uncleared must have Q or L escort and must sign in/out @ 16-0969/09-0021 Access Control. Meet WFO access requirements.	P200-2 Physical Security	Escort Training LANL Course # 18366
Other Hazards **Specify:** Look-alike Equipment in the vicinity of work site may contain un-controlled hazardous energy.	☒ Yes ☐ No	Adequette barriers and controls will be stablished to prevent unauthorized personnel/workers from entering job site	IWD	Pre-job briefing emphasis. Worker confirmation of look-alike potential hazards, locations and barriers set in place to identify those potential hazards.

		and encounter uncontrolled hazards.		

I have verified that the hazards identified above adequately identify the area hazards and that the IWM process has been applied appropriately.

FOD or Representative (Signature/Z #/Date) **Approval Required** Pablo F. CdeVaca Digitally signed by Pablo F. CdeVaca DN: cn=Pablo F. CdeVaca, o=LANS, ou=UI, email=pfc@lanl.gov, c=US Date: 2017.06.26 12:00:18 -06'00'

Date Approval Expires: 09/30/2020

BOILER INSPECTION REPORT (BIR)

NBIC NB-23, Part 2 (This report to be completed by LANL Commissioned Inspector)

SECTION I – BOILER INFORMATION

Boiler ID#:	16-1484-BS-B	Insp Date: 6/24/2020	**Expiration Date:** 6/24/2021
Boiler Area:	TA16, Bldg 1484	Ext. Inspection: ☐	Int. Inspection: ☒
National Board No.:	8333	Serial No.:	10290
Boiler Mfg.:	Sellers Engineering	Year Built:	1995
Boiler Type:	Steam ☒ Hot Water ☐ Others ☐	Firetube ☒	Watertube ☐
Safety Relief Valve (s) ID#:		Safety Valve (s) Size:	2" , 1.5" , _____ ,
Set Press:	1. 100 2. 100 3. _____ (PSI)	Capacity:	1. 4593 2. 2948 3. _____ (lbs/hr)
Safety Valve (s):	Last Tested ☐ "VR" ☐ Replaced ☒	Date:	1. 6/24/20 2. _____ 3. _____ ,
Pressure Gauge Range:	0 to 160	Heating Surface Area (sqft):	636
Boiler MAWP:	150 (PSI)		
Pressure Allowed:	This Inspection: 100 (PSI)	Previous Inspection: 150 (PSI)	
Fuel:	NG	Method of Firing:	Auto
Inspection Finding:	Major ☐ Minor ☐	Permit Issued:	Yes ☐ No ☒

SECTION II – EXTERNAL/INSERVICE INSPECTION CONDITIONS

Planning, Coordination and Safety Requirements –

Lockout/Tagout verified

External Casing (cracks, leakage of fluids or combustion gases …) –

No adverse conditions

Safety Valve (s) Testing and Conditions –

Good-new, MSVRC 5,088 lbs/hr per ASME Code Section I, PG-70

Hangers and boiler supports Conditions –

None-good

Piping External Surfaces Conditions –

None, All new BEP

Controls (Firing, Flame Detector, valves, …) Functionality Test –

N/A

Low Water Cutoff Alarm Test –

Boiler shut down, N/A

Other Observations / Notes –

None

SECTION III – INTERNAL INSPECTION CONDITIONS

Is the boiler prepared, drained and cleaned for internal inspection?	N/A	Yes ☒	No ☐	
Is the fuel shutoff valve locked and tagged?	N/A	Yes ☒	No ☐	
Is the boiler isolated from other boilers?	N/A	Yes ☐	No ☐	N/A ☒
Is the boiler atmosphere being monitored for safe entry (Boilers w/manway)?		Yes ☐	No ☐	N/A ☒
Is the boiler hydro tested for leaks? Yes ☐ No ☒		Pressure Test:	PSIG	

SECTION IV – FIRESIDE

Fire Box, Refractory, Burners, Flame Detectors Conditions –

Good

Tubes External Condition (Pitting, bulging, misalignment, soot built up …) Watertube Boilers Only –

Good

Tubesheets Condition (Bulging, leaks around the tubes connections, Cracks in the ligaments and weld joints) –

Good

Staybolts Testing – Stays look good
Other Observations / Notes – N/A
SECTION V – WATERSIDE
Tubes External Surfaces, if possible internal surfaces –
Water Columns, Gage Glasses, Floats Chambers Internal Surfaces or Low Water Level Rods Condition – Good-clean
Superheater Tubes External Surfaces (Power boilers Only) – N/A
Steam Drum/Vessel Internal Surfaces (If electric boilers the condition of the electric resistant coils) – Good/ clean
Mud Drum Internal Surfaces (Power boilers) – N/A
Deaerator Tank Internals (Power boilers) – Good

Deaerator Storage Tank (Power boilers) – Good
Any Repairs or Alteration Since Last Inspection (All repairs and Alteration requires 'R' Stamp R-1 or R-2 Form) – None
water Chemistry Last Checked / Notes – Unknown
SECTION VI – DEFICIENCIES SUMMARY
None
SECTION VII – RECOMMENDATIONS
None

Los Alamos NATIONAL LABORATORY EST. 1943

Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): 664380-01	LO/TO Remedy ID: 95614
Location of Equipment to be Isolated: TA: 16 Bldg: 1484 Rm/Other:	Description of Machinery, System & Equipment (MS&E) to be worked on: steam plant outage BSA, BSB, Feed water tank,
MS&E Owner/Operator: Glenn Martinez Z Number: 190429	Phone: 231-8341
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☒ Yes ☐ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☒ Yes ☐ No
Reason for LO/TO: Annual p.m. fireside/waterside	
Group LO/TO (2 or more)? ☒ Yes ☐ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☒ Yes ☐ No
Shift or Personnel Changes? ☐ Yes ☒ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☒ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number: ui-proc76-287-001-r1

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☒ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number: ui-proc76-287-001-r1

☒ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)
Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☒ 1	shut off boiler power	☐ 6	
☒ 2	shut off gas supply	☐ 7	
☒ 3	shut off feed water supply	☐ 8	
☒ 4	turn off 3d trasar unplug unit	☐ 9	
☒ 5	unplug Chemical pump	☐ 10	

Section 4: LO/TO Sequence

☒ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number: ui-proc76-287-001-r1
Describe how to effectively isolate & lockout the MS&E below, if not following other document referenced above.

Isolate & Lockout (Step No.)	Equipment Descriptor (What is being locked out? e.g., machine drive motor, input power to MCC)	Energy Source (e.g., electrical, mechanical, pneumatic, hydraulic, chemical, thermal)	Energy Isolation Device (e.g., specific ID, description, circuit #, lock box #)	Location of Energy Isolation Device (e.g., room number, north wall, south wall)	Required LO/TO Position or Alignment (e.g., off, open, closed, on)	Verification Method (e.g., live/dead/live, crack open, on-off-on-off, peer checking, independent verification)	Verifier's Initials (if req'd)	See Section 5: Release (Step No.)
☒ (1)	BSA	electrical	PPA ckt 4	north wall	off	peer checking,		☐
☒ (2)	BSB	electrical	PPA ckt 10	north wall	off	peer checking,		☐
☒ (3)	feed water tank	electrical	PPA ckt 9	north wall	off	peer checking,		☐
☒ (4)	Lead/lag control panel	electrical	LP1-ckt7	north wall	off	peer checking,		☐
☒ (5)	Gas Supply	mechanical,	Valve1	North side of building Outside on regulator station	off	peer checking,		☐
☐ (6)								☐
☐ (7)								☐
☐ (8)								☐

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Energy Control Procedure prepared by:

Preparer (print name)	Z Number	Organization	Phone	Signature/Date

The novel coronavirus (COVID-19) pandemic is an evolving situation. This guidance is subject to change based on information received. These steps are in order of priority, and guides you towards actions you may need to help prevent the spread of illness at work, and at home to ensure your safety and the safety of others.

Steps to Take to Help Mitigate COVID-19 Spread and Infection

1. **Follow New Mexico Department of Health (NMDOH) guidelines for social distancing to protect yourself when not at work. Do not come to work if you are sick.** If you are sick, stay home and call your health care provider or the **LANL COVID Hotline at (505) 606-2667** to get instructions on what to do.
2. **Ask yourself:**
   a. Today or in the past 72 hours, have you had any of the following symptoms?
      i. Fever or felt feverish?
      ii. Cough?
      iii. Difficulty breathing?
      iv. Chills and/or shaking with chills?
      v. Muscle pains (not related to physical activity)?
      vi. Headache (if you have chronic headache, something different than your chronic symptoms)?
      vii. Sore throat?
      viii. New loss of taste or smell?
   b. In the past 14 days, have you traveled out of state?
   c. In the past 14 days, have you had close contact with a person known to be infected with the COVID-19?
   d. Do you live with someone who has a COVID-19 test pending, and has a fever, felt feverish, cough, difficulty breathing, chills and/or shaking with chills, muscle pains (not related to physical activity), headache (different from chronic symptoms), sore throat, or new loss of taste or smell?
   e. Do you live with a healthcare provider who regularly comes into contact with COVID-19 patients, or patients at risk for COVID-19?
   f. Are you considered to be at high risk of complications related to COVID-19 disease (over 65, have uncontrolled diabetes, heart disease, or lung disease, or are you on medications that alter the way that your immune system works)? ***Note:*** Employees should be asking themselves this question, they should not share the specific answer(s) during the briefing

   If you respond "yes" to questions 'a, b, c, or d,' Notify your manager, go home, and call the **LANL COVID-19 Hotline at (505) 606-2667**.

   If you respond "yes" to only question 'e,' do not perform any work where the 6-ft social distancing cannot be maintained.

   If you answer "yes" to question 'f,' contact the **LANL COVID-19 Hotline at (505) 606-2667**, for guidance. The nurse will provide guidance on whether you may return to work. The nurse will also provide you and your manager with a duty disposition letter with your return-to-worksite recommendations.
3. **Use a buddy system to hold each other accountable for staying healthy.**
4. **Do not touch your face.** If you must touch your face to don personal protective equipment (PPE), wash your hands first. Ensure that your PPE that touches your face (safety glasses, respirator) has been sanitized (soap and water or alcohol wipe) before you don that PPE.
5. **Wash your hands often with soap and water for at least 20 seconds.** Wash your hands when you get to work, before eating or drinking, after using the bathroom, and before leaving the job site. Wash your hands before you don protective gloves and other PPE (if required for the activity). Wash your hands after removing PPE. If soap and water are not available, use a hand sanitizer with at least 60% alcohol, and wash your hands as soon as possible.

6. **Minimize your time within 6-ft of other people.** If you must be within 6-ft of other people due to safety or job requirements:
   a. Determine number of necessary personnel.
   b. Work side-by-side, not face-to-face.
   c. Keep as far apart as possible, unless other safety or health hazards require otherwise.
   d. Pre-plan the work to minimize interactions within 6-ft.
7. **A face mask/covering is required if you must work within 6-ft of other people.** The face mask/ covering is meant to protect other people in case you are infected.
8. **Use your own tools as much as possible.** If you must use shared tools, please clean and disinfect following guidance in OSH-ISH-QTG-028 *Cleaning and Disinfection of Work Areas, PPE, Face Masks/Coverings, and Respirators*.
9. Necessary respiratory protection for other hazards associated with the work will be identified by your industrial hygienist and health physicist.
10. **Clean and disinfect shared surfaces routinely.**

BOILER OPERATING PERMIT

PO Box 1663
Los Alamos, NM 87545

National Board Federal Inspection Agency

Inspection Due Date:	6/24/2021

Boiler ID No.:	TA-16-1484-BS-B		
Boiler Type:	Steam, Firetube, High Pressure		
National Board No.:	8333	Serial No.:	10290
Boiler Location:	TA-16-1484		
Max. Allowable Working Pressure (MAWP):	100 PSIG		

LANL COMMISSIONED INSPECTOR

Name & Z#:	Randall D. Austin
Signature:	Randall D. Austin
Commission No.:	10798, R, O

Issuing Organization:	MSS-MP
LANL Comm. Insp. Supervisor:	Randall Austin (Z# 334246) PH# 505-667-6740

Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)			
Revision #: 0			**Activity/Task Title:** ST 1Y STEAM PLANT FIRESIDE / WATERSIDE PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Justin Maestas 177550 5/1/19
TA:	**Building:**	**Room:**	**Additional Location Description:** UI BOILER HOUSES

1. Scope of Work

1.1. Perform annual Waterside / Fireside PM and boiler inspections per UI Checklist / PMI. UI Engineering will provide support, oversight and training.

2. Precautions and Limitations

2.1. If steps cannot be completed as described or if unforeseen situations occur. PAUSE / STOP WORK.

STABILIZE the situation if safe to do so, CONTACT supervisor or POC and await further instructions PRIOR to proceeding

2.2. Workers shall perform Individual Hazard Analysis (IHA) for this task, which includes continual self-analysis of work scope, hazards and controls

2.3. Housekeeping shall be performed before, during and after work activities.
- 2.3.1 Control all material
- 2.3.2 Secure hoses, cords, lines, and portable equipment

2.4. Action Steps from Section 6 on **SHALL** utilize Place Keeping and be signed/marked upon completion.

3. Prerequisites/Initial Conditions

3.1. Supervisor will verify work is on the UI / FOD POD and not in conflict with other work activities

3.2. Verify all personnel have the appropriate PPE for task execution during pre-job planning
- 3.2.1. General PPE; Bump cap, safety shoes, safety glasses, hearing protection and gloves appropriate for task being performed

3.3. Barricade work area using caution tape and signs. Barricade building, room or area as discussed with PIC and other involved personnel during pre-job briefing.
- 3.2.1 Post barricades with entry/exit requirements, PPE and POC info

3.4. Verify pre-job briefing including 2101 hazards and requirements has been performed for all affected personnel

Revision #: 0			**Activity/Task Title:** ST 1Y STEAM PLANT FIRESIDE / WATERSIDE PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Justin Maestas 177550 5/1/19
TA:	**Building:**	**Room:**	**Additional Location Description:** UI BOILER HOUSES

4. Special Training/Medical Requirements

4.1. Curriculum ID 10968, WQ LOG Maintenance Worker
4.2. Parent Curriculum ID 647 – WQ LOG Pipefitter
  4.2.1. Endorsement Curriculum ID 718 – WQ LOG Pipefitter – Boiler Fitter
4.3. Parent Curriculum ID 642 – WQ LOG Electrician
4.4. Curriculum ID 641 – WQ LOG Carpenter
  4.4.1. Curriculum ID 726 – WQ LOG Carpenter – Scaffold Competent Person

5. Special Tools/Equipment

5.1. None

6. Work Instructions

6.1. **NOTIFY** operations of work to be performed and for permission to proceed
  6.1.1. Verify boiler is ready to be taken out of service ☐

6.2. **INSPECT** boiler
  6.2.1. Conduct initial observations and external inspections
  6.2.2. Use National Boiler Inspection Code (NBIC) standards
  6.2.3. Inspector must be certified to NBIC
  6.2.4. Wear long sleeve shirts or Ansell sleeves
  6.2.5. Use insulating blankets to protect against hot surfaces ☐

6.3. **ERECT / DISMANTLE / MOVE** scaffolding when needed to access work area
  6.3.1. Scaffold will be inspected daily by Competent Scaffold Personnel before use
  6.3.2. Only competent personnel will erect, modify or inspect scaffold
  6.3.3. Wear hardhats when working on or near scaffolding ☐

6.4. **DE-ENERGIZE** boiler
  6.4.1. Trace piping, conduits and wiring to ensure appropriate energy isolation is identified
  6.4.2. Close valves
  6.4.3. Turn Off / Open breakers or disconnects
    6.4.3.1. Wear non-melting clothing, leather gloves and remove all metallic objects when operating breakers or disconnects ☐
  6.4.4. Apply LOTO

Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)			
Revision #: 0			**Activity/Task Title:** ST 1Y STEAM PLANT FIRESIDE / WATERSIDE PM

TA:	**Building:**	**Room:**	**Additional Location Description:** UI BOILER HOUSES

WARNING

Potential injury or death due to uncontrolled release of energy.

6.5. **VERIFY** zero energy prior to performing work
- 6.5.1. Bleed residual pressure
- 6.5.2. Verify zero energy on each assumed electrically live conductor or equipment
  - 6.5.2.1. Test meter on known live circuit before and after zero energy verification
  - 6.5.2.2. 50V to 230V; Mode 1 to achieve mode 0, Class 1.2 a / b
    - 6.5.2.2.1. Wear; long shirt and pants or coveralls with rating of 4-cal or more, hard hat, hearing protection, safety glasses, class “0” dielectric gloves and remove all metallic objects
    - 6.5.2.2.2. Approach Boundaries: Limited; 3’-6”, Restricted; Avoid Contact
  - 6.5.2.3. 230V to1000V, Mode 1 to achieve Mode 0 Class 1.3a / b
    - 6.5.2.3.1. Wear 8 Cal PPE: AR coveralls with double layer switching hood, hard hat with face shield and hearing protection, safety glasses and ear canal inserts beneath hood, Class “0” dielectric gloves, remove all metallic objects
- 6.5.3. Approach Boundaries: Limited; 3’-6” Restricted; 1’-0 ☐

6.6. **OPEN** access doors and covers
- 6.6.1. Stage / store fasteners for reuse
- 6.6.2. Wear long sleeve shirts or Ansell sleeves
- 6.6.3. Use insulating blankets to protect against hot surfaces
- 6.6.4. Be aware of body positioning and lifting techniques ☐

6.7. **DETERMINATE** wiring from pressure and control switches
- 6.7.1. Label and protect wiring for re-termination
- 6.7.2. Ensure wiring and electrical devices are electrically safe ☐

6.8. **PERFORM** annual boiler maintenance
- 6.8.1. Follow approved checklists, PMIs and procedures
- 6.8.2. Notify UI engineering to provide support when needed
- 6.8.3. Calibrate gauges
- 6.8.4. Review & follow SDS for any lubricants or chemical used
- 6.8.5. Document all maintenance performed ☐

6.9. **PERFORM** internal boiler inspections
- 6.9.1. Follow NBIC ☐

Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)			
Revision #: 0			**Activity/Task Title:** ST 1Y STEAM PLANT FIRESIDE / WATERSIDE PM
Work Document #: (WO # / Task)			**Planner/Preparer (Name/Z#/Date)** Justin Maestas 177550 5/1/19
TA:	**Building:**	**Room:**	**Additional Location Description:** UI BOILER HOUSES

6.10. **CLOSE / REINSTALL** all doors or removed covers
- 6.10.1. Replace gaskets and fasteners on doors as needed ☐

6.11. **RECONNECT** all removed wiring and terminations
- 6.11.1. Utilize peer checking to ensure wiring is terminated properly ☐

6.12. **VERIFY** boiler is ready to be placed back into service
- 6.12.1. Inspect all work performed
- 6.12.2. Remove all tools and excess materials form boilers ☐

