AIRS No. 35-028-0001

Dear Ms. Stockton:

This letter is to acknowledge your letter and application of June 29, 2023 to revise Air Quality NSR Permit 2195B-M3 for U.S. Department of Energy National Nuclear Security Administration, Los Alamos National Laboratory (LANL). This facility is located in the town of Los Alamos in Los Alamos County, New Mexico. This revision is pursuant to Title 20 of the New Mexico Administrative Code, Chapter 2 Part 72 (20.2.72 NMAC) Construction Permits Section 219.A. and AQB Procedure No. 02.007-00 (March 3, 1999). The request was received by the New Mexico Environment Department's Air Quality Bureau (Department) on July 7, 2023.

A review of the information you submitted confirms that the requirements of AQB Procedure No. 02.007-00 (March 3, 1999) citing 20.2.72 NMAC, Construction Permits, Permit Revisions, Section 219.A are met.

This administrative revision is an identical like-kind turbine replacement to bring back original Unit TA-3-22-CT-1 to LANL's power plant facility (Area TA-3) and processed under NSR Construction Permit 2195B-M3. This unit has now been repaired and returned to the facility. The serial number and model number were revised (both of which are authorized under AQB Procedure No. 02.007-00) and LANL has certified that the capacity, emissions, and pollution control equipment are all the same, and that when Siemens took ownership of Rolls Royce the company revised model/serial numbers. Unit TA-3-22-CT-1 shall meet any/all applicable NSPS requirements that apply to this unit.

This letter, NSR 2195B-M3R3, shall be attached to Air Quality Permit No. 2195B-M3 issued by the Department on July 26, 2018 to serve as acknowledgment by the Department that this qualifies as an administrative revision.

If you have any questions, please do not hesitate to contact me in Santa Fe at 505-629-6283 or by email at: james.nellessen@env.nm.gov.

Sincerely,