6.13. **REMOVE** applied LOTO
- 6.13.1. Re-Energize boiler ☐

7. Post Work Activities

7.1. **VERIFY** proper operation of boiler
- 7.1.1. Document operation per approved checklists or procedures

7.2. **PERFORM** post maintenance testing as directed by System Engineer
- 7.2.1. If any deficiencies are found document and notify supervisor

7.3. **CLEAN** work area of all debris and excess materials
- 7.3.1. Segregate all waste as required by WMC
- 7.3.2. Dispose of all generated waste in appropriate containers/locations
- 7.3.3. Remove all tools, equipment and barricades

8. Closeout

8.1. **COMPLETE** work documentation and return work package

8.2. **NOTIFY** operations and supervisor of status

BOILER INSPECTION REPORT (BIR)

NBIC NB-23, Part 2 (This report to be completed by LANL Commissioned Inspector)

SECTION I – BOILER INFORMATION

Boiler ID#:		Insp Date:	**Expiration Date:**
Boiler Area:		Ext. Inspection: ☐	Int. Inspection: ☐
National Board No.:		Serial No.:	
Boiler Mfg.:		Year Built:	
Boiler Type:	Steam ☐ Hot Water ☐ Others ☐	Firetube ☐	Watertube ☐
Safety Relief Valve (s) ID#:		Safety Valve (s) Size:	_____ , _____ , _____ ,
Set Press:	1. _____ 2. _____ 3. _____ (PSI)	Capacity:	1. _____ 2. _____ 3. _____ (lbs/hr)
Safety Valve (s):	Last Tested ☐ "VR" ☐ Replaced ☐	Date:	1. _____ 2. _____ 3. _____ ,
Pressure Gauge Range:	0 to	Heating Surface Area (sqft):	Boiler MAWP: _____ (PSI)
Pressure Allowed:	This Inspection: _____ (PSI)	Previous Inspection: _____ (PSI)	
Fuel:		Method of Firing:	
Inspection Finding: Major ☐ Minor ☐		Permit Issued: Yes ☐	No ☐

SECTION II – EXTERNAL/INSERVICE INSPECTION CONDITIONS

Planning, Coordination and Safety Requirements –

External Casing (cracks, leakage of fluids or combustion gases …) –

Safety Valve (s) Testing and Conditions –

Hangers and boiler supports Conditions –

Piping External Surfaces Conditions –
Controls (Firing, Flame Detector, valves, …) Functionality Test –
Low Water Cutoff Alarm Test –
Other Observations / Notes –

SECTION III – INTERNAL INSPECTION CONDITIONS			
Is the boiler prepared, drained and cleaned for internal inspection?	Yes ☐	No ☐	
Is the fuel shutoff valve locked and tagged?	Yes ☐	No ☐	
Is the boiler isolated from other boilers?	Yes ☐	No ☐	N/A ☐
Is the boiler atmosphere being monitored for safe entry (Boilers w/manway)?	Yes ☐	No ☐	N/A ☐
Is the boiler hydro tested for leaks? Yes ☐ No ☐	Pressure Test:	PSIG	

SECTION IV – FIRESIDE
Fire Box, Refractory, Burners, Flame Detectors Conditions –
Tubes External Condition (Pitting, bulging, misalignment, soot built up …) Watertube Boilers Only –
Tubesheets Condition (Bulging, leaks around the tubes connections, Cracks in the ligaments and weld joints) –

Staybolts Testing –
Other Observations / Notes –
SECTION V – WATERSIDE
Tubes External Surfaces, if possible internal surfaces –
Water Columns, Gage Glasses, Floats Chambers Internal Surfaces or Low Water Level Rods Condition –
Superheater Tubes External Surfaces (Power boilers Only) –
Steam Drum/Vessel Internal Surfaces (If electric boilers the condition of the electric resistant coils) –
Mud Drum Internal Surfaces (Power boilers) –
Deaerator Tank Internals (Power boilers) –

Deaerator Storage Tank (Power boilers) –
Any Repairs or Alteration Since Last Inspection (All repairs and Alteration requires 'R' Stamp R-1 or R-2 Form) –
water Chemistry Last Checked / Notes –
SECTION VI – DEFICIENCIES SUMMARY
SECTION VII – RECOMMENDATIONS

Preparer Note (PN):

This document contains instructions in dark red text and blue hidden text. Do not delete the dark red text or any part of sections I thru VIII of this Exhibit since it's intended to be included with the final printed/saved copy.

Asterisks highlighted in yellow (i.e., *) have been used throughout this document as placeholders to indicate where information is to be inserted (and the * removed) by the Requester/TSME. This includes but is not limited to the header date, PR#, and total page count in the footer of page 1 and page 1 of the TOC. The Solicitation/PO or Subcontract # in the footer of this page and page 1 of the TOC will be completed by Acquisition Services Management (ASM).

Do not modify the page numbering in the footer (except for adding total page numbers as indicated by *) since it's designed to be separately numbered from page 1 thru Section VIII of the Exhibit, and then separately numbered from the Table of Contents (TOC) (re-starting with page 1) thru the end of the Exhibit. You must have the blue hidden text (starting with the Table of Contents) visible in order to effectively/correctly complete this Exhibit however, it's not intended to print. To view hidden text, click on the "¶" (Show/Hide) icon on your tool bar. Alternately, see *How To Set Your Microsoft Word Application To View Hidden Text*. There is no need to delete the blue hidden text instructions as they will not affect the formatting of the printed document (except for total number of pages in the footer) and will not print unless the application's default setting is changed.

Make sure that after you delete the quality clauses you don't need and retain those you do, update the TOC before releasing this document.

This boxed-in Preparer Note may either be deleted or retained as part of this Exhibit.

INSTRUCTIONS: This Exhibit is to be completed by the Technical Subject Matter Expert (TSME) and optional Quality Subject Matter Expert (QSME) (except for weapons program procurements and procurements where Subcontractor is required to have a QA Program approved by LANL, in which case QSME signature is mandatory). The completed Exhibit H is signed and converted into Adobe pdf format and attached with the Requisition.

Exhibit H is required for:

- All on-site services (with or without items), regardless of Management Level (ML).
- All ML-1/ML-2, ML-3 item and service procurements, regardless of where work is performed.
- All weapons program (WP) procurements regardless of ML (or procurement quality level; PQL).
- ML-4 item procurements involving stand-alone circuit breakers and fasteners as defined in P840-1, *Quality Assurance for Procurements*.
- ML-4 item procurements involving hoisting, lifting, and rigging equipment as defined in P840-1, *Quality Assurance for Procurements*.

Guidance on the selection of quality clauses is included as hidden text next to each clause. As an example, the QC-27 (S/CI) clause is required for all item procurements (including services with items). QC-22 is required, as is QC-01A and QC-25 (unless compensatory measures allow otherwise) for all ML-1/ML-2 & WP procurements. QC-01B is required for all on-site procurements. QC-36 is required for all Safety Software or Risk Significant Software and WP procurements of software. QC-06 is required for all purchases of hoisting, lifting, and rigging equipment.

Complete the following sections I thru VII and use this information to complete the remainder of Exhibit H, after which, sign section VIII and scan for submittal with the procurement package.

NOTE TO ASM PROCUREMENT (or WP Processing Personnel): Pages that include sections I thru VIII of the completed Exhibit H are not intended to become part of the subcontract. These sections are intended for internal planning/documentation purposes only and should be separated from the Exhibit H and retained in the ASM or WP procurement file.

I. **Originator/Requester Name, Z#, Phone #**: Patrick McCabe, 348093, 695-5869

Technical SME Name, Z#, Phone #: Joshua Begay, 304395, 699-0253

Quality SME Name, Z#, Phone # (if applicable): N/A

Generic Item/Service Description: Relief Devices for TA-9 and TA-16 Boilers (Applicable to WO#'s 664376-01, 664378-01, 664379-01, 664380-01, 664385-01, 664386-01, 664387-01, 664388-01)

Notes to LANL Procurement Specialist: This space is either left blank, indicated as "N/A", or applicable notes to the Buyer are listed N/A

Notes to other LANL organization: This space is either left blank, indicated as "N/A", or applicable notes to the organization are listed N/A

ML Designation & Qualification of Subcontractors Designate the Management Level (ML) or Procurement Quality Level (PQL) (for WP Production Agency [PA] only) based on the applicable Master Equipment List, Drawing, Specification, Bill of Materials, etc. or per the requirements of P341, *Facility Engineering Processes Manual* and/or AP-341-502, *Management Level Determination* or applicable WP procedure(s). Then select A and/or B, B1, B2, B3, B4, B5, B6, C, C1, D1, or D2 as applicable. In some cases where an Institutional Evaluated Suppliers List (IESL) Supplier is necessary and the procurement is being sent out for competitive bid, both block A and B (with subsequent sub-block) may be selected to plan for both IESL and non-IESL suppliers to compete for procurements. To place an "X" in a check box: either double left click on the box or right click on the box and click on properties; change the default value to "Checked", and click on the OK tab.

Management Level: ☐ **ML-1** ☐ **ML-2** ☐ **ML-3** ☒ **ML-4** ☐ **PQL** *(ref. section VI)*

☐ **A.** Proposed Subcontractor(s) is/are listed on the Institutional Evaluated Suppliers List (IESL) for the approved items/services. Required (where supplier is listed on the IESL) for ML-1/ML-2 (including 3rd party Commercial Grade Dedication; CGD), Design Agency (DA) weapons program (WP) procurements, PA WP procurements (PQL1 & PQL2 only), and calibration services for instruments enrolled in the LANL Standards & Calibration Lab (S&CL) program.

☐ **B.** Proposed Subcontractor(s) is/are not listed on the Institutional Evaluated Suppliers List (IESL) for the approved items/services or if listed, do not meet the required QA Program evaluation criteria for the proposed item/service. Required (where supplier is not listed on the IESL) for ML-1/ML-2, DA WP procurements, PA WP procurements (PQL1 & PQL2 only), and calibration services for instruments enrolled in the LANL Standards & Calibration Lab (S&CL) program (also, required for IESL listed Suppliers where QA Program criteria does not satisfy item/service requirements). If block "B" is applicable, you must also select either, B1, B2, B3, B4, B5, and/or B6 below and if indicated, an approved Commercial Grade Dedication (CGD) Package and/or Technical Evaluation & Acceptance (TEA) Plan and/or Compensatory Action Plan must be included with the procurement request unless QPA-DO or WP quality personnel allow otherwise.

☐ **B1. Items and/or Services:** Quality & Performance Assurance (QPA) Division or applicable WP supplier evaluation personnel will evaluate the Subcontractor for subsequent IESL listing, prior to award/no later than start of work of subcontract. Complete on-line Form 1953 to request Supplier Evaluation and include copy with iProcurement PR unless QPA-DO allows otherwise.

☐ **B2. Items and/or Services:** Requesting Organization will dedicate items/services per, AP-341-703, *Commercial Grade Dedication*. Required (Technical Evaluation & Acceptance Plan, as a minimum) to be developed and approved prior to processing the procurement unless QPA-DO allows otherwise (B2 listed CGD Process may not be used for WP items/services).

☐ **B3. WP Items and Services Only:** Requesting Organization will complete a Compensatory Action Plan per P840-1 (see Weapons Program Procurements). Required to be developed and approved prior to processing the procurement unless WP quality personnel allow otherwise.

☐ **B4. Integrated Contractor Order (ICO) or Transfer (processed by ASM):** Requesting Organization will be obtaining items/services from another DOE/NNSA location (DOE Managing & Operating Contractor) under the controls of their DOE approved QA Program. Required for all ASM processed ICO's/Transfers between other DOE Complex locations (selection of quality clause QC-01C is all that's required).

☐ **B5. WP Integrated Contractor Order (ICO) or Transfer or Centralized Procurement Order (not processed by ASM):** Requesting Organization will be obtaining items/services from another DOE/NNSA location (DOE Managing & Operating Contractor) under the controls of their DOE approved QA Program. Required for all non-ASM processed ICO's/Transfers or Centralized Procurements between other DOE Complex locations (selection of quality clause QC-01C is all that's required).

☐ **B6. Work performed under controls of LANL QA Program (ref. SD330):** Subcontractor will perform all service work under LANL direction per LANL SD330 quality program requirements and LANL personnel will assure all necessary requirements are followed. ML-1 or ML-2 items cannot be provided by Subcontractor without a LANL generated and approved Commercial Grade Dedication (CGD). Subject controls are required to be described in the subcontract Exhibit D (Scope of Work) for on-site ML-1 or ML-2 work where the Supplier is not listed on the IESL and a CGD is not being processed *for the service*.

☒ **C.** Institutional Evaluated Suppliers List (IESL) Supplier is optional. For ML-3 or ML-4 and PA WP PQL3 items or services (this does not include calibration services for M&TE enrolled in the S&CL Program and does not include DA WP procurements). If desired or otherwise required by P840-1, also select C1.

☐ **C1. Services:** Requesting Organization will develop and implement a Compensatory Action Plan per P840-1. If applicable, the Plan is required to be developed and approved prior to processing the procurement unless QPA-DO or WP quality personnel allow otherwise.

D. Item/service is listed on ASM document 3400.00.0410, *Goods or Services Requiring Special Review/Approval*, (i.e. Form 410). Select D1 or D2 depending on whether item/service is listed on Form 410. If listed, LANL SME review/approval (e-mail acceptable) is required as part of the procurement package prior to processing procurement (or Form 410 SME organization must be listed in iProcurement approval sequence) unless QPA-DO or WP quality personnel allow otherwise.

☒ **D1. Yes:** Form 410 applies and internal review/approval is provided.

☐ **D2. No:** Form 410 does not apply to this procurement.

II. **Performance/Technical Requirements and Acceptance Criteria Identified In:** To place an "X" in a check box: either double left click on the box or right click on the box and click on properties; change the default value to "Checked", and click on the OK tab.

☐ **A.** Scope of Work and Technical Specifications (SOW) For services, complete and attach Exhibit D, *Scope of Work and Technical Specifications* to iProcurement purchase requisition (PR).

☐ **B.** LANL Procurement Specification If applicable, attach to iProcurement PR.

☐ **C.** Subcontractor Catalog page/cut sheet, quote, part #, model #, etc. If applicable, attach to iProcurement PR.

☒ **D.** Inspection Plan (e. g. Form 1952) Required for receipt inspection, attach to iProcurement PR.

☐ **E.** Other Attachment (e.g., drawings, reports, etc.) If applicable, attach to iProcurement PR.

III. **Receipt Inspection** For items only, select the applicable subsection below. Receipt inspections must be performed by QPA qualified and certified inspectors except as otherwise allowed for in Attachment E (section E.5.2) of P840-1, or by Subcontractors in accordance with a LANL approved Subcontractor QA Program/Plan, or by Subcontractor or other LANL personnel per a Compensatory Action Plan. A LANL Form 1952, *Receipt Inspection Plan and Requirements* or equivalent is required. To place an "X" in a check box: either double left click on the box or right click on the box and click on properties; change the default value to "Checked", and click on the OK tab.

☐ **A.** ML-1, ML-2, or ML-3 items (including weapons program procurements which includes PA WP PQL1 and PQL2), QPA certified receipt inspectors or WP quality personnel to perform receipt inspection (*at SM-30 unless arranged otherwise with Warehouse Receiving and/or QPA*).

☒ **B.** ML-4 item(s) with receipt inspection required (*weapons program procurements including PA WP PQL3, stand-alone circuit breakers and fasteners, and hoisting, lifting, and rigging equipment as defined in P840-1 or as requested by project or facility management*), QPA certified receipt inspectors or WP quality personnel to perform receipt inspection (*at SM-30 unless arranged otherwise with Warehouse Receiving and/or QPA/WP quality personnel*). Note that if receipt inspection is requested for ML-4 items not required by P840-1, an organizational charge number may be requested by QPA for receipt inspection performance.

☐ **C.** Subcontractor/other LANL personnel to provide receipt inspection (regardless of ML) in accordance with LANL QPA Division or WP quality personnel approved Subcontractor QA Program/Plan or approved Compensatory Action Plan.

☐ **D.** Items (regardless of ML) to be receipt inspected/verified by programmatic organization or project (or subcontractor) as defined in P840-1, Attachment E (E.5.2) (e.g. explosives, radiological materials, hazardous materials, off-site inspection, software, etc.).

☐ **E.** ML-4 item(s) with no QPA receipt inspection required.

IV. **Nuclear or Radiological Work** Failure of the items and/or services to be furnished under this subcontract may affect nuclear or radiological safety; therefore the Nuclear Hazards Indemnity

Agreement (48 CFR 952.250-70) clause (SC-14) may need to be included by the ASM Procurement Specialist in the terms and conditions of this subcontract, depending on the TSME/QSME selection of "YES" or "NO" for the below information statement (*required* to be "YES" for all ML-1 and ML-2 procurements [excluding Accelerator facilities], unless an Integrated Contractor Order [ICO] or unless *a LANL performed* CGD applies and is *likely* "YES" for ML-3 procurements if the ML-3 designation is based on Other Hazard Controls [OHC] or Radiation Protection). If *a LANL performed* CGD applies for ML-1/ML-2 items, select "NO" since under the CGD process, LANL is taking responsibility for SC-14 stated liabilities and in this case (*LANL performed* CGD), the SC-14 clause is not required to be included in the subcontract. To place an "X" in a check box: either double left click on the box or right click on the box and click on properties; change the default value to "Checked", and click on the OK tab.

☐ **A.** YES; failure of the items and/or services to be furnished under this subcontract may affect nuclear or radiological safety. Therefore, include the *Nuclear Hazards Indemnity and Price Anderson Act* clause (SC-14) in the subcontract (to be added by ASM; not part of Exhibit H).

☒ **B.** NO; failure of the items and/or services to be furnished under this subcontract will not affect nuclear or radiological safety (or *LANL performed* CGD applies). Do not include the *Nuclear Hazards Indemnity and Price Anderson Act* clause in the subcontract.

V. **ASME NQA-1** If answered "YES", the procurement records for the items and/or services to be furnished under this subcontract are governed by ASME NQA-1 (required to be "YES" for all ML-1 and ML-2 procurements [excluding Accelerator facilities]) and ASM will control open NQA-1 related records (i.e. the executed subcontract) in accordance with the requirements of NQA-1 requirement 17 and as described in Acquisition Practice 1046, *Safekeeping of Procurement Records*. Procurement Specialists should contact ASM Records Specialist for guidance.

☐ **A.** YES, the procurement records for the items and/or services to be furnished under this subcontract are governed by ASME NQA-1 and records must be stored per NQA-1 Requirement 17.

☒ **B.** NO, the procurement records for the items and/or services to be furnished under this subcontract are not governed by ASME NQA-1 and records do not need to be stored to NQA-1 requirements.

VI. **Weapon Material or Weapon-Related Material** These terms have specific definitions (from procedure P840-1, *Quality Assurance for Procurements*, as further supplemented by applicable WP Quality Assurance Plans or other procedures) which are *summarized* here: **Weapon Material**—NNSA nuclear weapons, assemblies, components software, or parts thereof. **Weapon-Related Material**—Any material including associated software, test and handling equipment, tooling, and fixtures, being developed and/or produced for or by the NNSA and intended for use in conjunction with, weapon research, development, engineering, production, surveillance, or dismantlement.

These definitions do not include research activities outside the scope of DOE weapon system development phases defined in 56XB, *DOE/NNSA Development and Production (D&P) Manual*.

If the items/services being procured meet the subject definitions and/or are intended for use in one or more of the defined phases of weapon project/system development discussed in the D&P Manual, including weapon system refurbishment and life extension programs (LEP); then the below selected check-box should be marked "YES" (with subsequent PQL indicated as applicable for the PA WP); otherwise, the below selected check-box should be marked "NO".

☐ **A.** YES, this procurement meets the definition of weapon material or weapon related material items/services and/or is intended for use in a D&P Manual defined phase of weapon system development/maintenance, including refurbishment and LEP. If PA WP procurement, additionally select appropriate PQL:

- ☐ PQL1 or PQL2 (IESL Supplier required unless Compensatory Acton Plan allows otherwise).
- ☐ PQL3 (IESL Supplier is optional).

☒ **B.** NO, this procurement does not meet the definition of weapon material or weapon related material items/services and/or is not intended for use in a D&P Manual defined phase of weapon system development/maintenance including refurbishment and LEP.

VII. **Safety Software/Risk Significant Software/Weapons Program Software** If the items and/or services to be furnished under this subcontract are considered Safety Software or Risk Significant Software (stand-alone or embedded in equipment; e.g. Programmable Logic Controllers) as defined in P1040, *Software Quality Management* and/or Engineering Standards Manual Chapter 21, *Software*, or are part of a weapons program (WP) procurement of software, selection of QC-36 is required; unless for Safety Software, a Commercial Grade Dedication allows otherwise or for WP procurements of software, a Compensatory Action Plan allows otherwise. Safety Software procurements require approval of the applicable Facility Design Authority Representative (DAR), Design Authority for Facility Engineering, Facility Responsible Associate Director, or Engineering Services Division Leader.

☐ **A.** YES, the items and/or services to be furnished under this subcontract are considered Safety Software or Risk Significant Software as defined in P1040 or are part of a weapons program procurement (as defined in P840-1) of software. Selection of quality clause QC-36 is required.

☒ **B.** NO, the items and/or services to be furnished under this subcontract are not considered Safety Software or Risk Significant Software as defined in P1040 or are not part of a weapons program procurement (as defined in P840-1) of software. Selection of quality clause QC-36 is not required.

VIII. **Approvals:** Approvals indicate agreement with: 1) completed Sections I thru VII (including the specified ML determination for which the TSME has ultimate responsibility and applicable PQL designation by appropriate PA WP personnel); 2) appropriate quality assurance requirements for this procurement (selected Quality Clauses (QC) and associated Table of Contents titles) have been included in Exhibit H.

Additional QPA-DO approval (as designated by the QPA Division Leader) is mandatory for ML-1/ML-2 procurements and can be satisfied by QPA-DO electronic approval in iProcurement. TSME approval is mandatory. QSME approval is mandatory for weapons program (WP) procurements and/or procurements where the Subcontractor is required to provide their own QA Program, as approved by LANL (this includes ML-1/ML-2 orders using an IESL Supplier). Blank signature lines should be marked as "N/A" (not applicable) as appropriate.

TABLE OF CONTENTS

QC	Title	Page
QC-06	CERTIFICATE OF CONFORMANCE (Feb 2018)	2
QC-08	INSPECTION, EXAMINATION, AND TEST REPORTS (Mar 2016)	2
QC-27	SUSPECT/COUNTERFEIT ITEMS (S/CI) (Feb 2018)	2
QC-28	SERIALIZATION AND MARKING (Mar 2016)	3

QC-06 CERTIFICATE OF CONFORMANCE (Feb 2018)

SUBCONTRACTOR shall provide a Certificate of Conformance (C of C) for all items or services procured through this subcontract. Each C of C shall be from SUBCONTRACTOR and/or Manufacturer, shall identify CONTRACTOR'S subcontract number, and state that the item or service described thereon conforms in all respects with subcontract/manufacturer requirements, which may include any applicable specifications, drawings, marking requirements, part/model/serial number identification, or codes/standards that the item is certified to. Where applicable, the C of C shall identify the material by CONTRACTOR'S part/control number consistent with part number information in subcontract documents and/or CONTRACTOR'S specifications. Each C of C shall further identify any approved changes, waivers, or deviations to the item requirements and identify any requirements that have not been met, with a corresponding means/recommendation for resolving the nonconformance. Each C of C shall be signed or otherwise authenticated by an authorized person responsible for this function as described in SUBCONTRACTOR'S quality assurance program (or other representative of SUBCONTRACTOR and/or manufacturer if SUBCONTRACTOR is not required to have a quality assurance program). SUBCONTRACTOR personnel must assure that certificates of conformance are verified for compliance with the technical and quality requirements stated in the subcontract.

QC-08 INSPECTION, EXAMINATION, AND TEST REPORTS (Mar 2016)

SUBCONTRACTOR shall provide to CONTRACTOR, with or prior to each shipment, or as the result of on-site testing/inspection, all reports of inspections and/or tests performed on the items procured/inspected/tested. The reports shall be traceable to the subcontract number, item part/model number, item serial number (where applicable), and/or system description (when items are tested/inspected as part of an overall integrated system).

QC-27 SUSPECT/COUNTERFEIT ITEMS (S/CI) (Feb 2018)

(a) A suspect item is one in which there is an indication by visual inspection, testing, or other information that it may not conform to established Government or industry-accepted specifications or national consensus standards. A counterfeit item is a suspect item that is a copy or substitute, without legal right or authority to do so, or one whose material, performance, or characteristics are knowingly misrepresented by the vendor, supplier, distributor, or manufacturer.

(b) SUBCONTRACTOR warrants that all items, including their subassemblies, components, and parts, tendered to CONTRACTOR shall be genuine (i.e., not counterfeit), new and unused, and conform to the requirements of this subcontract, without substitution unless otherwise provided for within this subcontract or approved in writing by CONTRACTOR prior to delivery.

(1) SUBCONTRACTOR shall ensure (as applicable) that malicious software (and hardware) is prevented from entering into their supply chain for items/services to be provided to CONTRACTOR.

(c) SUBCONTRACTOR further warrants that all components, parts, materials, and supplies incorporated into CONTRACTOR'S facilities or equipment by SUBCONTRACTOR, during performance of work at LANL, shall be genuine, new and unused, and original-equipment-manufacturer items, without substitution unless otherwise provided for within this subcontract or approved by CONTRACTOR in writing as suitable for the intended purpose prior to use.

(1) If SUBCONTRACTOR discovers any S/CI items or S/CI conditions of concern for items in use (including SUBCONTRACTOR owned items) or in the process of being installed at LANL, SUBCONTRACTOR shall temporarily segregate/control the items and immediately notify CONTRACTOR. CONTRACTOR will make subsequent notifications concerning CONTRACTOR owned items in accordance with CONTRACTOR'S S/CI procedures and provide SUBCONTRACTOR direction as to S/CI disposition. For SUBCONTRACTOR owned items with S/CI concerns (e.g. tools, scaffolding, hoisting,

lifting, and rigging equipment, etc.), CONTRACTOR will provide direction to SUBCONTRACTOR up to and including the removal of such items from the LANL site.

(d) As part of the foregoing warranties, SUBCONTRACTOR also certifies that all labels and/or trademarks or logos affixed, or designed to be affixed; to items supplied or delivered to CONTRACTOR, and to certifications, affirmations, information, or documentation related to the authenticity and quality of items supplied or delivered to CONTRACTOR under this subcontract, are genuine.

(e) Falsification of information or documentation may constitute criminal conduct; accordingly, SUBCONTRACTOR grants CONTRACTOR the right to temporarily segregate items, and related paperwork, that are suspected to be S/CI, pending a determination by National Nuclear Security Administration (NNSA) or Department of Energy (DOE) officials whether the segregated items should be impounded as evidence.

(1) In the event NNSA/DOE directs CONTRACTOR to impound the segregated items, no liability shall be asserted or enforceable against CONTRACTOR, NNSA, or DOE because of the impoundment, all such liability being expressly waived by SUBCONTRACTOR or any person claiming any right or interest under this subcontract in the impounded items.

(2) CONTRACTOR shall incur no liability for failure to return impounded items to SUBCONTRACTOR and does not assume any liability for loss or damage to the items impounded or temporarily segregated pursuant to this clause regardless of the circumstances under which said loss or damage may have occurred, and whether the impounded or temporarily segregated items are in CONTRACTOR'S possession or under its control.

(f) Nothing in this clause shall limit CONTRACTOR'S right to reject S/CI, and related paperwork, as nonconforming, to deny payment for such items, to return such items to SUBCONTRACTOR once NNSA/DOE has released the items, or to assert other remedies provided under this subcontract or by law.

QC-28 SERIALIZATION AND MARKING (Mar 2016)

The manufacturer shall serialize parts, components, assemblies, and subassemblies as required by drawings, specifications, and this subcontract. The manufacturer's serial number control system shall ensure that the same serial number is not used more than once. Associated quality documents (e.g. test/inspection reports, certification documents) shall refer to any applicable serial numbers/lot numbers of the items; serial numbers/lot numbers are required to be directly marked on items or, if not feasible, the item shall be indirectly identified (e.g. tagged) with serial number/lot number.

Los Alamos NATIONAL LABORATORY EST. 1943

Form 1952

Receipt Inspection Plan and Requirements

1. Purchase Document Number	2. Management Level (ML)
664376-01, 664378-01, 664379-01, 664380-01, 664385-01, 664386-01, 664387-01, 664388-01	ML-4

3. Item Description(s) and line item number(s)

11 each - 6021HHT01-AM0100, 6 each - 6021GGT01-AM0100, 2 each - 6021GGT01-AM0050

4. Basic Inspections

Basic Inspections are performed by Qualified Receipt Inspectors. Characteristics to be inspected, methods of inspection, and acceptance criteria are listed below. If additional acceptance criteria are required, specify in section 5. If Exhibit H quality clauses apply only to specific items, this can be clarified in QC-37 in the Exhibit "H" or in the Table at the end of this Form. During inspection if any issues arise or if clarification of acceptance criteria is necessary, the Requestor will be engaged to provide guidance or clarification.

Characteristic to be Inspected	Method of Inspection	Acceptance Criteria
Item Quantity	Visual	The quantity of items received must be the same as specified in the procurement documents. (Discuss overages with Requestor/Buyer.)
Item Cleanliness of accessible external and internal areas	Visual	Accessible external and internal areas of item must be free of dirt, soil, mill scale (excluding raw material items), oil, grease, or stains. If inspection for cleanliness was performed (as evidenced by the inspection records provided by the supplier) prior to sealing and shipping, and inspection upon receipt indicates that there has been no penetration of the sealed boundary, then inspection for internal cleanliness is optional.
Item Damage	Visual	Items/components must not be broken, cracked, missing, deformed, or misaligned. Rotating parts must turn without binding, and accessible external and internal areas must be free of gouges, dents, scratches, and burrs that would be detrimental to the function of the item.
Item Configuration	Visual	Item must be configured as specified in procurement documents. Item Configuration includes: correct orientation of components and features, correct types of components, and correctly assembled as applicable.
Item Identification and Markings	Visual	Item must be identified according to procurement documents. The identification must match that specified in the shipping and/or procurement documents.
Item Dimensions	Dimensional	Verification of general features as specified in procurement documents or catalog data, such as: a) Overall length, width, height, and diameters. b) Diameter of threads and verification of thread pitch and type. Important: This inspection will only be applicable if the provided procurement documents, specifications, or standards specify dimensions and tolerances.

Suspect/Counterfeit Items	Visual	Item must not exhibit indications of being counterfeit. See P330-9, *Suspect/Counterfeit Items (S/CI)* for indications.
Supplier Documentation	Review	Applicable Supplier Documentation must meet the requirements of the Purchase Documents and be traceable to the items and procurement documents.

5. Additional Inspections (if none are required, leave this section blank)

List any required additional inspections (see section 8), the methods of inspection, and their acceptance criteria in the table below. Reference applicable drawings, specifications, and/or standards where possible. Allow for additional inspection time coincident with the scope of any requested additional inspections. (Additional fields provided after this form, attach as needed.)

Characteristic to be Inspected	Method of Inspection	Acceptance Criteria

6. Inspection Approach

Unless otherwise specified in Section 7, the Inspection will include all items in the order or a sampling of items. This will be determined by the Receipt Inspector based on factors such as the number of items in the order, the complexity of the items, and current work load. If a sampling plan is used, it will select the number of items in the procurement to be inspected for the following applicable basic inspections: cleanliness, damage, configuration, identification and marking, dimensional, and also any additional inspections. Sampling plans will be according to ANSI/ASQ Z 1.4 (latest edition) using a minimum General Inspection Level of II (Table I) and a minimum Acceptable Quality Limit of 4.0 (Table IIA). WR inspections use the sampling plan described in PA-MAP-01014.

7. Instructions and Comments for Inspections (if none apply, leave this section blank)

Indicate if the following apply:

- ☐ Hold point for TSME/QSME witness unpacking of items. (Contact TSME/QSME to make arrangements before commencing unpacking of items.)
- ☐ Item(s) are part of a Commercial Grade Dedication (CGD). If so, a CGD Pending Tag must be included with this form.
- ☐ Item(s) are a part of **WR** Compensatory Action Plan (CAP). Implement actions (i.e., inspections, tests) as required by CAP in accordance with PA-MAP-01014, *Acceptance of Procured Items and Services.*

Other comments:

8. Limitations

Receipt Inspectors perform basic inspections to provide reasonable assurance that the items received are the items that were requested. The acceptability of an Item to perform its function is determined by the Requesting Organization, and the proper procurement controls (independent dimensional inspections, source verification, supplier surveillances, supplier evaluations, etc.) should be implemented to ensure acceptability of items. If there are questions as to these limitations, contact the organization responsible for performing the receipt inspection.

The following limitations are in place on Receipt Inspections:

- Dimensional Inspections performed by Receipt Inspectors as part of the basic inspections do not constitute dimensional acceptance inspections. The scope of basic dimensional inspections is limited to those required to provide reasonable assurance that an item is what was requested and cannot require measurements with an accuracy less than .001 inches. Before requesting additional dimensional inspections, requestors must verify that the organization performing the receipt inspection (e.g., QPA-IQ, PAQ) has the capability of performing the desired inspection.
- The TSME/QSME must coordinate/arrange for Subject Matter Expert (SME) inspections of welds or weld preparations (random verification that weld preparations are in accordance with applicable drawings and specifications) and/or electrical insulation (performance of insulation resistance tests for motors, generators, and control and power cable to ensure conformance with specifications). Receipt Inspectors do not have the capability for such inspections.
- Important: For ML-4 items which are not required to be receipt inspected by P840-1, an organizational charge code may be requested by QPA for receipt inspection.

Integrated Work Document (IWD) Part 3, Validation and Work Release

IWD # Revision #: **Work Release**

By signing below, I verify this activity is compatible with current facility configuration and operating conditions.

FOD designated Operations Manager or other facility point-of-contact for work area

Signature/Z#/Date **(If required by FOD)**: _____

Note: For Standing IWD, release may be given concurrently with signatures on Part 2.

By signing below, I have verified the following:

- I have verified authorization by ensuring approval signatures of the RLM and FOD.
- I have jointly conducted a validation walkdown with workers to confirm the IWD can be performed as written, and that required initial conditions and other prerequisites are in place.
- The assigned workers are authorized and are competent to perform the work in a safe, secure, and environmentally responsible manner.
- I have conducted the pre-job briefing, and all workers (including support workers) have been briefed.
- I have ensured coordination with any required FOD work-area representatives (e.g., area work coordinators).

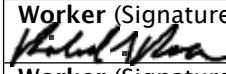
PIC (Signature/Z#/Date) **Required**: Dennis Bernal 197845 09/28/20

Alternate PIC Signatures **acknowledges** PIC authority is assumed for the first time. *(Note: Alternate PICs are required to sign only once, but formal handoff includes conferring with previous PIC to obtain all required information associated with the handoff.)*

Alternate PIC (Signature/Z#/Date) **Required**: _____

Alternate PIC (Signature/Z#/Date) **Required**: _____

Pre-Job Brief Content



- What are the critical steps* or phases of this activity?
- How can we make a mistake at that point?
- What is the worst thing that can go wrong?
- What controls, preventive measures, and bounding conditions are needed?
- What work permits are required and how will we meet their requirements?
- What are the handoffs and coordination requirements among workers and multiple PICs?
- Are there hold-points including those that require sign-offs?
- What are the pause/stop work responsibilities and expectations (e.g., for unanticipated conditions or hazards)?
- How would we respond to alarms and emergencies?
- Are there lessons learned from previous similar work?
- Is other information needed to perform this activity in a safe, secure, and environmentally responsible manner?
- Does everyone agree to the work tasks/steps, hazards, and controls and commit to follow them?

* "Critical steps occur anytime human performance involves a substantial transfer of energy, or movement of solids, liquids, and gases, or the transmission of data and information that , if not performed under control, could cause serious harm to one or more important assets." (Performance Improvement, vol. 53, no. 9, October 2014)

Pre-Job Brief Attendance Roster

By signing below **as required**, I agree to the following:

- I agree to follow the work steps and implement the controls as written as applicable to my work assignments.
- I agree to pause/stop work when conditions or hazards change or when I encounter unexpected conditions during the execution of work, or when work cannot be performed as written, or instructions become unclear during execution.
- I confirm that I am authorized, qualified, and fit to perform the work.

AP-WORK-004: Attachment 1
Maintenance & Site Services
Worker Engagement Questions

Worker engagement questions are intended to focus attention on the task and ensure uncertainties are addressed. Examples of worker engagement questions are provided below. Worker engagement questions should be tailored to the situation.

Each of the questions listed below will be discussed at each Pre-Job Brief with all affected personnel.

Topic	Completed (X)
What permits, permissions, or support are required to safely start this work?	X
What is the most likely thing that could go wrong (not the worst thing) and what, specifically, will prevent it?	X
What can cause us to go beyond the scope of the work?	X
What hazards in the work area may not have been considered during planning of this job	X

Roose, Richard A. z# 303503 09/28/2020

Los Alamos NATIONAL LABORATORY EST. 1943	*Preventive Maintenance Instruction* Low- and High-Pressure Steam Boiler and Low-Temperature Water Heating Boiler Inspection, Testing, and Maintenance **403-A.006: Hot Water Boiler Yearly Fireside/Waterside Inspection and Maintenance**

Work Order No.: 670681-01 Equipment ID No.: BHW-010

Instructions: Enter the requested information. All items marked S or Y are satisfactory. Document all items marked U, N, or N/A in the Remarks section below, noting the step number and reason. Notify the foreman or supervisor of problems involving imminent danger.

TA: 53 Building: 365 Room: 403 ER

Date Inspected: 09/28/20 Inspectors: MM, RR

1.0 PRE-MAINTENANCE ACTIVITIES

NOTE Preoperational and pre-maintenance activities shall be conducted per the work order package, e.g., lockout/tagout, permits, special instructions, etc.

! WARNING If purging of gas lines will be required during this maintenance, ensure that the purging activity is addressed in the Integrated Work Document (IWD). The following must be addressed (see Master Specification 23 1123):

1. Purged fuel gases shall be directly vented to a safe location outdoors, away from personnel and ignition sources. This may be accomplished through permanent piping or temporary piping or hosing.
2. If it is not possible to vent purged gases outdoors, the following conditions must be met:
   a. Purging activity must be approved by the LANL Fire Marshal based on a documented justification detailing why outdoor venting is not possible and IWD.
   b. Gas concentration in the space to which the purge is vented shall be maintained at no more than 25% of the Lower Explosive Limit (LEL). For natural gas, the LEL is a concentration of 5% in air or 50,000 ppm. Therefore a maximum concentration of 12,500 ppm is allowed for natural gas. The concentration may be controlled by providing adequate ventilation or by limiting the amount of purge gas.
   c. Combustible gas detectors shall be used during the purging operation to monitor the gas concentration.
   d. Nonessential personnel shall be evacuated from the vicinity (including adjacent spaces) during the purging operation.
   e. Ignition sources in the purging space shall be controlled or eliminated.

NOTE All repair work, adjustments, or the replacement of parts shall be done in accordance with the manufacturer's procedures, specifications, recommendations, and instructions.

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

1.1	Notify maintenance coordinator (MC) that work will be in progress on the boiler system.		Initials: RL

2.0 MAINTENANCE

NOTE These selected hot water boilers are mainly boilers with power burners that have refractory in front and rear flue doors or have heat extractors in the fire-tubes as are found in most one-pass boilers (Sellers). Hot water heating boilers with atmospheric burners generally require minimal fireside preventative maintenance. Contact the MSS-MP Boiler subject matter expert (SME) at 7-8550 with questions or concerns.

2.1	Lock and tag out electrical and all associated valves on boiler and shut off gas supply.		Initials: RK
2.2	Cool boiler, open air cock, and drain the boiler.		Initials: RR
2.3	Perform an internal and external inspection after thorough cleaning.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.1	Check the fireside furnace and fire-tubes for any evidence of soot formation or corrosion.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.2	Brush and vacuum furnace and fire-tubes if such conditions exist.		Initials: RR
2.3.3	Perform hydrostatic test based on the boiler's Maximum Allowable Working Pressure and/or facility potable water pressure as long as the potable water pressure is at least 30 psi over boiler operating pressure.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.4	Note if any boiler tubes and/or fittings are leaking, and repair as required. For any major repairs (determined by the SME), request a work order for the repairs from the MC.		Initials: RR

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

2.3.5 On one-pass boilers (Sellers), check condition of all heat extractors.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.6 Check refractory materials.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.7 Replace if needed.		Initials: RR
2.4 Perform maintenance on low-water cutoff float chamber and water feeder. Disassemble to ensure freedom from obstruction and proper functioning of the working parts.		Initials: RR
2.5 Perform routine burner maintenance.		Initials: RR
2.5.1 Observe temperature and operating pressure and general conditions.	S ☒ U ☐ N/A ☐	Initials: RR
2.5.2 Fire and cycle the burner.		Initials: RR
2.6 Perform routine maintenance of circulating pump and expansion pump equipment.		Initials: RR
2.6.1 Observe condition of expansion tank.	S ☒ U ☐ N/A ☐	Initials: RR
2.6.2 Drain expansion tank if it is of a non-bladder type and refill to reestablish an air cushion.	S ☐ U ☐ N/A ☒	Initials: RR
2.6.3 Check the air pressure on the bladder-type expansion tanks.	S ☒ U ☐ N/A ☐	Initials: RR

Remarks: 2.6.2., BHW- 010 is equipped with a bladder type expansion tank.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

2.6.4 Observe operation of circulating pumps.	S ☑ U ☐ N/A ☐	Initials: RR
2.6.5 Lubricate pump motors.		Initials: RR
2.7 Perform routine maintenance of entire combustion control equipment.		Initials: RR
2.7.1 Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	S ☐ U ☐ N/A ☒	Initials: RR
2.7.2 Adjust air/fuel mixture as needed.		Initials: RR
2.7.3 Test flame detection devices on boilers with flame scanners.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.4 Remove the flame scanner with the burner firing.		Initials: RR
NOTE The burner should shut off as a flame failure condition.		
2.7.5 Clean the flame scanner, reinstall and test programmer.		Initials: RR
2.7.6 Check for proper operation as boiler goes through a firing cycle and light-off.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.7 Check all electrical control and circuitry.	S ☒ U ☐ N/A ☐	Initials: RR

Remarks: 2.7.1., BHW- 010 is not equipped with gas/ air linkages.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

2.7.8 Inspect for cracked mercury tubes, separation of mercury, cracked insulators (probe type), jumper tube conditions, loose connections, poor or deteriorated wiring, improperly used bypass switches, cutoff switches wired in parallel, shut-offs installed at improper levels, wedges behind mercury tubes.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.9 Observe operation of forced draft fan motors on boilers with power burners and induced draft fan motors on horizontal breeching where applicable.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.10 Lubricate fan motors where necessary.		Initials: RR
2.8 Perform combustion and draft tests.		Initials: RR
2.8.1 Visually inspect combustion.	S ☒ U ☐ N/A ☐	Initials: RR
NOTE Changes in flame shape, color, and sound are among early indicators of potential combustion-related problems. Changes may be due to changes in fuel pressure or gas/air linkage movement.		
2.9 Perform safety relief valve(s) pop test.	S ☒ U ☐ N/A ☐	Initials: RR
2.9.1 Check pressure-reducing valve.	S ☒ U ☐ N/A ☐	Initials: RR
2.9.2 Replace the strainer in the valve if needed.		Initials: RR
2.10 Perform slow drain test of low-water cutoff.	S ☒ U ☐ N/A ☐	Initials: RR

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

2.11 Inspect gas piping for proper support and tightness.	S ☒ U ☐ N/A ☐	Initials: RA
2.11.1 Inspect fuel supply system and gas controls.	S ☒ U ☐ N/A ☐	Initials: RR
2.11.2 Leak check gas controls and associated gas piping with a gas detector or soap suds.	S ☒ U ☐ N/A ☐	Initials: RR
2.12 Inspect boiler room ventilation louvers and intake.	S ☒ U ☐ N/A ☐	Initials: RR
2.12.1 Listen for any unusual noises or conditions and correct as necessary.	S ☒ U ☐ N/A ☐	Initials: RR
2.12.2 Report any needed corrections to the MC for corrective maintenance.		Initials: RR
2.12.3 Check combustion air supply openings to ensure that they are not closed or stopped up.	S ☒ U ☐ N/A ☐	Initials: RA
2.12.4 Inspect conditions of stacks and rain caps.	S ☒ U ☐ N/A ☐	Initials: RR
2.12.5 Inspect flue door gaskets to ensure they are in good condition, and properly secured.	S ☒ U ☐ N/A ☐	Initials: RA
2.12.6 Replace if necessary.		Initials: RR

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

3.0 POST-MAINTENANCE ACTIVITIES

NOTE Post-maintenance activities shall be conducted in accordance with the work order package instructions (e.g., lockout/tagout, special instructions, etc.).

3.1	Close and secure front and rear flue doors.		Initials: RR
3.2	Hook up all associated piping.		Initials: RR
3.3	IF water makeup feeds boiler directly, THEN open by-pass valve to refill boiler, AND close by-pass valve when boiler reaches operating pressure. -or- IF water makeup does NOT feed boiler directly, THEN open supply and return valves to refill boiler.	By-pass ☒ -or- Supply/ Return ☐	Initials: RR
3.4	Fire up boiler and check for air, gas, and water leaks.	S ☒ U ☐ N/A ☐	Initials: RR
3.5	Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	S ☐ U ☐ N/A ☒	Initials: RR
3.6	Check pilot burners and ignition equipment for proper condition and adjustment.	S ☒ U ☐ N/A ☐	Initials: RR
3.7	Visually check burner for proper combustion.	S ☒ U ☐ N/A ☐	Initials: RR
3.8	Record all mechanical maintenance data, testing data, and other notable items.		Initials: RR

NOTE Combustion analysis is verifiable only with a flue gas analyzer and is performed mainly on boilers with power burners.

Remarks: 3.5., BHW- 010 is not equipped with gas/ air linkages.

Work Order No.: 670681-01 Equipment ID No.: BHW-010

Los Alamos NATIONAL LABORATORY EST. 1943

Form 2244
Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): 670681- 01	LO/TO Remedy ID: 100252
Location of Equipment to be Isolated: TA: 53 Bldg: 365 Rm/Other: 403 ER	Description of Machinery, System & Equipment (MS&E) to be worked on: BHW- 010, BHW- 011
MS&E Owner/Operator: Kenny Madrid Z Number: 117813	Phone:
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No
Reason for LO/TO: 1 yr. PM FS/WS	
Group LO/TO (2 or more)? ☒ Yes ☐ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☒ Yes ☐ No
Shift or Personnel Changes? ☐ Yes ☒ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☐ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number:

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☐ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:

☐ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)
Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☐ 1		☐ 6	
☐ 2	N/A	☐ 7	N/A
☐ 3		☐ 8	
☐ 4		☐ 9	
☐ 5		☐ 10	

Section 4: LO/TO Sequence

☒ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:
Describe how to effectively isolate & lockout the MS&E below, if not following other document referenced above.

Isolate & Lockout (Step No.)	Equipment Descriptor (What is being locked out? e.g., machine drive motor, input power to MCC)	Energy Isolation Device (e.g., specific ID description, circuit #, lock box #)	Energy Isolation Device (Use specific ID or description, circuit number, lock box number.)	Location of Energy Isolation Device (e.g., room number, north wall, south wall)	Required LO/TO Position or Alignment (e.g., off, open, closed, on)	Verification Method (e.g., live/dead/live, crack open, on-off-on-off, peer checking, independent verification)	Verifier's Initials (if req'd)	See Section 5: Release (Step No.)
☑ (1)	Return Return Valve Return Valve 403 ER Shut Crack Open						RK	☑ 1

☐ (6)								☐
☐ (7)								☐
☐ (8)								☐

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Energy Control Procedure prepared by:

Preparer (print name)	Z Number	Organization	Phone	Signature/Date
Roose, Richard A.	303503	LOG- CS	350- 3927	Richard A. Roose

By signing below, you acknowledge that this energy control procedure and/or referenced documents identify the isolation devices, isolation points, and methods necessary to prevent any unexpected release of hazardous energy.

Los Alamos NATIONAL LABORATORY EST. 1943

Form 2101

Integrated Work Document (IWD) Part 2, FOD Requirements and Approval for Entry and Area Hazards and Controls

Non-Tenant Activity Form

IWD No./Work Request No: __ Revision #: 0

Facility Operation Director (FOD) must determine the facility entry and coordination requirements and identify the Environment, Safety, Health (ESH)/Security and Safeguards (S&S) hazards and controls associated with the activity location.

FOD 04	TA 53	Bldg. 0365	Room All	Other Location Outside parking lot
FOD Designated Facility Point-of-Contact	Name Anthony George	Phone 667-0242	Pager 4-6007	Email ageorge@lanl.gov

Entry and Coordination Requirements (*Check one or more of the following*)

- ☐ No Entry/Coordination Requirements
- ☒ Plan of the Day/Plan of the Week (POTD/POTW)
- ☐ Security Clearance Requirements
- ☐ Co-located Hazards/Concerns
- ☒ Check out at End of Work
- ☐ Escort Required
- ☐ FOD-designated facility Point-of-Contact must sign IWD Part 3
- ☒ Check in at Start of Work
- ☒ Work must be Scheduled
- ☐ Other Security Requirements (ex.: Cellphone, No Foreign Nationals, etc.)
- ☐ Quality Issues
- ☐ Review under Authorization Basis (AB)/Safety Basis/Unreviewed Safety Question (USQ)
- ☒ Work-Area Training Required
- ☒ Check in Daily
- ☒ Check out Daily
- ☒ Other Bounding Conditions: Experimental Area manager must be notified when work begans and ends on a daily basis.

Additional Comments (refer to Job Hazard Analysis [JHA] Tool Facility Notes)

All work must be approved by LANSCE FOD or designee and placed on the POD. Check LANL website for alerts and follow Fire requirments. Ensure the OMC and or the LANSCE area managers are aware of all work that is to take place in their assigned areas. TA53 SST course 57262, TA53 Bldg emergency plan Course 56903 TA 53 Facility Radiation Protection requirements Course #21395

Instructions: In the block below, identify work-area hazards that could potentially affect the worker(s) or others. Specify the facility controls and preventive measures that must be implemented by the worker(s) to protect against the site hazards as well as any special training required.

ESH/S&S WORK AREA HAZARDS & CONTROLS

Work Area Hazards/Concerns Identify site hazards and concerns that could potentially affect the worker(s) or others.	**Work Area Hazard Present**	**Facility Controls/ Preventive Measures/ Bounding Conditions** Specify preventive measures, controls and bounding conditions for each site hazard	**Reference Documents** List permits, operating manuals, and other reference procedures	**Training and Qualification** List training requirements (P300, Integretated Work Management, Section 6.1)
☐ **No Work Area Hazards**				
Ionizing Radiation Work in posted radiological areas, work with radioactive materials, or work on or near radiation producing devices. **Specify Hazard:** Working in posted areas	☒ Yes ☐ No	TLD in posted areas. All personell entering area must wear TLD,	Door Postings P121 Radiation protection	TA 53 SST Course 57626 RAD II TA53 Bldg emergency Plan Course 56903 unless escorted. RAD II

IWD No./Work Request No: _____ Revision #: 0

ESH/S&S WORK AREA HAZARDS & CONTROLS				
Work Area Hazards/Concerns Identify site hazards and concerns that could potentially affect the worker(s) or others.	**Work Area Hazard Present**	**Facility Controls/ Preventive Measures/ Bounding Conditions** Specify preventive measures, controls and bounding conditions for each site hazard	**Reference Documents** List permits, operating manuals, and other reference procedures	**Training and Qualification** List training requirements (P300, Integretated Work Management, Section 6.1)
Worker Exposure Working near non-ionizing radiation, beryllium, noise, chemicals, hazardous biological materials, lead, asbestos, temperature/humidity extremes, or high explosives. **Specify Hazards:** Noise	☒ Yes ☐ No	Observe area safety signage, Wear Hearing protection if noise exceeds 85dba	P101-31 hearing conservation P101-6 PPE	LANL hearing protection PPE
Energized and Operative Systems Working near energized electrical parts, pressure systems, steam lines; near unprotected belts, pulleys, chains or rotating equipment; fuel fired equipment other than vehicles; or spark or flame producing operations. **Specify Hazards:** Electrical,Pressure	☒ Yes ☐ No	Follow LANS electrical/pressure safety and LOTO for hazardous energy control if applicable to task	P101-3 LOTO P101-13 Electrcial safety	LOTO If task requires
Confined Spaces Entry into tanks, manholes, cooling towers, sumps, or any other area with potentially low oxygen concentration or other hazards such as toxic vapors or engulfment. **Specify Hazards:**	☐ Yes ☒ No			
Elevated Work Surface Elevated work when fall protection is not provided by conventional handrail systems or required per P101-20, *Fall Protection Program*	☒ Yes ☐ No	If task invloves work above 4 feet follow LANL fall protection requirments Fall plan	P101-20 Fal protection Fall plan provided by planner	LANL fall protection
Environmental Impact Activities conducted in areas containing potential release site, contaminated soil, sensitive species, watercourse wetlands, floodplain, historical/archeological sites, or other work area condition that can be impacted by or can impact the environment. **Specify Hazards:**	☐ Yes ☒ No			
Security Requirements **Specify:**	☐ Yes ☒ No			
Other Hazards **Specify:**	☐ Yes ☒ No			

I have verified that the hazards identified above adequately identify the area hazards and that the IWM process has been applied appropriately.

FOD or Representative (Signature/Z #/Date) **Approval Required** [signature] 11/28/17 11/1/19

Date Approval Expires: 12/31/2020

Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)			
Revision #: 0			**Activity/Task Title: 53-0365 2Y BOILER MAINTENANCE**
Work Document #: (WO # / Task) 6670681-01			**Planner/Preparer (Name/Z#/Date) Troy Calloway #186163 6/17/20**
TA: 53	**Building : 0365**	**Room: 403**	**Additional Location Description:**

1. Scope of Work

1.1. **THIS PM REQUIRES SCHEDULING A BOILER INSPECTOR TO INSPECT AND CERTIFY UNIT.**

1.2. **PERFORM and COMPLETE ATTACHED PMI**

1.3. **Power source: CDD by MCC-B 53-752 3000 kva**

MC: Kenny Madrid 4-8327

Hazard Analysis (HA) Team: Troy Calloway, LANSCE IH & ESO , Lewis Mondragon

Date: 6/17/20

2. Precautions and Limitations

2.1. **IF** steps cannot be completed as described or **IF** unforeseen situations occur, **THEN PAUSE WORK** and **STABILIZE** the situation. **CONTACT** your supervisor and **AWAIT** further instructions before proceeding.

2.2. **IF** materials are required to perform this work, **THEN ASSURE** materials are available
and / or staged **PRIOR** to commencing field work.

2.3. Signatures, Initials and Place keeping blocks at the end of a step signifies the completion of that step or series of steps.

- Steps **SHALL** be signed / marked upon completion.

2.4. **ASSESS** the **ENVIRONMENTAL CONDITIONS** before performing work. Environmental conditions could increase severity

2.5. **ENSURE** unique equipment identifier. Equipment tag or unique equipment identifier (MEL ID) is used to designate which piece(s) of equipment are to be worked on.

Los Alamos NATIONAL LABORATORY EST. 1943 **Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)**			
Revision #: 0			**Activity/Task Title: 53-0365 2Y BOILER MAINTENANCE**
Work Document #: (WO # / Task) 6670681-01			**Planner/Preparer (Name/Z#/Date) Troy Calloway #186163 6/17/20**
TA: 53	**Building : 0365**	**Room: 403**	**Additional Location Description:**

2.6. **REVIEW** any relevant plant specific, industry related experience or lessons learned applicable to required work.

2.7. **IDENTIFY** individuals to contact in case certain events occur

- **IF** there are any concerns about exposure to toxic chemicals or metals, noise, high heat, electrical or magnetic fields, or biological hazards, **CONTACT LFO-IH** for an assessment.
  - **Sylvie Adam** 695-8224
  - **Paul Martin** 667-3864 or 795-3119
  - **Daniel Evans** @ 667-8784 or 500-2158
- **WEM – Kenny Valdez** @ 667-3512 or 699-0793
- **On Call Duty Officer** @ 4-7466 or 500-2072
- **LFO-MSS Group Office** @ 665-6393

2.8. **LOCATE** and **IDENTIFY** any alarms or monitors in area (as posted at entrance)

- Check alarm / monitor and ensure it is functioning properly
- Know, review and/or discuss procedure in case of alarm sounding

2.9. **IDENTIFY** rapid or emergency actions to place equipment in likely compensatory configuration or conditions.

3. PREREQUISITES/INITIAL CONDITIONS

3.1. **VERIFY** with operations that no other activities are being conducted that could impact safe working conditions.

3.2. **IDENTIFY** required permits:

- LO/TO Attachments
- Spark and Flame Permit, form 1563

3.3. **IF** facility outage is required, **THEN NOTIFY** occupants.

6.3.3. Purge gas to outside – **IF NOT possible PAUSE WORK** and contact LANSCE IH (695-8224) for air quality monitoring and LANL Fire Marshall (670-1958)

NOTE: **Arc Flash calculations provided by LFO Engineering.**

Power Source: CDD by MCC-B Voltage: 480v
Transformer: 53-752 3000 kva
Incident energy @ 18" = 2.1 cal / sq cm
Flash Protection Boundary = 25"
Limited Approach = 42"
Restricted Approach = 12"

ELECTRIC ARC FLASH
BREAKER OPERATION CLASS 1.3b

6.4. **FILL** out applicable attachment
6.5. **TURN** off power source(s) and **APPLY** LOTO device
6.5.1. **PPE:**
Long sleeve AR shirt and AR pants (8 cal/sq cm arc rated) **OR** AR coveralls (8 cal/sq cm arc rated) over non-melting daily wear, short sleeve 100% cotton shirt, hardhat, safety glasses, hearing protection, AR face shield with AR balaclava (8 cal/sq cm) **OR** AR flash suit hood (**8** cal/sq cm arc rated). heavy duty leather gloves.
6.5.2. Ensure unit runs/starts
6.5.3. Open Disconnect / Breaker and verify the unit stops or will not start

Repeat process:
6.5.4. Close Disconnect / Breaker and ensure unit starts
6.5.5. Open Disconnect / Breaker and verify the unit stops or will not start

Los Alamos NATIONAL LABORATORY **Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)**			
Revision #: 0			**Activity/Task Title: 53-0365 2Y BOILER MAINTENANCE**
Work Document #: (WO # / Task) 6670681-01			**Planner/Preparer (Name/Z#/Date) Troy Calloway #186163 6/17/20**
TA: 53	**Building : 0365**	**Room: 403**	**Additional Location Description:**

6.5.6. LOTO devices/tags shall be applied in accordance with P101-3

WARNING

Release of Pressurized / Flammable Gas
NO SPARKS OR FLAME WITHIN WORK AREA

6.6. **TURN** off and **APPLY** LOTO to gas supply per appropriate procedure x
- 6.6.1. Obtain locks and tags from FOD Designated Lock Coordinator
- 6.6.2. Make necessary notifications
- 6.6.3. Determine all sources of power with Equipment Owner / Operator
- 6.6.4. Turn off EQ – Close valves
- 6.6.5. LOTO devices/tags shall be applied in accordance with P101-3

DANGER

DO NOT stand in front of boiler doors or breeching when firing boiler.

6.7. **PERFORM maintenance** per PMI section 2 x
6.8. **REMOVE** and replace defective components per PMI x
- 6.8.1. Ensure all components are sufficiently cool before contact with skin
- 6.8.2. PPE per core training
- 6.8.3. Inspect all tools prior to use
- 6.8.4. Wear leather gloves and safety glasses
- 6.8.5. GFCI protection for all cords and electric devices
- 6.8.6. Inspect all cords, plugs and electric tools for damage – remove and tag if found defective
- 6.8.7. Minimize exposure to noise. Wear hearing protection as applicable.

WARNING

Soldering and Brazing Hazards:
Fire Hazard
Inhalation Hazard
Eye and Dermal Burn Hazard

6.9. Low temp **SOLDERING REPAIRS** – IF necessary [x]

- 6.9.1. **Must have approved and signed spark and flame permit in package prior to working**
- 6.9.2. Review current LANL fire danger rating, follow appropriate cautions
- 6.9.3. Review spark and flame permit
- 6.9.4. Provide fire watch if permit deems necessary
- 6.9.5. Ensure adequate ventilation in work area
- 6.9.6. Wear leather gloves, long sleeve shirt and tinted goggles
- 6.9.7. Have a 5lb (minimum) ABC fire extinguisher present
- 6.9.8. Scope area for possible flammable material within spark/flame range
- 6.9.9. Verify NEAREST eyewash capabilities

WARNING

ELECTRIC SHOCK / ARC
EQUIPMENT OPERATION CLASS 1.3b

6.10. **REMOVE** electrical LO/TO and energize equipment [x]

- 6.10.1. **PPE:**
  Long sleeve AR shirt and AR pants (8 cal/sq cm arc rated) **OR** AR coveralls (8 cal/sq cm arc rated) over non-melting daily wear, short sleeve 100% cotton shirt, hardhat, safety glasses, hearing protection, AR face shield with AR balaclava (8 cal/sq cm) **OR** AR flash suit hood (**8** cal/sq cm arc rated). heavy duty leather gloves.
- 6.10.2. Notify Designated Lock Coordinator and return locks.

6.11. **REMOVE** gas LO/TO and energize equipment [x]

Los Alamos NATIONAL LABORATORY EST. 1943 **Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)**			
Revision #: 0			**Activity/Task Title: 53-0365 2Y BOILER MAINTENANCE**

1.0 PRE-MAINTENANCE ACTIVITIES

NOTE Preoperational and pre-maintenance activities shall be conducted per the work order package, e.g., lockout/tagout, permits, special instructions, etc.

! WARNING If purging of gas lines will be required during this maintenance, ensure that the purging activity is addressed in the Integrated Work Document (IWD). The following must be addressed (see Master Specification 23 1123):

1. Purged fuel gases shall be directly vented to a safe location outdoors, away from personnel and ignition sources. This may be accomplished through permanent piping or temporary piping or hosing.
2. If it is not possible to vent purged gases outdoors, the following conditions must be met:
   a. Purging activity must be approved by the LANL Fire Marshal based on a documented justification detailing why outdoor venting is not possible and IWD.
   b. Gas concentration in the space to which the purge is vented shall be maintained at no more than 25% of the Lower Explosive Limit (LEL). For natural gas, the LEL is a concentration of 5% in air or 50,000 ppm. Therefore a maximum concentration of 12,500 ppm is allowed for natural gas. The concentration may be controlled by providing adequate ventilation or by limiting the amount of purge gas.
   c. Combustible gas detectors shall be used during the purging operation to monitor the gas concentration.
   d. Nonessential personnel shall be evacuated from the vicinity (including adjacent spaces) during the purging operation.
   e. Ignition sources in the purging space shall be controlled or eliminated.

NOTE All repair work, adjustments, or the replacement of parts shall be done in accordance with the manufacturer's procedures, specifications, recommendations, and instructions.

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

1.1	Notify maintenance coordinator (MC) that work will be in progress on the boiler system.		Initials: RR

2.0 MAINTENANCE

NOTE These selected hot water boilers are mainly boilers with power burners that have refractory in front and rear flue doors or have heat extractors in the fire-tubes as are found in most one-pass boilers (Sellers). Hot water heating boilers with atmospheric burners generally require minimal fireside preventative maintenance. Contact the MSS-MP Boiler subject matter expert (SME) at 7-8550 with questions or concerns.

2.1	Lock and tag out electrical and all associated valves on boiler and shut off gas supply.		Initials: RR
2.2	Cool boiler, open air cock, and drain the boiler.		Initials: RR
2.3	Perform an internal and external inspection after thorough cleaning.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.1	Check the fireside furnace and fire-tubes for any evidence of soot formation or corrosion.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.2	Brush and vacuum furnace and fire-tubes if such conditions exist.		Initials: RR
2.3.3	Perform hydrostatic test based on the boiler's Maximum Allowable Working Pressure and/or facility potable water pressure as long as the potable water pressure is at least 30 psi over boiler operating pressure.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.4	Note if any boiler tubes and/or fittings are leaking, and repair as required. For any major repairs (determined by the SME), request a work order for the repairs from the MC.		Initials: RR

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

2.3.5 On one-pass boilers (Sellers), check condition of all heat extractors.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.6 Check refractory materials.	S ☒ U ☐ N/A ☐	Initials: RR
2.3.7 Replace if needed.		Initials: RR
2.4 Perform maintenance on low-water cutoff float chamber and water feeder. Disassemble to ensure freedom from obstruction and proper functioning of the working parts.		Initials: RR
2.5 Perform routine burner maintenance.		Initials: RR
2.5.1 Observe temperature and operating pressure and general conditions.	S ☒ U ☐ N/A ☐	Initials: RR
2.5.2 Fire and cycle the burner.		Initials: RR
2.6 Perform routine maintenance of circulating pump and expansion pump equipment.		Initials: RR
2.6.1 Observe condition of expansion tank.	S ☒ U ☐ N/A ☐	Initials: RR
2.6.2 Drain expansion tank if it is of a non-bladder type and refill to reestablish an air cushion.	S ☐ U ☐ N/A ☒	Initials: RR
2.6.3 Check the air pressure on the bladder-type expansion tanks.	S ☒ U ☐ N/A ☐	Initials: RR

Remarks: _2.6.2., BHW- 011 is equipped with a bladder type expansion tank.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

2.6.4 Observe operation of circulating pumps.	S ☑ U ☐ N/A ☐	Initials: RR
2.6.5 Lubricate pump motors.		Initials: RR
2.7 Perform routine maintenance of entire combustion control equipment.		Initials: RR
2.7.1 Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	S ☐ U ☐ N/A ☒	Initials: RR
2.7.2 Adjust air/fuel mixture as needed.		Initials: RR
2.7.3 Test flame detection devices on boilers with flame scanners.	S ☑ U ☐ N/A ☐	Initials: RR
2.7.4 Remove the flame scanner with the burner firing.		Initials: RR
NOTE The burner should shut off as a flame failure condition.		
2.7.5 Clean the flame scanner, reinstall and test programmer.		Initials: RR
2.7.6 Check for proper operation as boiler goes through a firing cycle and light-off.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.7 Check all electrical control and circuitry.	S ☒ U ☐ N/A ☐	Initials: RR

Remarks: – 2.7.1., BHW- 011 is not equipped with gas/ air linkages.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

2.7.8 Inspect for cracked mercury tubes, separation of mercury, cracked insulators (probe type), jumper tube conditions, loose connections, poor or deteriorated wiring, improperly used bypass switches, cutoff switches wired in parallel, shut-offs installed at improper levels, wedges behind mercury tubes.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.9 Observe operation of forced draft fan motors on boilers with power burners and induced draft fan motors on horizontal breeching where applicable.	S ☒ U ☐ N/A ☐	Initials: RR
2.7.10 Lubricate fan motors where necessary.		Initials: RR
2.8 Perform combustion and draft tests.		Initials: RR
2.8.1 Visually inspect combustion.	S ☒ U ☐ N/A ☐	Initials: RR
NOTE Changes in flame shape, color, and sound are among early indicators of potential combustion-related problems. Changes may be due to changes in fuel pressure or gas/air linkage movement.		
2.9 Perform safety relief valve(s) pop test.	S ☒ U ☐ N/A ☐	Initials: RR
2.9.1 Check pressure-reducing valve.	S ☒ U ☐ N/A ☐	Initials: RR
2.9.2 Replace the strainer in the valve if needed.		Initials: RR
2.10 Perform slow drain test of low-water cutoff.	S ☒ U ☐ N/A ☐	Initials: RR

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

2.11 Inspect gas piping for proper support and tightness.	S ☑ U ☐ N/A ☐	Initials: RR
2.11.1 Inspect fuel supply system and gas controls.	S ☒ U ☐ N/A ☐	Initials: RR
2.11.2 Leak check gas controls and associated gas piping with a gas detector or soap suds.	S ☒ U ☐ N/A ☐	Initials: RR
2.12 Inspect boiler room ventilation louvers and intake.	S ☒ U ☐ N/A ☐	Initials: RR
2.12.1 Listen for any unusual noises or conditions and correct as necessary.	S ☑ U ☐ N/A ☐	Initials: RR
2.12.2 Report any needed corrections to the MC for corrective maintenance.		Initials: RR
2.12.3 Check combustion air supply openings to ensure that they are not closed or stopped up.	S ☒ U ☐ N/A ☐	Initials: RR
2.12.4 Inspect conditions of stacks and rain caps.	S ☑ U ☐ N/A ☐	Initials: RR
2.12.5 Inspect flue door gaskets to ensure they are in good condition, and properly secured.	S ☑ U ☐ N/A ☐	Initials: RR
2.12.6 Replace if necessary.		Initials: RR

Remarks: None.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

3.0 POST-MAINTENANCE ACTIVITIES

NOTE Post-maintenance activities shall be conducted in accordance with the work order package instructions (e.g., lockout/tagout, special instructions, etc.).

3.1	Close and secure front and rear flue doors.		Initials: RR
3.2	Hook up all associated piping.		Initials: RR
3.3	IF water makeup feeds boiler directly, THEN open by-pass valve to refill boiler, AND close by-pass valve when boiler reaches operating pressure. -or- IF water makeup does NOT feed boiler directly, THEN open supply and return valves to refill boiler.	By-pass ☒ -or- Supply/ Return ☐	Initials: RR
3.4	Fire up boiler and check for air, gas, and water leaks.	S ☒ U ☐ N/A ☐	Initials: RR
3.5	Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	S ☐ U ☐ N/A ☒	Initials: RR
3.6	Check pilot burners and ignition equipment for proper condition and adjustment.	S ☒ U ☐ N/A ☐	Initials: RR
3.7	Visually check burner for proper combustion.	S ☒ U ☐ N/A ☐	Initials: RR
3.8	Record all mechanical maintenance data, testing data, and other notable items.		Initials: RR

NOTE Combustion analysis is verifiable only with a flue gas analyzer and is performed mainly on boilers with power burners.

Remarks: 3.5., BHW-011 is not equipped with gas air linkages.

Work Order No.: 670681-01 Equipment ID No.: BHW-011

3.9	Test water for proper chemical levels. Test and treat water as defined on Datasheet 403-A.002.	S ☒ U ☐ N/A ☐	Initials: RK
3.10	Record all mechanical maintenance data, testing data, and other notable items.		Initials: AR
3.11	Notify MC that work on the boiler system is complete.		Initials: AR

Form 2244

Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): G72083-01	LO/TO Remedy ID: 100080
Location of Equipment to be Isolated: TA: 53 Bldg: E Rm/Other: E309A	Description of Machinery, System & Equipment (MS&E) to be worked on: BHW-001, BHW-002, BHW-003
MS&E Owner/Operator: RANDY KING Z Number: Z02137	Phone: 795-1138
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No
Reason for LO/TO: 1yr FS/WS	
Group LO/TO (2 or more)? ☒ Yes ☐ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☒ Yes ☐ No
Shift or Personnel Changes? ☐ Yes ☒ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☒ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number:

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☐ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:

☐ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)
Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☐ 1		☐ 6	
☐ 2		☐ 7	
☐ 3	N/A	☐ 8	N/A
☐ 4		☐ 9	
☐ 5		☐ 10	

Section 4: LO/TO Sequence

☐ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:
Describe how to effectively isolate & lockout the MS&E below, if not following other document referenced above.

Isolate & Lockout (Step No.)	Equipment Descriptor (What is being locked out? e.g., machine drive motor, input power to MCC)	Energy Source (e.g., electrical, mechanical, pneumatic, hydraulic, chemical, thermal)	Energy Isolation Device (e.g., specific ID, description, circuit #, lock box #)	Location of Energy Isolation Device (e.g., room number, north wall, south wall)	Required LO/TO Position or Alignment (e.g., off, open, closed, on)	Verification Method (e.g., live/dead/live, crack open, on-off-on-off, peer checking, independent verification)	Verifier's Initials (if req'd)	See Section 5: Release (Step No.)
☑ (1)	BHW-001/BHW-002 BHW-003	Local Disconnect	Local Disconnect	E309A	OPEN/OFF	Live/Dead/Live	MM	☑
☑ (2)	BHW-001/BHW-002 BHW-003	Pilot GAS	Pilot GAS	E309A	CLOSED/OFF	CRACK OPEN	MM	☑
☑ (3)	BHW-001/BHW-002 BHW-003	MAIN GAS	MAIN GAS	E309A	CLOSED/OFF	CRACK OPEN	MM	☑

☑ (7)								☐
☐ (8)								☐

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Energy Control Procedure prepared by:

Preparer (print name)	Z Number	Organization	Phone	Signature/Date
Mark Millwood	331693	LOG-CS	4-5758	7/6

By signing below, you acknowledge that this energy control procedure and/or referenced documents identify the isolation devices, isolation points, and methods necessary to prevent any unexpected release of hazardous energy.

CAUTION

Work Package # 645452 - 01

REQUIRED: Proposed work is on a system/component requiring formal status control, and could impact a facility Technical Safety Requirement (TSR). This work package **REQUIRES** facility Operations Center (OC) release **immediately prior to the starting** of any associated work activities/tasks.

REQUIRED: All workers working on systems requiring this attachment must attest, or their RLM/PIC attest, to having the applicable VSS briefing. If workers and/or RLM/PIC CAN NOT attest to having the applicable VSS briefing a worker who does must be present and supervising the work. Not applicable to construction jobs; OCO or PIC/RLM mark training column N/A.

OC Authorization:

Sheet ___ of ___

Form 2244

Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): 645452-01	LO/TO Remedy ID:
Location of Equipment to be Isolated: TA: 55 Bldg: PF-6 Rm/Other: 103	Description of Machinery, System & Equipment (MS&E) to be worked on: B-603
MS&E Owner/Operator: David Loyola Z Number: 114210 Phone: 5-6812	
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No
Reason for LO/TO: (A) FIRESIDE / WATERSIDE B-603	
Group LO/TO (2 or more)? ☒ Yes ☐ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☒ Yes ☐ No LOCKBOX # TA55-010
Shift or Personnel Changes? ☐ Yes ☒ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☐ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number:

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☐ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number: 645452-01

☐ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)
Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☐ 1		☐ 6	
☐ 2		☐ 7	
☐ 3		☐ 8	
☐ 4		☐ 9	
☐ 5		☐ 10	

Section 4: LO/TO Sequence

☐ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number:
Describe how to effectively isolate & lockout the MS&E below, if not following other document referenced above.

Isolate & Lockout (Step No.)	Equipment Descriptor (What is being locked out? e.g., machine drive motor, input power to MCC)	Energy Source (e.g., electrical, mechanical, pneumatic, hydraulic, chemical, thermal)	Energy Isolation Device (e.g., specific ID, description, circuit #, lock box #)	Location of Energy Isolation Device (e.g., room number, north wall, south wall)	Required LO/TO Position or Alignment (e.g., off, open, closed, on)	Verification Method (e.g., live/dead/live, crack open, on-off-on-off, peer checking, independent verification)	Verifier's Initials (if req'd)	See Section 5: Release (Step No.)
☐ (1)	B-603	MECHANICAL/ ELECTRICAL	NG-B603-V-1	PF-6 RM#103	CLOSED	PEER	A.U.	☐

☐ (8)								☐

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Energy Control Procedure prepared by:

Preparer (print name)	Z Number	Organization	Phone	Signature/Date
TIMOTHY FANGIO	282917	LOG-CS	4-7292	8-17-2020

By signing below, you acknowledge that this energy control procedure and/or referenced documents identify the isolation devices, isolation points, and methods necessary to prevent any unexpected release of hazardous energy.

Energy Control Procedure approved by:

MS&E Owner/Operator (print name)	Z Number	Organization	Phone	Signature/Date
David Leyba	118210	MSSTMSS	5-6812	8-03-20

Section 6: All Authorized Workers (anyone applying a lock for this activity)

Fill out the following information or print and attach Authorized Workers information from the Lockout/Tagout Remedy Application.

Authorized Workers Name(s)	Z Number	Date Lock Applied	Date Lock Removed
Lead: TIMOTHY FANGIO	282917	8-17-2020	8-20-20

Lockout/Tagout (LO/TO) Orders

Section 1: General Information

Work Document Number (e.g., Package/Procedure #): 645452-01	LO/TO Remedy ID: 98835
Location of Equipment to be Isolated: TA: 55 Bldg: PF-6 Rm/Other: 103	Description of Machinery, System & Equipment (MS&E) to be worked on: B-602
MS&E Owner/Operator: VICTOR SIERRA Z Number: Z43191 Phone: 5-7305	
Shutdown to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No	Re-energize/restart to be performed by MS&E Owner/Operator (as determined by MS&E Owner/Operator) ☐ Yes ☒ No
Reason for LO/TO: (A) FIRESIDE / WATERSIDE	
Group LO/TO (2 or more)? ☒ Yes ☐ No *If yes, a lead authorized worker must be appointed.*	Group lock box used? ☒ Yes ☐ No Lock Box # TA55-010
Shift or Personnel Changes? ☐ Yes ☒ No *If yes, a description of how the continuity of LO/TO protection will be ensured must be referenced or attached to this form. (See Section 3.9.6 of P101-3 for details.)*	☐ Continuity of LO/TO protection details described in operating procedure, work instruction, or other work control document. Document Number: N/A

Section 2: Energy Control Procedure

1. Plan the work.
2. Identify and assess hazardous energy.
3. Contact the MS&E owner/operator.
4. Obtain locks and tags from lock coordinator.
5. Notify affected workers.
6. Shutdown MS&E according to **Section 3: Shutdown Sequence**.
7. Isolate and lock out MS&E from energy source, relieve stored energy, and perform verification of isolation according to **Section 4: LO/TO Sequence**.
8. Perform the work.
9. Release MS&E from LO/TO according to **Section 5: Release MS&E from Lockout/Tagout Sequence**.

Section 3: Shutdown Sequence

☒ Perform shutdown according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number: 645452-01

☐ **N/A**; MS&E to be worked on will be isolated according to **Section 4: LO/TO Sequence** (e.g., cannot be shut down)
Detail the process to normally shut down the MS&E below, if not following other document referenced above or N/A.

Step No.	Action/Description	Step No.	Action/Description
☐ 1		☐ 6	
☐ 2		☐ 7	
☐ 3		☐ 8	
☐ 4		☐ 9	
☐ 5		☐ 10	

Section 4: LO/TO Sequence

☑ Perform LO/TO sequence according to operating procedure, work instruction, or other work control document (e.g., IWD, Owner's Manual, SOP).
Document Number: 645452-01
Describe how to effectively isolate & lockout the MS&E below, if not following other document referenced above.

Isolate & Lockout (Step No.)	Equipment Descriptor (What is being locked out? e.g., machine drive motor, input power to MCC)	Energy Source (e.g., electrical, mechanical, pneumatic, hydraulic, chemical, thermal)	Energy Isolation Device (e.g., specific ID, description, circuit #, lock box #)	Location of Energy Isolation Device (e.g., room number, north wall, south wall)	Required LO/TO Position or Alignment (e.g., off, open, closed, on)	Verification Method (e.g., live/dead/live, crack open, on-off-on-off, peer checking, independent verification)	Verifier's Initials (if req'd)	See Section 5: Release (Step No.)

☐ (8)								☐

Section 5: Release MS&E from Lockout/Tagout Sequence

1. Check the MS&E and immediate area for items that could result in damage or danger on start-up.
2. Check the work area to ensure that all workers have been safely positioned or removed from the work area.
3. Verify that the controls are in neutral or "off" position.
4. Notify the owner/operator and affected workers that work is complete and MS&E is ready to release from LO/TO.
5. Remove the LO/TO device, and re-energize (if appropriate according to MS&E owner/operator) according to the sequence as identified above under Release in **Section 4: LO/TO Sequence** or according to operating procedure, work instruction, or other work control document identified in **Section 4**.
6. Return lock and locking device to Lock Coordinator.

Integrated Work Document (IWD) Part 3, Validation and Work Release

IWD # 645452-01 Revision #: _____

Work Release

By signing below, I verify this activity is compatible with current facility configuration and operating conditions.

FOD designated Operations Manager or other facility point-of-contact for work area

Signature/Z#/Date **(If required by FOD)**: N/A

Note: For Standing IWD, release may be given concurrently with signatures on Part 2.

By signing below, I have verified the following:

- I have verified authorization by ensuring approval signatures of the RLM and FOD.
- I have jointly conducted a validation walkdown with workers to confirm the IWD can be performed as written, and that required initial conditions and other prerequisites are in place.
- The assigned workers are authorized and are competent to perform the work in a safe, secure, and environmentally responsible manner.
- I have conducted the pre-job briefing, and all workers (including support workers) have been briefed.
- I have ensured coordination with any required FOD work-area representatives (e.g., area work coordinators).

PIC (Signature/Z#/Date) **Required**: [signature] 204536 8/20/2020

Alternate PIC Signatures **acknowledges** PIC authority is assumed for the first time. *(Note: Alternate PICs are required to sign only once, but formal handoff includes conferring with previous PIC to obtain all required information associated with the handoff.)*

Alternate PIC (Signature/Z#/Date) **Required**: _____

Alternate PIC (Signature/Z#/Date) **Required**: _____

Pre-Job Brief Content

- What are the critical steps* or phases of this activity?
- How can we make a mistake at that point?
- What is the worst thing that can go wrong?
- What controls, preventive measures, and bounding conditions are needed?
- What work permits are required and how will we meet their requirements?
- What are the handoffs and coordination requirements among workers and multiple PICs?
- Are there hold-points including those that require sign-offs?
- What are the pause/stop work responsibilities and expectations (e.g., for unanticipated conditions or hazards)?
- How would we respond to alarms and emergencies?
- Are there lessons learned from previous similar work?
- Is other information needed to perform this activity in a safe, secure, and environmentally responsible manner?
- Does everyone agree to the work tasks/steps, hazards, and controls and commit to follow them?

* "Critical steps occur anytime human performance involves a substantial transfer of energy, or movement of solids, liquids, and gases, or the transmission of data and information that , if not performed under control, could cause serious harm to one or more important assets." (Performance Improvement, vol. 53, no. 9, October 2014)

IWD #_____ Revision #:_____ **Work Release**

Pre-Job Brief Attendance Roster

By signing below **as required**, I agree to the following:

- I agree to follow the work steps and implement the controls as written as applicable to my work assignments.
- I agree to pause/stop work when conditions or hazards change or when I encounter unexpected conditions during the execution of work, or when work cannot be performed as written, or instructions become unclear during execution.
- I confirm that I am authorized, qualified, and fit to perform the work.

Work Release

By signing below, I verify this activity is compatible with current facility configuration and operating conditions.

FOD designated Operations Manager or other facility point-of-contact for work area

Signature/Z#/Date **(If required by FOD)**: N/A

Note: For Standing IWD, release may be given concurrently with signatures on Part 2.

By signing below, I have verified the following:

- I have verified authorization by ensuring approval signatures of the RLM and FOD.
- I have jointly conducted a validation walkdown with workers to confirm the IWD can be performed as written, and that required initial conditions and other prerequisites are in place.
- The assigned workers are authorized and are competent to perform the work in a safe, secure, and environmentally responsible manner.
- I have conducted the pre-job briefing, and all workers (including support workers) have been briefed.
- I have ensured coordination with any required FOD work-area representatives (e.g., area work coordinators).

PIC (Signature/Z#/Date) **Required**: [signature] 204536 8/12/2020

Alternate PIC Signatures **acknowledges** PIC authority is assumed for the first time. *(Note: Alternate PICs are required to sign only once, but formal handoff includes conferring with previous PIC to obtain all required information associated with the handoff.)*

Alternate PIC (Signature/Z#/Date) **Required**: _____

Alternate PIC (Signature/Z#/Date) **Required**: _____

Pre-Job Brief Content

- What are the critical steps* or phases of this activity?
- How can we make a mistake at that point?
- What is the worst thing that can go wrong?
- What controls, preventive measures, and bounding conditions are needed?
- What work permits are required and how will we meet their requirements?
- What are the handoffs and coordination requirements among workers and multiple PICs?
- Are there hold-points including those that require sign-offs?
- What are the pause/stop work responsibilities and expectations (e.g., for unanticipated conditions or hazards)?
- How would we respond to alarms and emergencies?
- Are there lessons learned from previous similar work?
- Is other information needed to perform this activity in a safe, secure, and environmentally responsible manner?
- Does everyone agree to the work tasks/steps, hazards, and controls and commit to follow them?

* "Critical steps occur anytime human performance involves a substantial transfer of energy, or movement of solids, liquids, and gases, or the transmission of data and information that , if not performed under control, could cause serious harm to one or more important assets." (Performance Improvement, vol. 53, no. 9, October 2014)

IWD #_____ Revision #:_____ **Work Release**

Pre-Job Brief Attendance Roster

By signing below **as required**, I agree to the following:

- I agree to follow the work steps and implement the controls as written as applicable to my work assignments.
- I agree to pause/stop work when conditions or hazards change or when I encounter unexpected conditions during the execution of work, or when work cannot be performed as written, or instructions become unclear during execution.
- I confirm that I am authorized, qualified, and fit to perform the work.

Worker Engagement Questions

Worker engagement questions are intended to focus attention on the task and ensure uncertainties are addressed. Examples of worker engagement questions are provided below. Worker engagement questions should be tailored to the situation.

Each of the questions listed below will be discussed at each Pre-Job Brief with all affected personnel.

Topic PF 6 A Boiler Insp / maint	Completed (X)
What permits, permissions, or support are required to safely start this work?	X
What is the most likely thing that could go wrong (not the worst thing) and what, specifically, will prevent it?	X
What can cause us to go beyond the scope of the work?	X
What hazards in the work area may not have been considered during planning of this job	X

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)	
Revision #:		**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 645452 - 01		**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:**
		Additional Location Description:

SECTION 1 – SCOPE OF WORK
SECTION 2 - PRECAUTIONS AND LIMITATIONS
SECTION 3 – PREREQUISITES/INITIAL CONDITIONS
SECTION 4 – SPECIAL TRAINING/MEDICAL REQUIREMENTS
SECTION 5 – SPECIAL TOOLS/EQUIPMENT
SECTION 6 – WORK INSTRUCTIONS
SECTION 7 – POST WORK ACTIVITIES
SECTION 8 – CLOSEOUT

1. SCOPE OF WORK

Perform annual fireside/waterside maintenance on Hot Water Boilers as per 403-A.006

Hazard Analysis (HA) Team: Martin Nowakowski, James Gallegos, Tristan McDonald, Tim Fangio

Date HA Performed : 7/2019

2. PRECAUTIONS AND LIMITATIONS

2.1. If steps cannot be completed as described, or if unforeseen situations occur, **PAUSE WORK**, stabilize the situation, contact your supervisor, and await further instructions before proceeding.

2.2. Work steps are sequenced in a logical flow to ensure that the work is performed safely, efficiently, and effectively. If work steps are required to be worked in a specific sequence, it will be identified in the applicable section of the IWD

2.3. Coordinate work to minimize equipment down time.

- Remove and reapply LOTO as needed to maintain system operability
- Refer to applicable steps in IWD for LOTO
- Verify "0" voltage every time locks are applied

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)	
Revision #:		**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 645452 – 01		**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:** **Additional Location Description:**

3. PREREQUISITES/INITIAL CONDITIONS

3.1. **Entry Conditions:**

- (PF6) Obtain authorization and NMT-79 key from Ops Center prior to entering PF6.
- Follow ALL entry postings.
- Hearing protection required.
- Be aware of automatic starting equipment.
- Further PPE requirements will be task specific.

3.2. Verify Work Order is on the schedule for work release.

3.3. Ensure ALL material and special tools are available.

3.4. Obtain ALL necessary permits prior to performing work.

3.5 General hazards and associated PPE is required:

- Safety Shoes
- Safety Glasses with Side Shields
- Cut 4 Resistant Gloves shall be worn when workers are performing maintenance or other physical work activities, when hands are exposed to hazards
- Hard Hats required when falling or flying objects may exist, overhead structures, energized conductors, or where equipment or other materials create an overhead hazard
- Further PPE requirements will be task specific

3.6 Noise:

- Wear proper hearing protection in areas posted

3.7 Fall from stepladders/ladders/scaffolding:

- Inspect the stepladder/ladders prior to use
- Maintain 3-points of contact when ascending and descending the stepladder/ladder
- Scaffolding to be inspected daily

3.8 Working with Chemicals:

- Chemical splash – Wear safety goggles
- Use of Trionic gloves
- SDS –

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)	
Revision #:		**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 645452 - 01		**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:** **Additional Location Description:**

4. Special Training/Medical Requirements

1. **The following training is required for the General Hazards**
   - CU-10968 WQ LOG Maintenance Worker
2. **The following training is required when working in posted "high noise" areas:**
   - CU- 2307 Hearing Conservation/ Noise
3. **The following training is required for WQ LOG Electrician-Maintenance**
   - CU-642 WQ LOG Electrician-Maintenance
   - Cu-2559 Electricians/Apprentices and Facility Engineer (when performing zero voltage and trouble shooting)
4. **The following training is required for WQ LOG Pipefitter-Maintenance**
   - CU-647 WQ LOG Pipefitter-Maintenance
5. **The following training is required when working chemicals**
   - CU-4261 Chemical Workers Authorized (HAZCOM)
6. **The following training is required while performing work on scaffolding:**
   - CU-9257 Fall Protection Training
   - CU-3949 Scaffold User

5. Special Tools/Equipment

NONE

6. Work Instructions

6.1 Contact the following prior to performing work.

6.1.1 Operations Center (7-3330)

6.1.2 Maintenance Coordinator David Leyba 665-6812

6.1.3 Operations Supervisor Larry Dostart (office 667-4057, cell 309-1154)

- Mobilize equipment/materials/tools to and from work site.
- Barricade designated work area using robust barrier rope/stanchion and/or signage, to establish boundaries
- Carpenters will erect and dismantle scaffolding per standing IWD as needed.

6.2 Standing IWD, located in work package

6.2.1 Scaffolding to be inspected daily

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)	
Revision #:		**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 645452 - 01		**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:**	**Additional Location Description:**

NOTE:

Ops tech to align system prior to performing work, and when work is complete.

1. Notify Operations Center prior to starting work.

LANL Boiler Inspector Randall Austin: 667-6740, cell 695-6036

Request copy of Boiler Inspection report for package.

2. Perform pre-maintenance step 1.1 as per 403-A.006

   Place and remove scaffolding as needed per standing scaffold IWD.

NOTE:

LOTO devices shall be applied in accordance with requirements of P101-3, Lockout/Tagout for Hazardous Energy Control

3. LOTO may be applied and removed LOTO as required to complete preventive maintenance and testing.

4. Step 2.1 Pipefitter (request Operations Tech to align system)

   a.) Close gas valves, apply LO/TO and verify zero energy by ensuring gas is bleed-off at union and area is well ventilated.
   located in rm.103

   B602: NG-B602-V-1, NG-B602/B603-V-1
   B603: NG-B603-V-1, NG-B602/B603-V-1

   b.) Close associated water valves, apply LO/TO and verify zero energy by opening drain valve.
   located in rm.103

   B602: CCHW-B602-V1, CCHW-B602-V2
   B603: CCHW-B603-V1, CCHW-B603-V2

   c.) Place boiler circuit in the OFF position located in rm.101 and apply LOTO and verify zero energy by attempting to start boiler.
   B602: MCC-603D compt. B1L
   B603: MCC-603C compt. A2R

Non melting long sleeve shirt and pants, safety glasses with side shields, hearing protection and leather gloves. Step 2.1 as per 403-A.006 section 2.0

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)	
Revision #:		**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 545452 - 01		**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:** / **Additional Location Description:**

5. Pipefitters ensure boiler temperature is cool to the touch prior to working on boiler. (under ≤100° F) perform preventive maintenance steps 2.2 thru 2.7.6 as per 403-A.006 section 2.0

When performing step 2.2, all boiler water and solids **MUST** be contained and not go down drain.

MSDS for Chevron SRI Grease NLGI 2, Nalco TRAC-105, and Nalco 73310.

PPE: Wear safety glasses with side shields, Nitrile rubber gloves, and use in a well-ventilated area.

Recommend chemical goggles when draining boiler water to prevent water splashing into eyes.

6. Electrician verify circuit in the OFF position and apply LOTO located in rm.101

B602: MCC-603D compt. B1L
B603: MCC-603C compt. A2R

Non melting long sleeve shirt and pants, safety glasses with side shields, hearing protection and leather gloves.
Step 2.1 as per 403-A.006 section 2.0

⚠WARNING

Electrical, contact with energized electrical system

Class 1.3b, mode 1
480v

PPE: v-rated gloves, leather gloves, non-conductive safety glasses, leather work footwear, hearing protection, FR long sleeve shirt ≥ 4 cal/cm² and FR long pants ≥ 4 cal/cm² or equivalent coveralls.
Reference Facility Electrical Hazard Analysis Record form 2193

Calibration Verification

Verify that the instrument to be used on this PM is within calibration:

Voltage meter: Manufacturer/ Model #. Fluke 87 V

File #. 105525 Cal. Due Date: 8/15/20

File# 039769 Fluke 87 V 6/23/21 → date used 8/18/20

Los Alamos	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)		
Revision #:			**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 645432 - 07			**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:**	**Additional Location Description:**

7. Verify "0" Voltage at line side of disconnect in room 103.

   B602: DISC-602-1

   B603: DISC-603-1

8. Electricians perform preventive maintenance steps 2.7.7 thru 2.7.8 as per 403-A.006 section 2.0

9. Pipefitters perform preventive maintenance steps 2.7.9 thru 2.7.10 as per 403-A.006 section 2.0

MSDS for Chevron SRI Grease NLGI 2

PERSONAL PROTECTIVE EQUIPMENT:
Wear safety glasses with side shields, Nitrile rubber gloves, and use in a well-ventilated area.

10. Pipefitters perform preventive maintenance steps 2.8 thru 2.12.6 as per 403-A.006 section 2.0

NOTE: When performing steps b. thru e. Boiler water and all solids MUST be contained and not go down the drain.

The following steps are needed to complete waterside maintenance.

a). Open flue door and inspect tube sheets for water leakage. It tube leakage is suspected call the system engineer for further evaluation. The narrow ligaments between tube holes are subject to tremendous stresses and should be watched for any sign of cracking mainly due to overheating.

b). Drain boiler and remove all hand hole and manhole covers, where applicable, to allow a visual check of all internal accessible areas. Example: shell, tubes and tube sheets.

c). Carefully examine waterside surfaces using a strong light and mirror where required. Look for evidence of scale, corrosion, blisters, or pitting, indicating adequacy of water treatment.

d). Use a high pressure hose to wash sediment out of the bottom and other internals of the boiler.

e). Remove both head covers from the bodies of the two float operated low water cut-offs (LWCs).

The float-assembly and mercury switches are located on these heads. Flush out both LWC bodies. Inspect floats and replace if necessary. Reinstall head covers. Remove caps from the inspection crosses associated with both LWCs and flush out piping connected to boiler. Reinstall caps.

11. Craft remove LOTO and place circuit in the **ON** position. Located in rm.101

B602: MCC-603D compt. B1L
B603: MCC-603C compt. A2R

- Non melting long sleeve shirt and pants, safety glasses with side shields, hearing protection and leather gloves.

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)	
Revision #:		**Activity/Task Title:** 550006 BHW Annual Fireside/Waterside Maintenance
Work Document #: (WO #/Task) 04945[illegible] 01		**Planner/Preparer (Name/Z#/Date)** Martin Nowakowski Z# 194072 7/9/2020
TA: 55	**Building:** 0006	**Room:**	**Additional Location Description:**

Craft remove LOTO and **OPEN** associated water valves.

Located in rm.103 B602: CCHW-B602-V1, CCHW-B602-V2
B603: CCHW-B603-V1, CCHW-B603-V2

Craft remove LOTO and **OPEN** gas valves. (Note: ensure the union used to verify zero energy is air tight.)

Located in rm.103 B602: NG-B602-V-1, NG-B602/B603-V-1
B603: NG-B603-V-1, NG-B602/B603-V-1

12. Pipefitters perform post-maintenance steps 3.1 thru 3.11 as per 403-A.006 section 3.0

NOTE:

Omit step 3.9 of PMI 403-A.006 as per C.S.E.

Water Chemistry corrections are completed using the semi-annual water treatment PM.

13. Remove all barricades and signs.

14. Notify Operations Center work is complete, inform CSE of any deficiencies found.

7. Post Work Activities

7.1 **CLEAN-UP** work area.

7.2 **REMOVE** barricades from work area.

7.3 **CONTACT** Ruben Trujillo @ 665-6378, 664-4242 (pager), 551-2737 (cell) for guidance on waste disposal. Dispose of waste per their guidance.

8. Closeout

CONTACT the MC and inform them the work is completed. Complete all the required documentation.

COMPLETE all the required documentation.

Document Title: 550006 (A) FIRESIDE/WATERSIDE BOILER HOT WATER MAINT			
Document Number: 645452-01	**Revision or Issue Date:**		
Document Point of Contact: Martin Nowakowski			
Section 1: Activity/Document Screening		**Y**	**N**
1. Is the job classified as high hazard?			✓
2. Are multiple organizations involved?			✓
3. Is an IH/S designated posting required?			✓
4. Is work taking place in a Permit Required Confined Space?			✓
5. Is medical monitoring, sampling, or any type of IH/S monitoring required?		✓	
6. Is IH/S requiring respiratory protection?			✓
Continue with remainder of form 1) if any "yes" answers above, or 2) at reviewer's discretion.			
Section 2: Hazard Review		**Y**	**N**
1. The Hazard Assessment has been completed and documented per P300?		✓	
2. The appropriate IH/S Subject Matter Experts have been engaged per identified hazards?		✓	
3. Is an IH/S designated posting required?			✓
Section 3: Activity Review	**NA**	**Y**	**N**
1. Is required IH/S sampling specifically identified?	✓		
2. Are all required permits specifically identified?	✓		
3. Are all posting requirements specifically identified?	✓		
4. Are release conditions specifically identified for the required postings?	✓		
5. Are all medical monitoring requirements identified?		✓	
6. Is required PPE specifically identified? (E.g., fire resistant clothing for sparking)		✓	
7. Are administrative & engineering controls identified and when to be used? (E.g., LEV during torch cutting or welding)		✓	
8. Are IH/S requirements for sequential tasks specifically identified? (E.g, when outer PPE layer(s) must be removed period to leaving an enclosure)	✓		
9. Is a single PIC identified prior to work when multiple organizations are involved?	✓		
10. Will controls introduce new hazards or exacerbate existing conditions? (E.g., heat stress)	✓		
If yes, have those hazards been addressed?			
11. Have co-located personnel been identified and hazard communication indicated?		✓	
12. Are hazards from co-located activities anticipated and addressed?		✓	
13. Are hold points added when authorization to proceed is necessary? (E.g., additional or different controls to be determined pending sampling results)	✓		

Section 4: Issues and Comments

Complete this section for comments or any "no" questions in sections 2 and 3. Attach another sheet if needed.

Question	Issue/Comment
2.3	"No" selected for 2.3; no IH/S postings are required. Added comment per Section 4 instruction above.
1.5	"Yes" due to Hearing Conservation Program enrollment for work in high noise areas

Approval/Signature (IH/S Use Only) *(Signature indicates issues/comments are satisfactorily resolved; IWD is approved.)*

Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)

Revision #: 6			**Activity/Task Title:** CMS-IWD-001: Standing Non PF-4 Scaffolding Erection and Disassemble
Work Document (WO # / Task)			**Planner/Preparer** Name: Amber N. Monnet-Hannon Z# 219201 Date: 06.22.18
TA: 55	**Building:** Various	**Room:**	**Additional Location Description:**

Z# 219201 3.11.19

ACTIVITY DESCRIPTION/OVERVIEW

Standing IWD for Non-PF-4 Erect and Dismantle Scaffolding

Revision 6 includes clarification on hard hat PPE on Steps 3.1 (p. 4), and Steps 4.1 & 5.2 (p. 5), a NOTE regarding the drill filings (p. 4) and updated PIC list (p. 6)

List Names of Hazard Analysis (HA) Team Michael Trujillo, Sam Maldonado, John Madore, Glen Vanderpoel, Amber N. Monnet-Hannon, James Gallegos

Date HA Performed 06.20.18

PRECAUTIONS/LIMITATIONS/PREREQUISITES:

(include training/authorizations, approved permits, and area postings)

1. **Entry Conditions for PF-6**
   - Obtain authorization and key from Op center prior to entering PF-6.
   - Room-101 None
   - Room-102 ASHARE light not activated.
     (American Society of Heating, Refrigerating, and Air-Conditioning Engineers)
   - Room-103 Automatic start equipment located in area (boilers, process air dryer automatic blow downs, air compressors)
2. **Entry Conditions for PF-8**
   - Obtain authorization and key from Op center prior to entering PF-8
   - Automatic start equipment located in area (Instrument air dryer automatic blow downs, generator air compressors)
3. **Entry Conditions for PF-10**
   - Obtain authorization and key from Op center prior to entering PF-10
   - Automatic start equipment located in area (boilers, pumps, diesel generator)
4. **Entry Conditions for PF-11**
   - Obtain authorization and key from Op center prior to entering PF-11
   - Automatic start equipment located in area (boilers, pumps, diesel generator)
5. **Entry Conditions for PF-391**
   - Obtain authorization and key from Op center prior to entering PF-11
6. **Entry Conditions for PF-1, PF-2, PF-3, PF-5, PF-39, PF-28, PF-114, PF-20, PF-18, PF-42, PF-314, PF-355, PF-142, PF-185, PF-371**
   - None
7. **If steps cannot be completed as described, or if unforeseen situations occur, PAUSE WORK, stabilize the situation, contact your Foreman/Superintendent, and await further instructions before proceeding.**
8. **Tasks may be performed in any sequence order as necessary to coordinate work at the discretion of the PIC**
9. **The following training is required for the General Hazard Section:**
   - Cu-10968 WQ-LOG Maintenance Worker
10. **The following training is required when working in posted "high noise" areas:**
    - Cu-2307 Hearing Conservation/ Noise Training Requirement

Los Alamos NATIONAL LABORATORY	**Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)**		
Revision #: 6			**Activity/Task Title:** CMS-IWD-001: Standing Non PF-4 Scaffolding Erection and Disassemble
Work Document (WO # / Task)			**Planner/Preparer** Name: Amber N. Monnet-Hannon Z# 219201 Date: 06.22.18
TA: 55	**Building:** Various	**Room:**	**Additional Location Description:**

11. The following training is required for working on or erecting and dismantling scaffolding:

- Cu-641 WQ-LOG Carpenters
- Cu-726 WQ-LOG Carpenters-Scaffold Competent Person

12. The following training is required for Hazards Conditions:

- Cu-4261 Chemical Workers, Authorized (HAZCOM)

13. The following training is required for Fire Watch:

- Cu-3065 Fire Extinguisher Portable

GENERAL HAZARDS *(identify hazards and associated controls)*

Exposure to work hazards by tenants/ adjacent personnel or public:

- Barricade work area

When working with tools that pose possible Cuts, or Abrasions, or when working with Wire or Sharp Edges

- Inspect all tools
- Wear Level 4 Cut Resistant Gloves

Noise:

- Wear proper hearing Protection in areas posted

Fall from stepladders/ladders/scaffolding:

- Inspect the stepladder/ladders prior to use
- Maintain 3-points of contact when ascending and descending the stepladder/ladder
- Scaffolding to be inspected daily

Slips, Trips and Falls

- Be aware of ground and floor conditions.
- Be aware of your surroundings and use caution in areas with uneven surfaces, holes, steep slopes, protruding items, ice, mud and snow.
- Maintain good housekeeping practices and clearly mark and identify hazards that can't be eliminated.
- Keep work path area clear of debris

Back Strains – lifting/strains/twisting

- Use proper lifting and bending technique at all times
- Keep work path area clear of debris
- Use buddy system or mechanical lifting device for lifting over 50 lbs

Los Alamos NATIONAL LABORATORY	Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)		
Revision #: 6			**Activity/Task Title:** CMS-IWD-001: Standing Non PF-4 Scaffolding Erection and Disassemble
Work Document (WO # / Task)			**Planner/Preparer** Name: Amber N. Monnet-Hannon Z# 219201 Date: 06.22.18
TA: 55	**Building:** Various	**Room:**	**Additional Location Description:**

Task-1 Scaffolding Placement

NOTE

Assessment should include the determination of appropriate scaffold system to be used (Tube & clamp, Baker, Safeway, etc.)

Use tethered pouches – anything loose must be removed.

1.1 Before erecting scaffolding, perform a visual on systems, structures and components (SSC) that could be damaged while erecting scaffold. Place protective covers where possible to prevent damage to (SSC)

Task-2 Transport Scaffolding

2.1 Superintendent will notify Operations Center prior to starting work, and location of scaffolding.

2.2 Load scaffolding material and planks for transport to designated area

- **Ensure that ALL scaffolding material and planks are secured for transport**
- **Use Caution and be alert when moving scaffolding material and planks**

2.3 Unload scaffolding material and planks at designated area

- **Keep area clean and organized**

Task-3 Erect Scaffold

NOTE

Scaffolding shall be erected in such a manner that a safe egress is provided during an emergency.

- **The exit route shall be free of material or equipment**
- **The line-of-sight to an exit sign must be uninterrupted**
- **Egress must be maintained during construction and repair**
- **Egress must be maintained for electrical panels**
- **An exit route shall maintain a minimum height of 7'6" and a width of 28".as per OSHA 1910.36**

If the requirements cannot be met, Foreman/Superintendent will contact DESHF-TA-55 IH personnel for instruction/approval

Los Alamos NATIONAL LABORATORY

Facilities Maintenance IWD – (Facility Maintenance Activity Specific Information)

Revision #: 6			**Activity/Task Title:** CMS-IWD-001: Standing Non PF-4 Scaffolding Erection and Disassemble
Work Document (WO # / Task)			**Planner/Preparer** Name: Amber N. Monnet-Hannon Z# 219201 Date: 06.22.18
TA: 55	**Building:** Various	**Room:**	**Additional Location Description:**

3.1 Erecting scaffold in accordance with manufacturer direction for Tube & Clamp Scaffold, Baker Scaffold, and Safeway Scaffold.

PPE is required for Erecting Scaffold and overhead obstruction

- **Safety Shoes for MSS craft**
- **Safety Glasses with side shields**
- **Level 4 Cut Resistant Gloves**
- **Hard Hats**
- **Reflective Vest for outside ONLY**

NOTE

Ensure all drill filings and other debris generated while setting up or dismantling scaffolding is cleaned up and properly disposed of prior to leaving the jobsite. Be cognizant of potential poke/cut hazards associated with filings. Level 4 Cut Resistant Gloves shall be worn.

3.2 Ensure all cross bracing is in place to prevent platform movement.

3.3 Install railing, toe boards, guardrail netting and ladder (if any of these issues may not be used, area must be barricaded).

- **Do not locate scaffold planks any closer than 18 inches below sprinklers.**
- **Planking will not be assembled greater than 4 feet wide, if so, use planks with water flow passage.**
- **Columns (i.e. vertical scaffold tube and supports) should be located at least 3X the tube diameter away from sprinklers.**

If any of the above conditions cannot be met AND the scaffolding needs to be left unattended, THEN Foreman/Superintendent will contact the Operations Center and ESTABLISH a fire watch OR PLACE scaffold planks on edge. Planks shall be secured to prevent unintentional falls. Planks may also be removed and placed on the floor in a safe configuration. Remove tag and once modify is complete inspect and re-tag. INITIATE Attachment B, TA-55 SSC Equipment Work Release and Acceptance Red Sheet if a fire watch is to be established.

NOTE: If planking is reconfigured (even temporarily), THEN a new scaffolding inspection is required by a qualified inspector.

3.4 Attach rope to the scaffolding, the rope should be of sufficient length to accommodate raising and lowering tools and materials to the floor.

NOTE

Scaffolds shall only be erected, moved, dismantled under the supervision and direction of a Competent Person qualified in scaffold erection

In accordance with (29 CFR 1926.451(f)(7).

Instructions: Enter the requested information. All items marked **S** or **Y** are satisfactory. Document all items marked **U**, **N**, or **N/A** in the Remarks section below, noting the step number and reason. Notify the foreman or supervisor of problems involving imminent danger.

TA: 55 Building: PF-6 Room: 103

Date Inspected: 8 / 11 / 2020 Inspectors: Timothy Fanelo/Andrew Ulibarri

1.0 PRE-MAINTENANCE ACTIVITIES

NOTE Preoperational and pre-maintenance activities shall be conducted per the work order package, e.g., lockout/tagout, permits, special instructions, etc.

! WARNING If purging of gas lines will be required during this maintenance, ensure that the purging activity is addressed in the Integrated Work Document (IWD). The following must be addressed (see Master Specification 23 1123):

1. Purged fuel gases shall be directly vented to a safe location outdoors, away from personnel and ignition sources. This may be accomplished through permanent piping or temporary piping or hosing.
2. If it is not possible to vent purged gases outdoors, the following conditions must be met:
   a. Purging activity must be approved by the LANL Fire Marshal based on a documented justification detailing why outdoor venting is not possible and IWD.
   b. Gas concentration in the space to which the purge is vented shall be maintained at no more than 25% of the Lower Explosive Limit (LEL). For natural gas, the LEL is a concentration of 5% in air or 50,000 ppm. Therefore a maximum concentration of 12,500 ppm is allowed for natural gas. The concentration may be controlled by providing adequate ventilation or by limiting the amount of purge gas.
   c. Combustible gas detectors shall be used during the purging operation to monitor the gas concentration.
   d. Nonessential personnel shall be evacuated from the vicinity (including adjacent spaces) during the purging operation.
   e. Ignition sources in the purging space shall be controlled or eliminated.

NOTE All repair work, adjustments, or the replacement of parts shall be done in accordance with the manufacturer's procedures, specifications, recommendations, and instructions.

Remarks: NONE

Work Order No.: 645452-01 Equipment ID No.: B-602

1.1	Notify maintenance coordinator (MC) that work will be in progress on the boiler system.		Initials:

2.0 MAINTENANCE

NOTE These selected hot water boilers are mainly boilers with power burners that have refractory in front and rear flue doors or have heat extractors in the fire-tubes as are found in most one-pass boilers (Sellers). Hot water heating boilers with atmospheric burners generally require minimal fireside preventative maintenance. Contact the MSS-MP Boiler subject matter expert (SME) at 7-8550 with questions or concerns.

2.1	Lock and tag out electrical and all associated valves on boiler and shut off gas supply.		Initials:
2.2	Cool boiler, open air cock, and drain the boiler.		Initials:
2.3	Perform an internal and external inspection after thorough cleaning.	Circle one: (S) U N/A	Initials:
2.3.1	Check the fireside furnace and fire-tubes for any evidence of soot formation or corrosion.	Circle one: (S) U N/A	Initials:
2.3.2	Brush and vacuum furnace and fire-tubes if such conditions exist.		Initials:
2.3.3	Perform hydrostatic test based on the boiler's Maximum Allowable Working Pressure and/or facility potable water pressure as long as the potable water pressure is at least 30 psi over boiler operating pressure.	Circle one: S U (N/A)	Initials:
2.3.4	Note if any boiler tubes and/or fittings are leaking, and repair as required. For any major repairs (determined by the SME), request a work order for the repairs from the MC.		Initials:
2.3.5	On one-pass boilers (Sellers), check condition of all heat extractors.	Circle one: (S) U N/A	Initials:

Remarks: STEP 2.3.3 N/A DO NOT HYDRO TEST BOILER.

Work Order No.: 645452-01 Equipment ID No.: B-602

2.3.6 Check refractory materials.	Circle one: (S) U N/A	Initials:
2.3.7 Replace if needed.		Initials:
2.4 Perform maintenance on low-water cutoff float chamber and water feeder. Disassemble to ensure freedom from obstruction and proper functioning of the working parts.		Initials:
2.5 Perform routine burner maintenance.		Initials:
2.5.1 Observe temperature and operating pressure and general conditions.	Circle one: (S) U N/A	Initials:
2.5.2 Fire and cycle the burner.		Initials:
2.6 Perform routine maintenance of circulating pump and expansion pump equipment.		Initials:
2.6.1 Observe condition of expansion tank.	Circle one: (S) U N/A	Initials:
2.6.2 Drain expansion tank if it is of a non-bladder type and refill to reestablish an air cushion.	Circle one: S U (N/A)	Initials:
2.6.3 Check the air pressure on the bladder-type expansion tanks.	Circle one: (S) U N/A	Initials:
2.6.4 Observe operation of circulating pumps.	Circle one: (S) U N/A	Initials:
2.6.5 Lubricate pump motors.		Initials:
2.7 Perform routine maintenance of entire combustion control equipment.		Initials:

Remarks: STEP 2.6.2 N/A DID NOT DRAIN EXPANSION TANK.

2.7.1	Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	Circle one: (S) U N/A	Initials:
2.7.2	Adjust air/fuel mixture as needed.		Initials:
2.7.3	Test flame detection devices on boilers with flame scanners.	Circle one: (S) U N/A	Initials:
2.7.4	Remove the flame scanner with the burner firing.		Initials:
NOTE	The burner should shut off as a flame failure condition.		
2.7.5	Clean the flame scanner, reinstall and test programmer.		Initials:
2.7.6	Check for proper operation as boiler goes through a firing cycle and light-off.	Circle one: (S) U N/A	Initials:
2.7.7	Check all electrical control and circuitry.	Circle one: (S) U N/A	Initials: GF
2.7.8	Inspect for cracked mercury tubes, separation of mercury, cracked insulators (probe type), jumper tube conditions, loose connections, poor or deteriorated wiring, improperly used bypass switches, cutoff switches wired in parallel, shut-offs installed at improper levels, wedges behind mercury tubes.	Circle one: (S) U N/A	Initials: GF
2.7.9	Observe operation of forced draft fan motors on boilers with power burners and induced draft fan motors on horizontal breeching where applicable.	Circle one: (S) U N/A	Initials:
2.7.10	Lubricate fan motors where necessary.		Initials:
2.8	Perform combustion and draft tests.		Initials:

Remarks: NONE

Work Order No.: 645452-01 Equipment ID No.: B-602

2.8.1 Visually inspect combustion.	Circle one: (S) U N/A	Initials:
NOTE Changes in flame shape, color, and sound are among early indicators of potential combustion-related problems. Changes may be due to changes in fuel pressure or gas/air linkage movement.		
2.9 Perform safety relief valve(s) pop test.	Circle one: (S) U N/A	Initials:
2.9.1 Check pressure-reducing valve.	Circle one: (S) U N/A	Initials:
2.9.2 Replace the strainer in the valve if needed.		Initials:
2.10 Perform slow drain test of low-water cutoff.	Circle one: (S) U N/A	Initials:
2.11 Inspect gas piping for proper support and tightness.	Circle one: (S) U N/A	Initials:
2.11.1 Inspect fuel supply system and gas controls.	Circle one: (S) U N/A	Initials:
2.11.2 Leak check gas controls and associated gas piping with a gas detector or soap suds.	Circle one: (S) U N/A	Initials:
2.12 Inspect boiler room ventilation louvers and intake.	Circle one: (S) U N/A	Initials:
2.12.1 Listen for any unusual noises or conditions and correct as necessary.	Circle one: (S) U N/A	Initials:
2.12.2 Report any needed corrections to the MC for corrective maintenance.		Initials:

Remarks: NONE

2.12.3 Check combustion air supply openings to ensure that they are not closed or stopped up.	Circle one: (S) U N/A	Initials:
2.12.4 Inspect conditions of stacks and rain caps.	Circle one: (S) U N/A	Initials:
2.12.5 Inspect flue door gaskets to ensure they are in good condition, and properly secured.	Circle one: (S) U N/A	Initials:
2.12.6 Replace if necessary.		Initials:

3.0 POST-MAINTENANCE ACTIVITIES

NOTE Post-maintenance activities shall be conducted in accordance with the work order package instructions (e.g., lockout/tagout, special instructions, etc.).

3.1 Close and secure front and rear flue doors.		Initials:
3.2 Hook up all associated piping and refill boiler.		Initials:
3.3 Fire up boiler and check for air, gas, and water leaks.	Circle one: (S) U N/A	Initials:
3.4 Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	Circle one: (S) U N/A	Initials:
3.5 Check pilot burners and ignition equipment for proper condition and adjustment.	Circle one: (S) U N/A	Initials:
3.6 Visually check burner for proper combustion.	Circle one: (S) U N/A	Initials:
3.7 Record all mechanical maintenance data, testing data, and other notable items.		Initials:

Remarks: NONE

1.0 PRE-MAINTENANCE ACTIVITIES

NOTE Preoperational and pre-maintenance activities shall be conducted per the work order package, e.g., lockout/tagout, permits, special instructions, etc.

! WARNING If purging of gas lines will be required during this maintenance, ensure that the purging activity is addressed in the Integrated Work Document (IWD). The following must be addressed (see Master Specification 23 1123):

1. Purged fuel gases shall be directly vented to a safe location outdoors, away from personnel and ignition sources. This may be accomplished through permanent piping or temporary piping or hosing.
2. If it is not possible to vent purged gases outdoors, the following conditions must be met:
   a. Purging activity must be approved by the LANL Fire Marshal based on a documented justification detailing why outdoor venting is not possible and IWD.
   b. Gas concentration in the space to which the purge is vented shall be maintained at no more than 25% of the Lower Explosive Limit (LEL). For natural gas, the LEL is a concentration of 5% in air or 50,000 ppm. Therefore a maximum concentration of 12,500 ppm is allowed for natural gas. The concentration may be controlled by providing adequate ventilation or by limiting the amount of purge gas.
   c. Combustible gas detectors shall be used during the purging operation to monitor the gas concentration.
   d. Nonessential personnel shall be evacuated from the vicinity (including adjacent spaces) during the purging operation.
   e. Ignition sources in the purging space shall be controlled or eliminated.

NOTE All repair work, adjustments, or the replacement of parts shall be done in accordance with the manufacturer's procedures, specifications, recommendations, and instructions.

Remarks: NONE

Work Order No.: 645452-01 Equipment ID No.: B-603

1.1	Notify maintenance coordinator (MC) that work will be in progress on the boiler system.		Initials:

2.0 MAINTENANCE

NOTE These selected hot water boilers are mainly boilers with power burners that have refractory in front and rear flue doors or have heat extractors in the fire-tubes as are found in most one-pass boilers (Sellers). Hot water heating boilers with atmospheric burners generally require minimal fireside preventative maintenance. Contact the MSS-MP Boiler subject matter expert (SME) at 7-8550 with questions or concerns.

2.1	Lock and tag out electrical and all associated valves on boiler and shut off gas supply.		Initials:
2.2	Cool boiler, open air cock, and drain the boiler.		Initials:
2.3	Perform an internal and external inspection after thorough cleaning.	Circle one: (S) U N/A	Initials:
2.3.1	Check the fireside furnace and fire-tubes for any evidence of soot formation or corrosion.	Circle one: (S) U N/A	Initials:
2.3.2	Brush and vacuum furnace and fire-tubes if such conditions exist.		Initials:
2.3.3	Perform hydrostatic test based on the boiler's Maximum Allowable Working Pressure and/or facility potable water pressure as long as the potable water pressure is at least 30 psi over boiler operating pressure.	Circle one: S U (N/A)	Initials:
2.3.4	Note if any boiler tubes and/or fittings are leaking, and repair as required. For any major repairs (determined by the SME), request a work order for the repairs from the MC.		Initials:
2.3.5	On one-pass boilers (Sellers), check condition of all heat extractors.	Circle one: (S) U N/A	Initials:

Remarks: STEP 2.3.3 N/A DO NOT HYDRO TEST BOILER.

Work Order No.: 645452-01 Equipment ID No.: B-603

2.3.6 Check refractory materials.	Circle one: (S) U N/A	Initials:
2.3.7 Replace if needed.		Initials:
2.4 Perform maintenance on low-water cutoff float chamber and water feeder. Disassemble to ensure freedom from obstruction and proper functioning of the working parts.		Initials:
2.5 Perform routine burner maintenance.		Initials:
2.5.1 Observe temperature and operating pressure and general conditions.	Circle one: (S) U N/A	Initials:
2.5.2 Fire and cycle the burner.		Initials:
2.6 Perform routine maintenance of circulating pump and expansion pump equipment.		Initials:
2.6.1 Observe condition of expansion tank.	Circle one: (S) U N/A	Initials:
2.6.2 Drain expansion tank if it is of a non-bladder type and refill to reestablish an air cushion.	Circle one: S U (N/A)	Initials:
2.6.3 Check the air pressure on the bladder-type expansion tanks.	Circle one: (S) U N/A	Initials:
2.6.4 Observe operation of circulating pumps.	Circle one: (S) U N/A	Initials:
2.6.5 Lubricate pump motors.		Initials:
2.7 Perform routine maintenance of entire combustion control equipment.		Initials:

Remarks: STEP 2.6.2 N/A DID NOT DRAIN EXPASION TANK

Work Order No.: 645452-01 Equipment ID No.: B-603

2.7.1	Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	Circle one: (S) U N/A	Initials:
2.7.2	Adjust air/fuel mixture as needed.		Initials:
2.7.3	Test flame detection devices on boilers with flame scanners.	Circle one: (S) U N/A	Initials:
2.7.4	Remove the flame scanner with the burner firing.		Initials:
NOTE	The burner should shut off as a flame failure condition.		
2.7.5	Clean the flame scanner, reinstall and test programmer.		Initials:
2.7.6	Check for proper operation as boiler goes through a firing cycle and light-off.	Circle one: (S) U N/A	Initials:
2.7.7	Check all electrical control and circuitry.	Circle one: (S) U N/A	Initials: GF
2.7.8	Inspect for cracked mercury tubes, separation of mercury, cracked insulators (probe type), jumper tube conditions, loose connections, poor or deteriorated wiring, improperly used bypass switches, cutoff switches wired in parallel, shut-offs installed at improper levels, wedges behind mercury tubes.	Circle one: (S) U N/A	Initials: GF
2.7.9	Observe operation of forced draft fan motors on boilers with power burners and induced draft fan motors on horizontal breeching where applicable.	Circle one: (S) U N/A	Initials:
2.7.10	Lubricate fan motors where necessary.		Initials:
2.8	Perform combustion and draft tests.		Initials:

Remarks: N/ONE

Work Order No.: 645452-01 Equipment ID No.: B-603

2.8.1 Visually inspect combustion.	Circle one: **S U N/A**	Initials:
NOTE Changes in flame shape, color, and sound are among early indicators of potential combustion-related problems. Changes may be due to changes in fuel pressure or gas/air linkage movement.		
2.9 Perform safety relief valve(s) pop test.	Circle one: **S U N/A**	Initials:
2.9.1 Check pressure-reducing valve.	Circle one: **S U N/A**	Initials:
2.9.2 Replace the strainer in the valve if needed.		Initials:
2.10 Perform slow drain test of low-water cutoff.	Circle one: **S U N/A**	Initials:
2.11 Inspect gas piping for proper support and tightness.	Circle one: **S U N/A**	Initials:
2.11.1 Inspect fuel supply system and gas controls.	Circle one: **S U N/A**	Initials:
2.11.2 Leak check gas controls and associated gas piping with a gas detector or soap suds.	Circle one: **S U N/A**	Initials:
2.12 Inspect boiler room ventilation louvers and intake.	Circle one: **S U N/A**	Initials:
2.12.1 Listen for any unusual noises or conditions and correct as necessary.	Circle one: **S U N/A**	Initials:
2.12.2 Report any needed corrections to the MC for corrective maintenance.		Initials:

Remarks: NONE

2.12.3	Check combustion air supply openings to ensure that they are not closed or stopped up.	Circle one: (S) U N/A	Initials:
2.12.4	Inspect conditions of stacks and rain caps.	Circle one: (S) U N/A	Initials:
2.12.5	Inspect flue door gaskets to ensure they are in good condition, and properly secured.	Circle one: (S) U N/A	Initials:
2.12.6	Replace if necessary.		Initials:

3.0 POST-MAINTENANCE ACTIVITIES

NOTE Post-maintenance activities shall be conducted in accordance with the work order package instructions (e.g., lockout/tagout, special instructions, etc.).

3.1	Close and secure front and rear flue doors.		Initials:
3.2	Hook up all associated piping and refill boiler.		Initials:
3.3	Fire up boiler and check for air, gas, and water leaks.	Circle one: (S) U N/A	Initials:
3.4	Check gas/air linkages and moving parts (on power burners that modulate) for positioning, tightness, and binding.	Circle one: (S) U N/A	Initials:
3.5	Check pilot burners and ignition equipment for proper condition and adjustment.	Circle one: (S) U N/A	Initials:
3.6	Visually check burner for proper combustion.	Circle one: (S) U N/A	Initials:
3.7	Record all mechanical maintenance data, testing data, and other notable items.		Initials:

Remarks: NONE

Los Alamos NATIONAL LABORATORY EST 1943	*Preventive Maintenance Instruction* Low- and High-Pressure Steam Boiler and Low-Temperature Water Heating Boiler Inspection, Testing, and Maintenance **403-A.006: Hot Water Boiler Yearly Fireside/Waterside Inspection and Maintenance**

Work Order No.: 645452-01 Equipment ID No.: B-603

NOTE	Combustion analysis is verifiable only with a flue gas analyzer and is performed mainly on boilers with power burners.		
3.8	Test water for proper chemical levels. Test and treat water as defined on Datasheet 403-A.002.	Circle one: S U N/A	Initials:
3.9	Record all mechanical maintenance data, testing data, and other notable items.		Initials:
3.10	Notify MC that work on the boiler system is complete.		Initials:

Form 2193

Los Alamos NATIONAL LABORATORY EST.1943

Facility Electrical Hazard Analysis Record

C

1. Description of circuit/equipment/job location: MCC-603D-B1/L & MCC-603D-A2/R	TA 55	Building 0006	Room(s)
Equipment ID(s): B-602 & B-603			
IWD Number:	Job Ticket Number:		

2. Brief description of work to be done (*attach additional pages as needed*):
Annual preventive maintenance of the Hot Water Boilers

3. Electrical Hazard Class(es)/Mode(s) (*Per Chapter 4 of P101-13*):
Class 1.3b mode 1

4. Results of the Shock Hazard Analysis:
480 V

5. Determination of Shock Protection Boundaries and/or the RFMW environments:
(a) Limited Approach Boundary: 3 ft- 6 in.
(b) Restricted Approach Boundary: 1 ft- 0 in.
(c) Prohibited Approach Boundary: 0 ft- 1 in.

6. Determination of Flash Protection Boundary: 2 ft- 8 in.; Based on IEEE Std 1584, NFPA 70E.

7. Flash Hazard Analysis results:
480 volts, 25.83 kA bolted fault current available, .06 sec clearing time. For the work to be performed under the IWD, indicate the worst-case calculated incident energy: 3 cal/cm^2.

8. Personal Protective Equipment (PPE) required to safely perform the work steps described above:

☑ Leather Safety Shoes	☐ Pants (long)	☐ Goggle and Face Shield*
☐ Hard hat	☑ FR long-sleeve shirt, 4 cal/cm^2	☐ Chemical-Resistant Gloves*
☑ V-rated Gloves	☑ FR pants, 4 cal/cm^2	☐ Protective Apron*
☑ Safety Glasses	☐ Flash suit jacket, 40 cal/cm^2	☐ Protective Overshoes*
☑ Leather Gloves	☐ Flash suit pants, 40 cal/cm^2	☐ Emergency Shower/Eyewash*
☐ V-rated tools	☐ Arc-rated face shield	☐ _____
☐ T-shirt (short-sleeve)	☐ Flash suit hood	☐ _____
☐ Shirt (long-sleeve)	☑ Hearing protection	☐ _____

Based on IEEE Std 1584, NFPA 70E or Hazard Classification Chapter of P101-13.
*For chemical hazards associated with batteries; refer to NFPA 70E Article 320.

9. Means to restrict the access of unqualified persons to the work area:
Barricades / Shock Hazards

10. Job-related hazards, PPE, emergency procedures, special tools, etc., to be discussed at the Pre-Job Briefing:
Standard Industrial

0001625855	-	LUBRIPLATE CHAIN AND CABLE FLUID	11	Ounces(OZ)	02-Jul-20
0001625859	-	LUBRIPLATE CHAIN AND CABLE FLUID	11	Ounces(OZ)	02-Jul-20
0001625857	-	LUBRIPLATE CHAIN AND CABLE FLUID	11	Ounces(OZ)	02-Jul-20
0001625862	-	LUBRIPLATE CHAIN AND CABLE FLUID	11	Ounces(OZ)	02-Jul-20
0001625854	-	LUBRIPLATE CHAIN AND CABLE FLUID	11	Ounces(OZ)	02-Jul-20
V0000064F5	-	Lubriplate No. 100/105/107/110/115	10	Ounces(OZ)	02-Jul-20
V0000064F6	-	Lubriplate No. 100/105/107/110/115	10	Ounces(OZ)	02-Jul-20
V0000064F7	-	Lubriplate No. 100/105/107/110/115	10	Ounces(OZ)	02-Jul-20
V0000064F9	-	WD-40 Multi-Use Product TRIGGER PRO 50 State Compliant	20	Ounces(OZ)	02-Jul-20
V0000064F8	-	WD-40 Multi-Use Product TRIGGER PRO 50 State Compliant	20	Ounces(OZ)	02-Jul-20
0001625863	-	Brakleen Brake Parts Cleaner - Non-chlorinated (aerosol)	13	Ounces(OZ)	02-Jul-20
0001625864	-	Brakleen Brake Parts Cleaner - Non-chlorinated (aerosol)	13	Ounces(OZ)	02-Jul-20
0001625865	-	Brakleen Brake Parts Cleaner - Non-chlorinated (aerosol)	13	Ounces(OZ)	02-Jul-20
0001625866	-	Brakleen Brake Parts Cleaner - Non-chlorinated (aerosol)	13	Ounces(OZ)	02-Jul-20
0001625867	-	Brakleen Brake Parts Cleaner - Non-chlorinated (aerosol)	13	Ounces(OZ)	02-Jul-20
0001625868	-	Brakleen Brake Parts Cleaner - Non-chlorinated (aerosol)	13	Ounces(OZ)	02-Jul-20
0001625872	-	FLAT BLACK SPRAY PAINT	12	Ounces(OZ)	02-Jul-20
0001557262	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557270	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557289	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557263	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557264	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557265	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557266	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557267	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557268	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557269	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557283	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557295	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557294	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557293	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557292	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557291	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557290	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557280	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557288	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
0001557286	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20

Chemical Usage July - December 2020

Barcode	CAS #	Chemical Name	Container Size	Unit of Measure	Date
0001557287	-	DUSTING GAS	15	Ounces(OZ)	02-Jul-20
